12V DC ELECTRIC TRAILER JACK

With 7-Way Connector

TowingMaster

5000 LB 12V DC ELECTRIC TRAILER JACK WITH 7-WAY CONNECTOR

ONE-TOUCH OPERATION

No more cranking your arm off to raise or lower your trailer. With one simple push of a button the power stroke plus system raises or lowers your trailer 18 inches in just 30 seconds. And the drop leg gives you an additional 4.5 inches of travel for 22.5 in. total travel.

ANTI-DIVOT FOOT ADDS STABILITY

An oversized footpad provides the added surface area you need to get a solid footing on any terrain without sinking or taking a big divot out of the ground.

FITS ANY A-FRAME

This versatile jack is pre-drilled for compatibility with any trailer featuring an A-frame coupler.

EASY PLUG AND GO SYSTEM

No hard wiring is required. Simply unplug your trailer connector, plug in the trailer jack to your vehicle's pre-wired 7-way connector, and push the button. The jack runs off your vehicle's 12V battery … it's as simple as that!

MEASURES UP TO YOUR NEEDS

With 5,000 lbs. lifting capacity and 7,500 lbs. of breakaway capacity, this lightweight jack is up to the task. The jack measures 31.5 in. from the mounting plate to the top of the motor and has a 9in. retracted height from mounting plate to ground.

TECHNICAL SPECIFICATIONS
