

# V2100 SYSTEM HAMMERED AERSOL

# **DESCRIPTION AND USES**

Rust-Oleum<sup>®</sup> High Performance Hammered aerosols produce a hammered texture finish. Ideal for hiding surface imperfections, small dents and scratches. Can be applied directly to metal or over a primer to optimize corrosion protection. Not for use on galvanized steel.

This product complies with USDA FSIS regulatory sanitation performance standards for food establishment facilities. This coating is impervious to moisture and easily cleaned and sanitized.

## **PRODUCTS**

SKU	Description	
209562	Metal Silver	
209563	Metal Gold	
209564	Metal Dark Bronze	
209590	Metal Black	

## **PACKAGING**

Aerosol containers, 15 oz net weight

# **COMPANION PRODUCTS**

SKU	Description	
209566	White Clean Metal Primer	
V2169838	Red Primer	
V2182838	Gray Primer	

# PRODUCT APPLICATION

#### SURFACE PRERARATION

ALL SURFACES: Remove all dirt, grease, oil, salt and chemical contaminants by washing the surface with Pure Strength Cleaner/Degreaser item #3599402 or other suitable cleaner. Mold and mildew must be cleaned with a chlorinated cleaner or bleach solution. Rinse with fresh water and allow to dry.

STEEL: Hand tool (SSPC-SP-2) or power tool (SSPC-SP-3) clean to remove loose rust, mill scale, and deteriorated previous coatings.

PREVIOUSLY COATED: Previously coated surfaces must be sound and in good condition. Smooth, hard, or glossy finishes should be scarified by sanding to create a surface profile. Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead.

#### **APPLICATION**

Use when temperature is above 50°F (10°C) and humidity is below 85% to ensure proper drying. Surface temperature must be between 50-100°F (10-38°C). Use primer on bare or rusted surfaces. Protect surrounding surfaces from overspray. Overspray can carry a significant distance. Shake can for one minute after mixing ball is heard. Hold can 10-14 inches from surface. Apply several light coats a few minutes apart to avoid drips and runs.

#### **DRY AND RECOAT TIMES**

Dry times are based on 70°F (21°C) and 50% relative humidity. Allow more time in cooler temperatures. Dries tack free in 10-20 minutes and to handle in 1-2 hours. Recoat within 1 hour or after 24 hours. Two coats may be needed on rusted metal.

# **CLEAN UP**

1

Clean valve by turning can upside down and spray for 5 seconds. Some paint will spray out. If clogged, remove tip and clean in thinner. Do not insert any object into can valve opening.

# **TECHNICAL DATA**

# **V2100 SYSTEM HAMMERED AERSOL**

# PHYSICAL PROPERTIES

		HAMMERED AEROSOLS
Resin Type		Modified Alkyd
Pigment Type		Varies
Solvents		Acetone, Toluene, Xylene
MIR		Max value of 1.4
Fill Weight		15 oz.
Recommended Dry Film Thickness (DFT) Per Coat		1-2 mils (25-50μ)
Practical Coverage at Recommended DFT		Approximately 14 sq.ft./can (1.3 m²/can)
Dry Times at 70-80°F (21-27°C) and 50% Relative Humidity	Tack-free	10-20 minutes
	Handle	1-2 hours
	Recoat	Within 1 hour or after 24 hours
Dry Heat Resistance		200°F (93°C)
Shelf Life		5 years
Safety Information		For additional information, see SDS

Calculated values are shown and may vary slightly from the actual manufactured material.
