12V DC ELECTRIC TRAILER JACK

With 7-Way Connector

TowingMaster

3500 LB 12V DC ELECTRIC TRAILER JACK WITH 7-WAY CONNECTOR

ONE-TOUCH OPERATION

No more cranking your arm off to raise or lower your trailer. With one simple push of a button, the jack raises or lowers your trailer up to 18 inches.
The drop leg gives you an additional 4.5" of travel for a total of 22.5" of travel distance.

ANTI-DIVOT FOOT ADDS STABILITY

The oversized footpad provides the added surface area you need to get a solid footing on any terrain without sinking or making a big divot in the ground.

FITS ANY A-FRAME

This versatile jack is pre-drilled for compatibility with trailers fitted for A-frame couplers.

EASY PLUG AND GO SYSTEM

No hard wiring required. Simply unplug your trailer connector, plug the trailer jack into your vehicle's pre-wired 7-way connector and push the button. The jack runs off your vehicle's 12V battery...it's as simple as that!

MEASURES UP TO YOUR NEEDS

With 3,500 lbs. lifting capacity and 5,000 lbs. of breakaway capacity, this lightweight jack is up to the task. The jack measures 31.5 in. from the mounting plate to the top of the motor and has a 9in. retracted height from mounting plate to ground.

TECHNICAL SPECIFICATIONS
