Café[™] 36" All Gas Professional Range with 6 Burners (Natural Gas)

CGY366P4MW2 /CGY366P2MS1 / CGY366P3MD1

ALSO AVAILABLE IN

CGY366P2MS1 Stainless Steel with Brushed Stainless handle and knobs

CGY366P3MD1 Matte Black with Brushed Stainless handle and knobs

FEATURES & BENEFITS

Whip up an unforgettable meal with a **professional oven system** that combines reverse-air convection technology with an infrared broil and gas burner to provide superb baking results and fast preheating.

Enjoy a full range of heat settings from ultra-low simmers to intense boils, with **six sealed 18K BTU dual stack burners.**

Experiment with every cuisine with reversible burner grates that are flat on one side and contoured on the other to accommodate round-bottom cookware like woks.

Bake more batches at once with a **6.2 cu. ft. capacity caterer's oven** that can fit up to three full-size sheet trays.

Smoothly slide heavy roasts in and out of the oven with fullextension, heavy-duty roller racks that can also stay in the oven during self-cleaning cycles.

Confidently cook over a steady flame with the **electronic ignition's automatic reignition** feature that instantly revives any accidentally extinguished flames.

Observe sacred days with Star-K certification.

POWER / RATINGS

Top Burner BTU Rating - LP (000's BTU's)	(6) 15.0
Top Burner BTU Rating - Nat. Gas (000's BTU's)	(6) 18.0
Volts/Hertz/Amps	120v; 60Hz; 15A
Bake/Broiler BTU Rating - LP (000's BTU's)	23.0 Bake / 15.0 Broil
Bake/Broiler BTU Rating - Nat. Gas (000's BTU's)	24.5 Bake / 17.0 Broil

DIMENSIONS AND INSTALLATION

Electrical Requirements: Ranges must be hooked up to a 120V, 60Hz properly grounded dedicated circuit protected by a 15-amp circuit breaker or time-delay fuse.

GAS SUPPLY: The natural gas models are designed to operate at 5" water column pressure. For proper operation, the pressure of the natural gas supplied to the regulator must be between 7" and 13" water column.

The LP models are designed to operate at 10" water column pressure. For proper operation, the pressure of the LP gas supplied to the regulator must be between 11" and 13" water column.

Optional Backsplash Accessories: The range requires a 12" minimum clearance to a vertical combustible surface at the rear. A backsplash is required for installations with less than 12" clearance. The following backsplash accessories are available, or a custom, non-combustible backsplash can be used.

Order one with a 36"-wide range backsplash UX12B36PSS – 12" backsplash UXADJB36PSS – 30"-36" adjustable-height backsplash with warming shelf

NOTE: Professional ranges offer a number of choices in size and cooktop configurations. All Professional Ranges are factory set for natural gas. Conversion kits are included with the range. High Altitude kit, WB28K10553 for operation above 6,000 feet (for Natural and LP gas models), is also available. The kits must be installed by a qualified service technician at additional cost.

WARRANTY

Parts warranty	Limited 1-year entire appliance
Labor warranty	Limited 1-year entire appliance
Warranty notes	See written warranty for full details

Installation Information: Before installing, consult installation instructions packed with product or online at geappliances.com for current dimensional data.

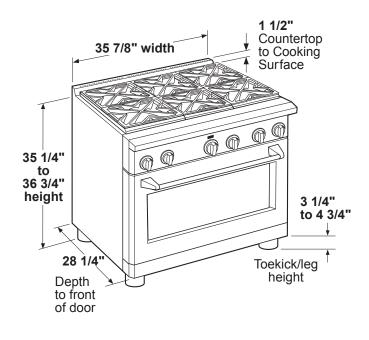

A suitable 36" or wider vent hood is required for installation over ranges with a grill and recommended for all other ranges.

Advance Planning: Refer to dimensional drawings for appropriate placement and necessary clearances when planning the installation.

- Working areas adjacent to the range should have 18" minimum clearance between countertop and cabinet bottom.
- Clearance between range and side wall or combustible material must be at least 12" on each side.
- Installation must conform with local codes. In the absence of local codes, the range must comply with the National Fuel Gas Code, ANSI Z223.1-1990.

WARNING: Installations without a hood require 48" minimum to combustibles. A custom hood installation with exposed horizontal combustible surfaces must have an Auto-On feature. Refer to hood installation instructions for specific hood clearances.

The surface of the entire back wall above the range and below the hood must be covered with a non-combustible material such as metal, ceramic tile, brick, marble or other stone.
