

Measuring Guide

Chaise Cushion

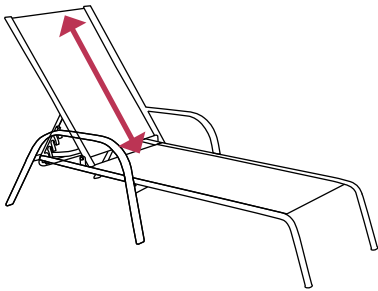

1 Width

- Measure the widest part of the seat from side to side.

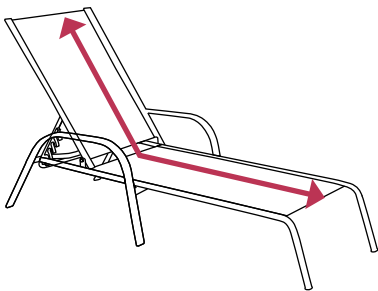

2 Seat Depth

- Measure the depth from the front of the seating area to the back, or where the back and seat meet.
- Add one inch to your measurement to ensure proper cushion fit and maximum comfort.

3 Back Height

- Measure the height from the top of the chair down to the back of the seat, or where the back and seat meet.

4 Total Length

- Add the seat depth to the back height to get the total length for a one-piece chair cushion.
