Acqua

Designed in 2008

shown in Polished Chrome
with wood blades

The Acqua rotational ceiling fan is thoughtfully designed to resemble the molecular structure of water, Earth's most precious resource. The Acqua offers fluid lines and quiet axial rotation. The motor heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both motor head position and fan blade speed. Matthews rotational fans circulate heat and air-conditioning more efficiently than traditional paddle fans.

- Available in the following finishes: polished chrome, brushed nickel or textured bronze.
- Constructed of cast aluminum and heavy stamped steel, Acqua carries a limited lifetime warranty.
- The Acqua is available with the following blade options:
 - hand-balanced metal blades with decorative metal blade guards
 - hand-balanced metal blades with metal safety cages for low ceiling applications
 - hand-balanced solid wood blades without blade guards
- The Acqua comes with this standard equipment:
 - 3-speed remote control
 - low voltage 50 watt MR-16 GU10 down light
 - vaulted ceiling canopy

MATTHEWS FAN COMPANY

Acqua

weight: 27 lbs

voltage: 110*
