**Age Grade:** Birth and Up

**Manufactured:** In China

**Installation:** Consumers should plan on about a 20 minutes for proper installation of a pressure mounted gate. If wall cups are used, installation will take approximately 30 minutes. A template is provided in the packaging to make the installation as easy as possible. Please refer to instruction booklet for details.

**Helpful Hints:** When you unpack the gate, you will notice it is NOT square. This is normal and not damage to the gate. It is manufactured at a pre-set angle so that when it is installed in an opening properly, it will maintain the correct amount of tension and cannot be pushed out of the opening under normal use. The 4 tension bolts, with adjusting knobs, simply slide into the gate frame; they do NOT screw into place. To create tension against the walls of the opening, turn the knob on each tension bolt with the wrench provided until the gate is snug.
