### 1 Getting Started

**Inspect Your Entryway for Obstructions:** Check for any obstructions above and around your entryway that may prevent the outward swing of your new security door, and/or its installation, such as: light fixtures, door bell, low overhang, door handle of your existing door, and trees, bushes, or hanging plants.

### 2 Identify or Create Required Mounting Surface

Your new security patio door will require a flat minimum mounting surface of 1-1/2" above, on both sides and below your entry door. In some cases this may require a build out. If a build out is required, install bottom of build out first (**Fig. 1**), making sure it is flush with stoop to avoid creating a tripping hazard. Secure all sides of the build out to studs in the wall.

## PRODUCT MEASURING GUIDE

### 3 Measure for Rough Opening Height and Width

**Measure for Rough Opening Height**

Measure from inside top edge to existing sliding patio door track.

**Measure for Rough Opening Width**

Measure from inside edge to inside edge of existing sliding patio door frame.

**Instructions:**

Determine which fit range your measurements fall within and order that standard size door.

### Standard size door

| Door Size<br>Tamaño de la Puerta | * Rough Opening Width<br>Fit Range<br>Anchura de apertura irregular de ajuste | Your Rough Opening Width<br>El ancho de la abertura | * Rough Opening Height<br>Fit Range<br>Altura aproximada de ajuste | Your Rough Opening Height<br>La altura de apertura irregular |
|----------------------------------|---|---|--|--|
| 72" x 80"                        | 70-1/4" - 73"   |   | 79-3/4" - 82-1/2"  |  |
| 96" x 80"                        | 94-1/4" - 97"   |   |  |  |
