

BELT CROSS-REFERENCE GUIDE

GUÍA DE REFERENCIA CRUZADA SOBRE CORREAS

Featuring Genuine John Deere & Sunbelt Precision Belts

Presentación de correas John Deere y Sunbelt Precision originales

JOHN DEERE

Replacements for OEM & Fractional Belts

Repuestos para correas fraccionales y de fabricantes de equipos originales (OEM)

ver.1.0; 2020

Re-Order# G249751

FINDING THE CORRECT REPLACEMENT BELT

To find the correct replacement belt for your machine you need to know:

- Brand Model Number or
- OEM Belt Part Number or
- Belt Size - *Width and Length (in)*

If you know the **MODEL NUMBER** of your mower purchased from Lowe's, turn to the **BRAND-MODEL SEARCH** tab and the correct belt will be listed for your machine.

Common places to find your model number or serial number:

- Owners Manual
- OEM Website
- On or Under Mower Hood
- Under the Seat
- Side of the Fuel Tank, Engine or Mower Deck

If you know the **OEM BELT PART NUMBER**, use the **OEM BELT PART# CROSS-REFERENCE** tab
 If you know the **BELT SIZE**, use the **BELT SIZE (in) CROSS-REFERENCE** tab

CÓMO ENCONTRAR LA CORREA DE REPUESTO ADECUADA

Para encontrar la correa de repuesto adecuada para su máquina, debe saber lo siguiente:

- Número de modelo de la marca o
- Número de pieza de la correa del OEM o
- Tamaño de la correa: ancho y largo (*en pulg.*)

Si conoce el **NÚMERO DE MODELO** de la podadora Lowe's que compró, vaya a la pestaña **BÚSQUEDA DE MARCA-MODELO** y allí se indicará la correa adecuada para su máquina.

Lugares frecuentes en los que puede encontrar el número de modelo o el número de serie:

- Manual del propietario
- Sitio web del OEM
- Encima o debajo del capó de la podadora
- Debajo del asiento
- En el costado del tanque de combustible, del motor o de la plataforma de la podadora

Si conoce el **NÚMERO DE PIEZA DE LA CORREA DEL OEM**, use la pestaña **REFERENCIA CRUZADA DEL N.º DE PIEZA DE LA CORREA DEL OEM**

Si conoce el **TAMAÑO DE LA CORREA**, use la pestaña **REFERENCIA CRUZADA DEL TAMAÑO DE LA CORREA** (*en pulg.*)

Las marcas comerciales que se utilizan en esta guía solo son de referencia y son propiedad de sus respectivos dueños.

BELT FAILURE & REPAIR GUIDE

| Problem | Cause | Remedy |
|--|---|--|
| Belt breaking after fitting | Forcing the belt over the pulley when fitting, damaging the cord and cover Contact with foreign objects, ex: a stone while operating | Reduce drive center distance to fit belt Fit an effective guard |
| Cuts and splints in the base of the belt | Outside idler pulley in use Pulley diameter too small Ambient temperature too high (above 158° F / 70° C) Ambient temperature too low (below -40° F / -40° C) Contamination by oil or chemicals Abnormal belt slip | Replace with inside idler pulley on the slack side of the drive. Increase the size of the existing idler pulley Redesign using recommended minimum pulley pitch diameters Ensure good ventilation and protect belts from direct heat Warm area surrounding drive Protect drive from contamination Check the drive design to ensure correct number of belts, redesign if necessary. Check the drive tension. |
| Severe belt vibration | Drive has insufficient belts Center distance longer than recommended High shock loading Belt tension too low Unbalanced pulleys | Check drive design and modify if necessary Shorten centers, use an inside idler in the drive slack side Use an inside idler in the slack side Correct belt tension Balance pulleys |
| Belts turn in pulleys | Poor drive alignment Excessive belt flap Belt tension too low Worn out belt | Realign pulleys Use an inside idler in the slack side Correct belt tension Replace belt |
| Excessive wear on belt flanks | Incorrect pulley groove angle Excessive wear in grooves Drive misalignment Pulley diameter too small | Replace with correct pulley groove angle Replace pulleys Realign Redesign using recommended minimum pulley pitch diameters |
| Belt swelling or softening | Contamination by oil or chemicals | Protect drive from contamination |
| Unusual belt stretch | Worn or wrongly machined pulley grooves Used belts mixed with new belts on the drive | Replace pulleys Replace with a new set of belts |

FALLAS DE LA CORREA Y GUÍA DE REPARACIÓN

| Problema | Causa | Solución |
|--|--|--|
| La correa se rompe después de colocarla | Se fuerza la correa sobre la polea al colocarla, lo que daña el cable y la cubierta Se produjo contacto con objetos extraños, como una piedra, durante el funcionamiento | Reduzca la distancia entre el centro de transmisión y la correa Coloque una protección efectiva |
| Cortes y astillas en la base de la correa | Está en uso la polea loca externa El diámetro de la polea es demasiado pequeño La temperatura ambiente es demasiado alta (por encima de 70 °C/158 °F) La temperatura ambiente es demasiado baja (por debajo de -40 °C/-40 °F) Existe contaminación por aceite o productos químicos El deslizamiento de la correa es anormal | Reemplácela con la polea loca interna en el lado flojo de la transmisión; aumente el tamaño de la polea loca existente Rediséñela con los diámetros mínimos recomendados de paso de polea Asegúrese de que haya buena ventilación y proteja las correas del calor directo Caliente el área alrededor de la transmisión Proteja la transmisión de la contaminación Revise el diseño de la transmisión para asegurarse de que haya la cantidad correcta de correas; rediseñe si es necesario. Revise la tensión de transmisión. |
| La correa vibra mucho | Faltan correas de transmisión La distancia al centro es mayor que la recomendada Hay alta carga de choque La tensión de la correa es demasiado baja Las poleas no están balanceadas | Revise el diseño de la transmisión y haga modificaciones si es necesario Acorte los centros; use una polea loca interna en el lado flojo de la transmisión Use una polea loca interna en el lado flojo de la transmisión Corrija la tensión de la correa Balancee las poleas |
| Las correas giran en las poleas | La transmisión está mal alineada La correa se sacude en exceso La tensión de la correa es demasiado baja La correa está desgastada | Vuelva a alinear las poleas Use una polea loca interna en el lado flojo de la transmisión Corrija la tensión de la correa Sustituya la correa |
| Hay un desgaste excesivo en los laterales de la correa | El ángulo de ranura de la polea es incorrecto Las ranuras tienen un desgaste excesivo La transmisión está mal alineada El diámetro de la polea es demasiado pequeño | Sustituya con el ángulo de ranura de la polea correcto Sustituya las poleas Vuelva a alinear Rediséñela con los diámetros mínimos recomendados de paso de polea |
| Las correas se hinchan o se ablandan | Existe contaminación por aceite o productos químicos | Proteja la transmisión de la contaminación |
| Se observa un estiramiento inusual de la correa | Las ranuras de la polea están desgastadas o mal mecanizadas Se mezclaron correas viejas y nuevas en la transmisión | Sustituya las poleas Sustituya con un juego de correas nuevas |

BELT MEASURING INSTRUCTIONS

KEY

| | |
|-----|-------|
| A: | 1/2IN |
| B: | 5/8IN |
| 3L: | 3/8IN |
| 4L: | 1/2IN |
| 5L: | 5/8IN |

Note: If you're in-between sizes, minor pulley adjustments may be necessary. With this in mind, we recommend sizing down with increments less than 0.5in and sizing up when 0.5in or greater.

1

Place your belt in the upper guide.

2

Place the other end of the belt in the bottom guide and stretch the belt as much as you can by pulling downward.

3

Determine the belt width using the markings on the side of the lower guide. (This example is an "A" Belt)

4

Determine the length by first locating the markings that correspond with the width, then on the left side, in-line with that marking, you'll see the fractional belt number.

5

The left size of the ruler will tell you the belt number and the right side will tell you the belt length. (A63K / 4L650) Locate the Sunbelt belt of that size in the display.

INSTRUCCIONES DE MEDICIÓN DE CORREAS

LLAVE

- A: 12,7 MM (1/2 PULG.)
- B: 15,88 MM (5/8 PULG.)
- 3L: 9,52 MM (3/8 PULG.)
- 4L: 12,7 MM (1/2 PULG.)
- 5L: 15,88 MM (5/8 PULG.)

Nota: Si tiene tamaños intermedios, es posible que deba hacer ajustes menores a la polea. Con esto en mente, recomendamos reducir el tamaño cuando los incrementos sean menores que 0,5 y aumentar el tamaño cuando sean iguales a 0,5 o mayores.

Coloque la correa en la guía superior.

Coloque el otro extremo de la correa en la guía inferior y estire la correa tanto como pueda mientras tira hacia abajo.

Determine el ancho de la correa; para ello, use las marcas que se encuentran en el costado de la guía inferior. (En este ejemplo, se muestra una correa "A").

Determine el largo; para ello, localice primero las marcas que corresponden al ancho; luego, en el lado izquierdo, en línea con esas marcas, verá el número de la correa fraccional.

El tamaño izquierdo de la regla le indicará el número de la correa, mientras que el lado derecho le indicará el largo de la correa. (A63K/4L650) Localice la correa Sunbelt de ese tamaño en la pantalla.
