36" Models Require a 36"-Wide Opening

\*The supplied duct cover fits 7'-5" to 9'-3" ceiling heights (10' with optional high ceiling kit JXDC71)

The vent hood must be installed 24" min. above the cooking surface. For optimal performance, installing the hood more than 36" above the cooking surface is not recommended. The hood installation height above the cooking surface depends upon ceiling height. The telescopic duct cover conceals the ductwork running from the top of the hood to the ceiling.

NOTE: Installation height should be measured from the cooking surface to the lowest part of the hood. This hood may be installed onto a wall and vented to the outdoors, or it can be installed for recirculating operation. Parts for recirculating operation are supplied with the hood. However, when installed for recirculating operation, the optional charcoal Filter JXCF71 will need to be purchased separately.
