

# dyson ball

DC  
41

## The strongest suction at the cleaner head.

### No extra costs

Washable lifetime filters and no bags to buy.

### Lightweight and durable

Engineered materials are selected for their strength and durability. Less weight and bulk.

### On-board tool storage

Combination tool stored on machine so it's always on hand.

### Push button bin empty

Just push the button to release the dirt.

### Captures allergens. Expels cleaner air.

Lifetime washable filter.

**Pedal-free automatic recline mechanism**  
Simply recline and go.

**5 year warranty**  
Parts and labor.

### Instant release wand

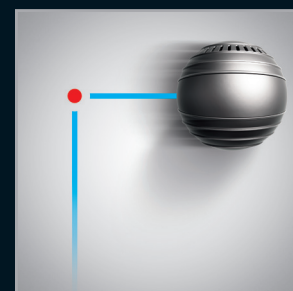

Stretches up to 5 times the length of the handle for stairs and hard to reach places.

### Fingertip controls

To instantly turn the motorized brush bar off for hard floors, delicate floors and rugs.

### No loss of suction

Airflows within Radial Root Cyclone™ technology remodelled to maximize suction power.

### Turns on a dime

Ball™ technology steers smoothly. Easy access to awkward places.

### More suction power than any other at the floor

Optimal cleaner head contact with every floor type, reducing air leaks for more suction power.

### Tools included

### Mini turbine head

Cleans pet hair and dirt from tight spaces, upholstery, stairs and the car.

### Combination tool

Reaches further and softer bristles for improved spot cleaning and gentle dusting.

## animal

Powerful all-around pet hair removal. High performance on carpets, hard floors and upholstery.

SPECIFICATION	animal
Color	Iron/Sprayed purple
Weight (pounds)	17.4
Motor size (watts)	1400
Cord length (feet)	35
Air watts	235
Bin capacity (gallons)	0.55
Maximum reach (feet)	51.7
Pre-motor filter wash cycle	3 months
Post filter wash cycle	3 months
Product code prefix	19668-01
Product dimensions (inches)	42.1(h) x 15.5(w) x 13.4(d)
Box dimensions (inches)	35.8(h) x 9.4(w) x 11(d)
UPC	8799 5700 5372

## No loss of suction

Radial Root Cyclone™ technology has been developed with remodeled airflows to maximize suction power. Improved flow efficiency reduces turbulence and preserves air pressure, so more microscopic particles are extracted by the inner cyclones.

These refinements help remove more dirt, dust, allergens and pet hair from the home.

### Vortex fingers

Guide air from inner cyclones, reducing turbulence and noise.

### Cyclone gaskets

The airtight seals within the cyclone assembly are made from materials designed to maintain high pressure differentials.

### Patented self-inflating seal

Maintains pressure difference in cyclone chambers.

### Inner cyclones

A symmetrical array of smaller cyclones generate centrifugal forces, extracting microscopic particles including mold spores and bacteria.

### Shroud

The design means the outer cyclone captures debris allowing refinement of the inner cyclone to remove fine dust.

Dust and fluff

### Outer cyclone

Dirty air is spun around a vertical axis, generating centrifugal forces that fling larger debris and hair from the airflow into the bin.

Hair and dirt

## Highest suction power at the cleaner head

Many vacuums use fixed settings and don't adjust to different floor types – the bigger the gap, the more suction power is wasted.

DC41 has an active base plate. It creates the optimal cleaner head contact for every floor type, reducing air leaks and retaining more suction power.

### How it works:
