Retro by Remcraft

2 light medium, Retro style cylindrical wall up/down light

Remcraft has brought back some of our most popular fixtures from the Retro era. That was the age of clean lines, smooth shapes and satin aluminum finishes. Our Retro Series fixtures include those same features and are made on many of the original tools, but updated with today's quality features and fittings.

Made in USA 3 to 5 days lead time

Satin Aluminum

Cylinder is 4 1/2" diameter x 14 3/4" long. Maximum projection is 7 1/2"

Overview:

Part of the Remcraft Retro collection of 20th Century Modern fixtures.

310 - series up/down lights can be used indoors or in protected outdoor locations to provide a wash of accent light both up and down a wall as well as a pool of light on the floor or ground. When used in exposed outdoor locations simply choose the Rain Shield (-RS) option which adds a glass cover over the up light. If you need to match the appearance of an up/down light in a location with Dark Sky restrictions choose the Light Shield (-LS) option in which an opaque cover eliminates the up light while maintaining the look of the up/down light.

- For wall mounting, either indoors or outdoors
- Equipped with EZ-Mount canopy back and thumbscrew for easy installation
- Durable baked enamel finishes
- UL Labeled Suitable For Wet Locations
- Use with medium base PAR-30 or BR-30 lamps to 75 watts

This fixture is also available with GU-24 lampholders to meet the requirements of Title 24
