OPENFIT 2

OPEN-EAR TRUE WIRELESS EARBUDS

Open-Ear Comfort, Ultimate Sound.

Find Your Ultimate Sound.

OpenFit 2 brings you bigger, better, more dynamic open-ear sound with Shokz DualBoost™ Technology. With a comfortable, ergonomic design and an upgraded inner silicone layer, OpenFit 2 stays comfortable and securely in place. Manage calls, music, and everything else with physical buttons for precise control over your audio, and let the music move you.

SHOKZ

Dynamic Audio with Powerful Bass.

Boost your Sound.

OpenFit 2 introduces our groundbreaking, Shokz DualBoost™ Technology to deliver larger-than-life audio that's vibrant and dynamic. Hear the power of deep bass, crystal-clear mids and highs, and exceptional detail.

SHOKZ

Larger, 17.3mm[1] Low-Frequency Driver

Customized composite dynamic drivers deliver deeper bass.

SHOKZ

Independent High-Frequency Unit

The high-frequency unit delivers crisp sound for a detailed and balanced sound profile.

Customized, Bold Bass.

Shokz OpenBass™ 2.0 is all about bold bass. An advanced algorithm delivers powerful low-frequency vibrations directly to your ear, while the Shokz App lets you customize your sound with 4 pre-set EQ modes or create your own with 2 custom EQs.

SHOKZ

Secure Fit and Soft Comfort.

Golden Fit, Golden Sound.

Inspired by the perfect proportions of the golden spiral, OpenFit 2's flexible ear hook is optimized to ensure a secure fit. The integrated nickel-titanium alloy, molds to the contours of your ear for a personalized, comfortable fit from workouts to everyday wear.

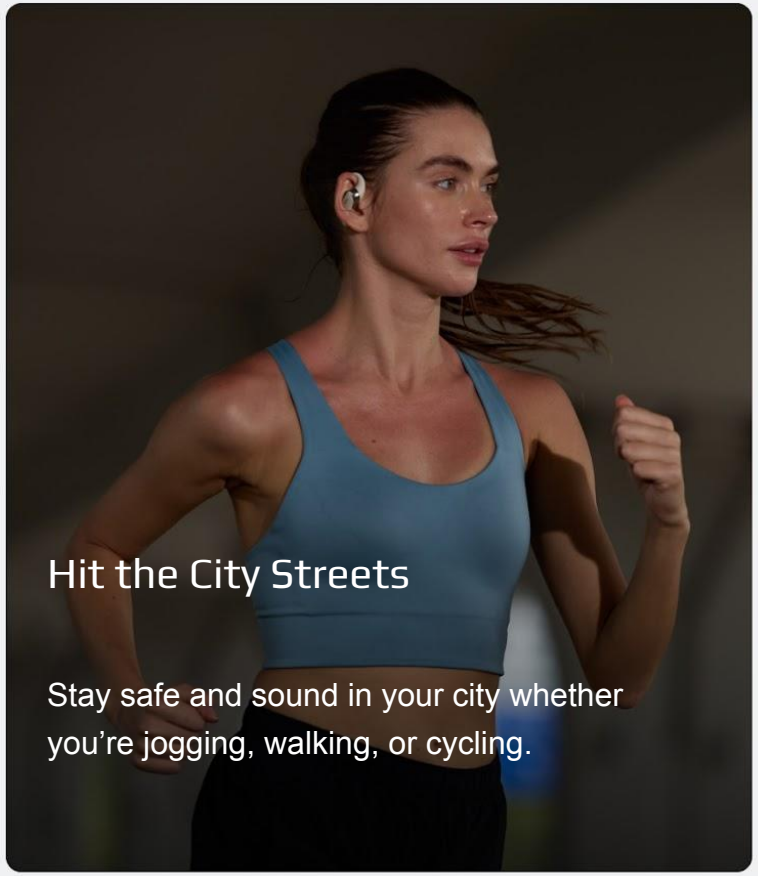
Big on Comfort, Light on Everything Else.

At just 9.4g[2] (0.33 oz) each, OpenFit 2 is incredibly lightweight, keeping your ears fatigue-free. Crafted with an inner layer of Shokz Ultra-Soft Silicone™ 2.0[3], these earbuds provide a comfortable, natural fit that seamlessly blends into your everyday life.

SHOKZ

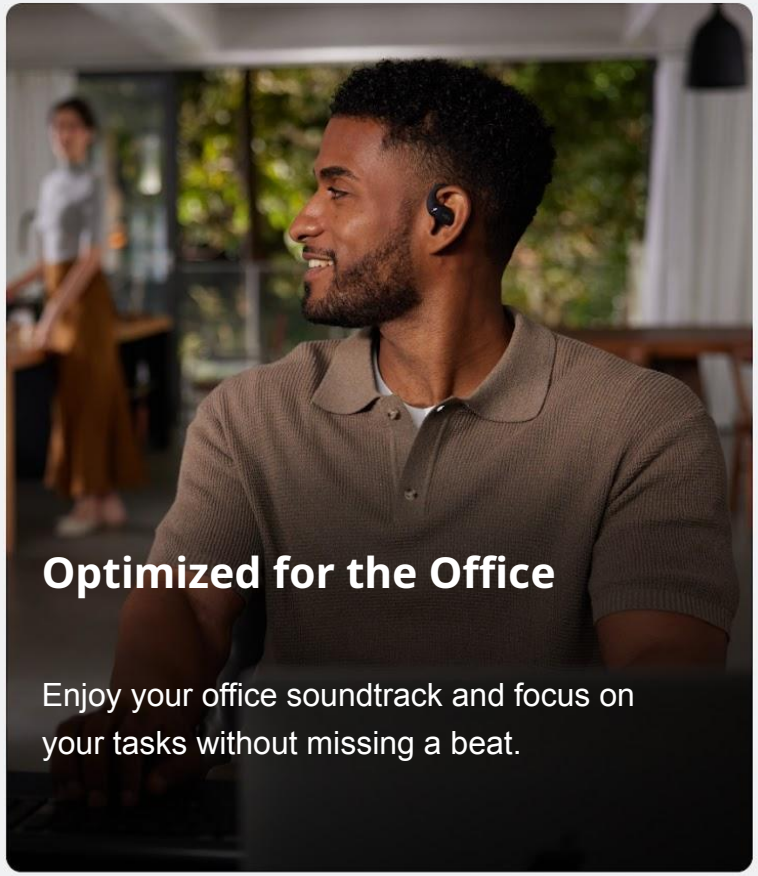
Open-Ear Design for Situational Awareness.

Stay in the game and connect to your world with our signature open-ear design[4] and cutting-edge technology. Thanks to the advanced DirectPitchTM 2.0 Technology , you get accurately directed sound with minimal sound leakage ensuring your audio stays private.



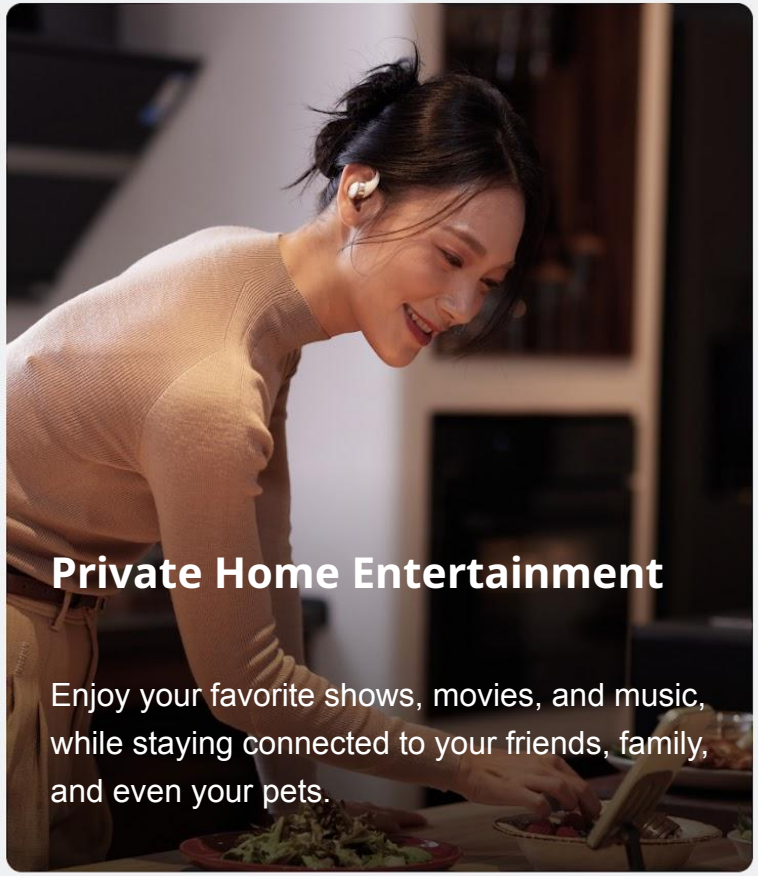
Hit the City Streets

Stay safe and sound in your city whether you’re jogging, walking, or cycling.



Optimized for the Office

Enjoy your office soundtrack and focus on your tasks without missing a beat.



Private Home Entertainment

Enjoy your favorite shows, movies, and music, while staying connected to your friends, family, and even your pets.

Physical Multifunction Buttons.

OpenFit 2's upgraded control system combines physical buttons and touch controls for precise and intuitive operation. Easily adjust volume, skip tracks, answer calls, and more with a simple button press or touch.

SHOKZ

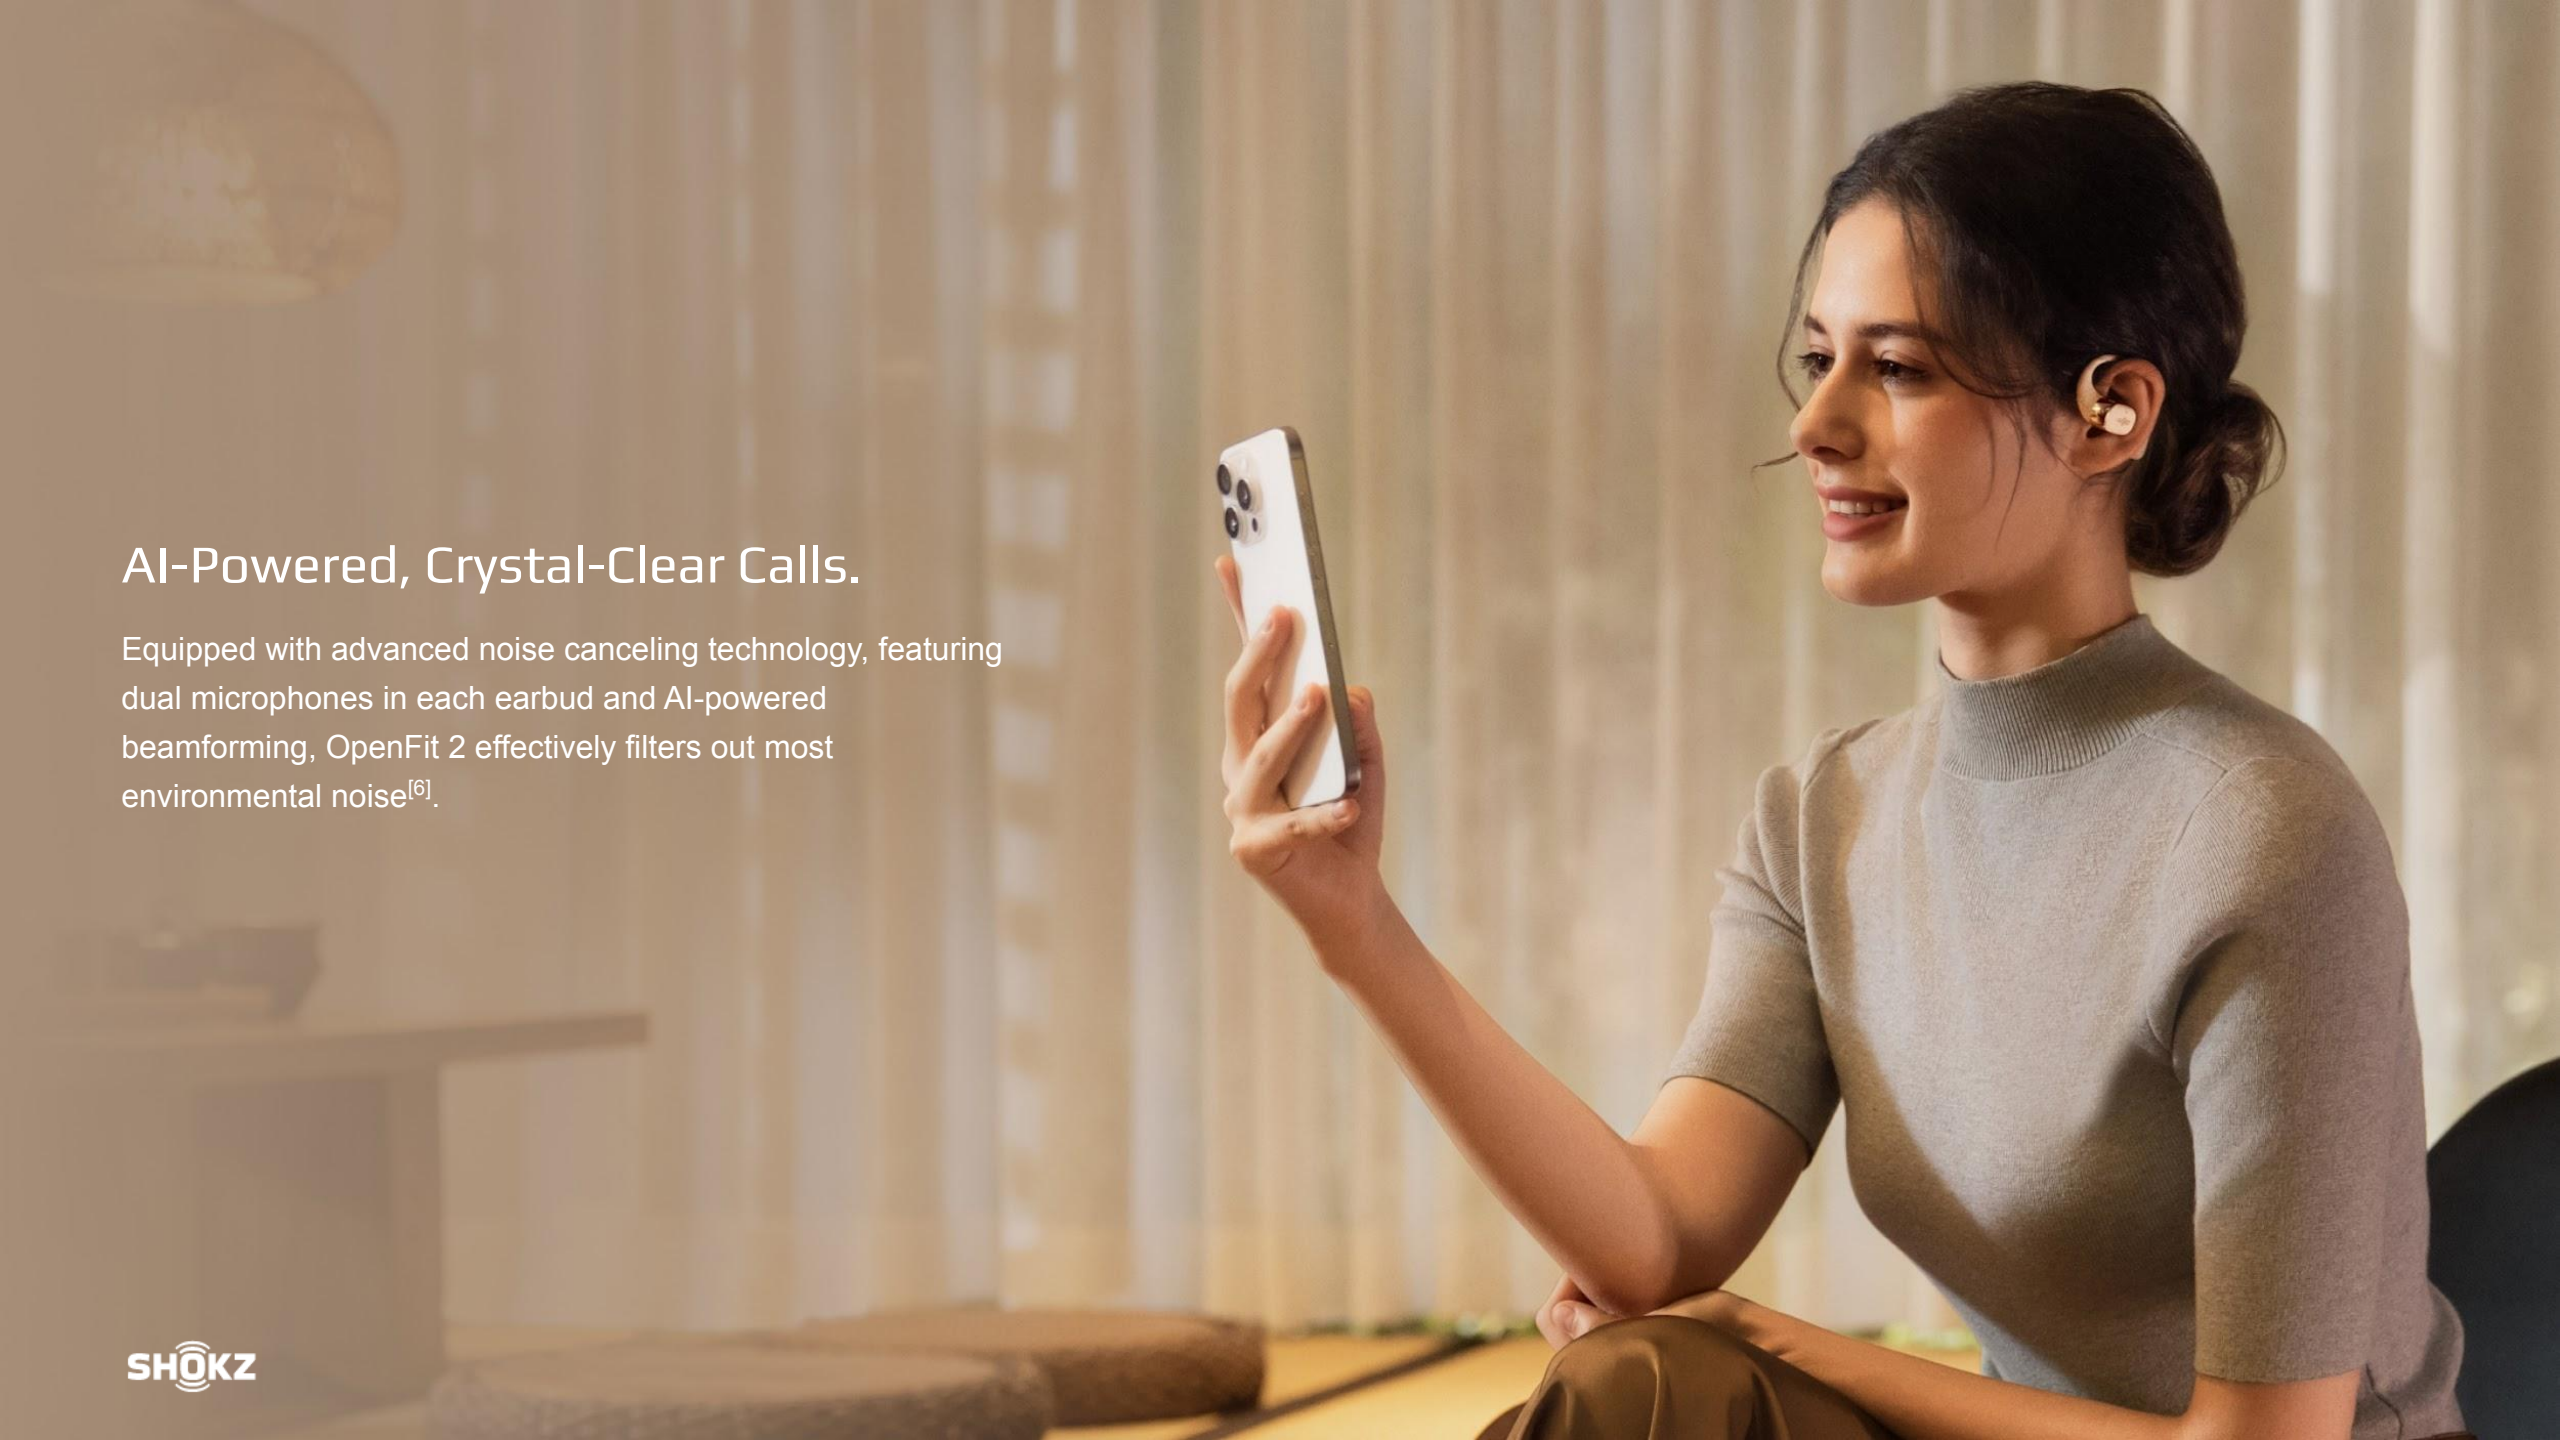
48 Hours of Power, 48 Hours of Sound[5].

Up to
48 hours
of total listening time with the charging case.

Up to
11 hours
of battery life with a single charge.

A quick
10-minute charge
delivers **2 Hour** of listening time.

SHOKZ



AI-Powered, Crystal-Clear Calls.
Equipped with advanced noise canceling technology, featuring dual microphones in each earbud and AI-powered beamforming, OpenFit 2 effectively filters out most environmental noise[6].
SHOKZ

Sweat and Water Resistance[7].

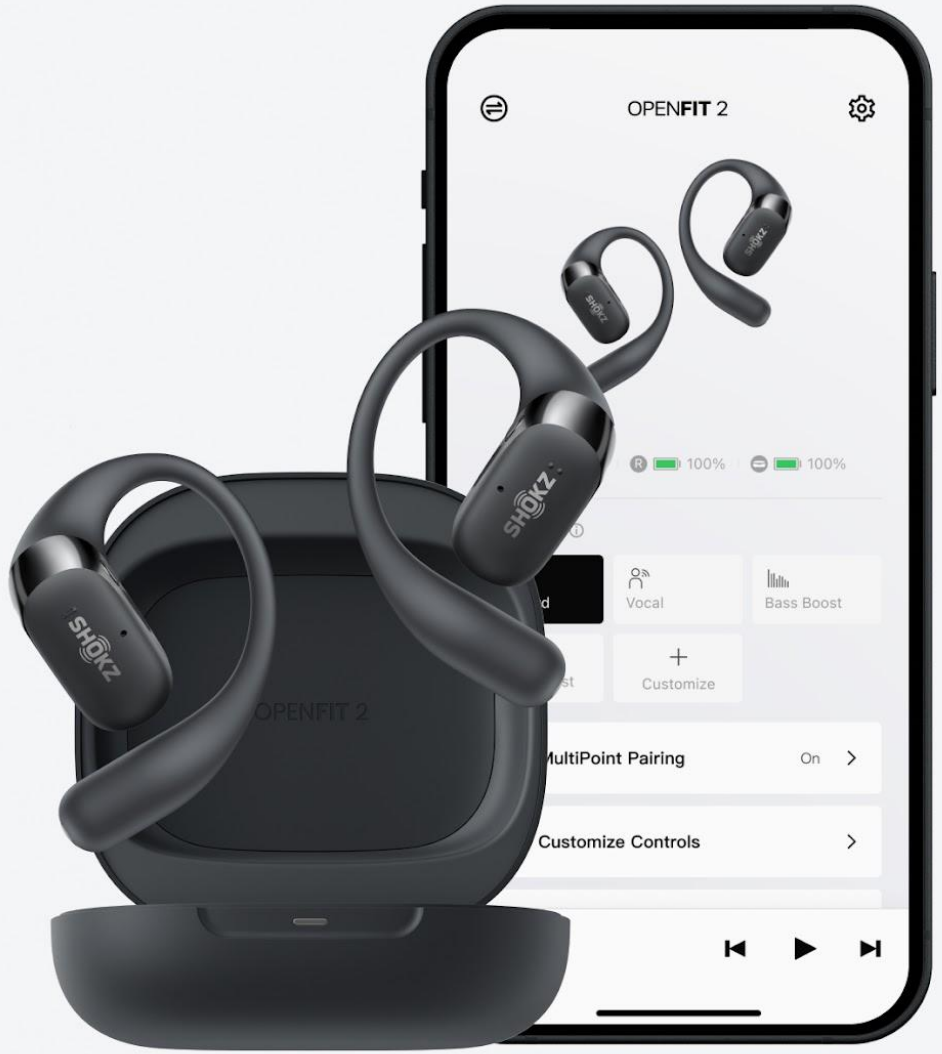
Easily locate your earbuds with the one-click ringing feature.

Multipoint Pairing
Seamlessly switch between devices.

Stay Informed
Stay informed about your battery status and firmware updates.



SHOKZ

[1] The low-frequency unit is equipped with an 21mm x 11mm custom dynamic driver, delivering sound quality comparable to a 17.3mm round speaker.

[2]Data was gathered from Shokz testing labs and the specific weight may vary by ± 0.2 grams.

[3]Shokz self-developed Ultra-Soft Silicone™ 2.0 features a Shore A hardness of minus 20.

[4]When using during outdoor activity, please ensure earbuds are being properly worn and control the volume to ensure that you can hear your surroundings, including traffic signals, passersby, etc. Using OpenFit 2 while riding or driving may distract your attention and have higher risk of sports injury and traffic accident; Using OpenFit2 while riding or driving may violate local laws or community regulations, use of this product should comply with local laws and community regulations.

[5]This data was gathered at the Shokz Lab in a temperature-controlled environment of 25±2 °C, playing SBC-encoded audio at a 50% volume and all other features set to default. The actual battery life depends on the volume, sound source, degree of environmental interference, product features, use habits, and other factors. Quick charging requires the charging case to be in the green light prompt state.

[6]Drawing insights from the Shokz Lab's experiments simulating scenarios like crossroad, aligning the dual microphones to this position yields an average signal-to-noise ratio improvement of 51dB when the artificial head experiences a sound pressure level of 65-72dB(A). This translates to a 99.97% reduction in environmental noise.

[7]IP55 water-resistance only applies to the earbuds, and charging case is not rated waterproof. OpenFit 2 is resistant to sweat and water splashes, suitable for non-aquatic sports and activities. Under specific testing conditions, its waterproof performance has reached the IP55 level based on the IEC 60529 standard. The sweat and waterproof capability is not permanent and may decrease over time due to wear and tear. DO NOT charge a wet OpenFit 2, nor swim or shower with it.

[8]Note that the touchpad's voice assistant function is disabled by default. To activate it, go to the app settings.
