

Carlon® LV

Carlon® Orange Structured Cable Management System

Carlon® structured cable management system (SCMS) is designed for general purpose low voltage residential wire and cable management. This series of boxes and brackets are accompanied by a corrugated conduit system and accessories to future proof your home.

Carlon® Orange Low Voltage Boxes/Brackets

Cable management systems that make installation faster and better.

CUSTOM ELECTRONIC DESIGN & INSTALLATION ASSOCIATION

1. Dual Voltage Box/Bracket

Here's a smart alternative where you would normally use separate high and low voltage boxes. Designed to fit a standard two-gang faceplate, this component combines an electrical box and low voltage bracket into a

single unit for fast, easy installation. No alignment tools are required, and easy nail-on mounting provides precise placement and a professional finished appearance. Resi-Rings accept 3/4" Resi-Gard[®] fittings only. SC200DV

Why waste time mounting, then trying to line up separate high voltage and low voltage boxes, and still end up with something not quite right? Our Dual Voltage Box/Bracket lets you do it all in one fast, easy step with perfect alignment every time.

2. Low Voltage Add-On Bracket

This low voltage bracket provides a low voltage outlet next to a previously installed high voltage outlet. Great for both new construction and rework, it attaches easily to most electrical boxes, and is designed to fit a standard two-gang faceplate. Resi-Rings accept 3/4" Resi-Gard[®] fittings only. SC100SC

Attaching the Add-On Bracket is a "snap." You just remove the back of the double-sided tape (1), clip the bracket in place (2), and press on the bracket to secure it against the box (3). Allows for the installation of most rectangular yoke plates

3. Low Voltage Adjustable Brackets

Our Low Voltage Adjustable Brackets are the perfect solution for tile, paneling, or stucco. A bracket allows for quick, easy stud mounting, and a turn of the screw adjusts to any wall thickness. It's great for retrofit/ installation upgrades. Replace the single-gang bracket with a two-gang bracket, or switch services to a high-voltage Adjust-A-Box[™] devices. SC100ADJC (shown) and SC200ADJC

Our Low Voltage Adjustable Brackets simplify installation with tile, paneling, or stucco to save you time and effort. Just use the quick-mount bracket to clip it to the stud (1), add a screw for extra support if you want it (2), then use the adjustment screw to accommodate wall thickness (3). Also available in a two-gang version.

4. Low Voltage Brackets

Here's the fast installation choice where only low voltage is required. Designed to fit a standard one-, two- or three-gang faceplate, these low voltage brackets feature an easy nail-on mounting or screw-in bracket, while a hard shell provides increased durability and no racking. Resi-Rings accept 3/4", 1", and 1 1/4" Resi-Gard[®] fittings (one-and two-gang versions only). SC100A, SC200A (shown), and SC300A

Our Low Voltage Brackets are open-backed to easily accommodate the bend radii required for low voltage cabling and deep devices such as volume controls, while molded-in ports make it easy to connect flexible raceway for future-proofing. Or you can use them to tie off cable to the bracket. They can also be attached to wood or steel studs.

5. Resi-Gard[®] Flexible Raceway And Fittings

Available in 5 sizes from 3/4" to 2", with factory installed pull tape in sizes 1" to 2", our Resi-Gard[®] Flexible Raceway provides a main

chase from the main distribution panel to a secondary hub in the attic or basement. Ideal for easy access to add cable or service upgrades, or leave empty for future expansion.

Our complete line of quick-connect couplings, adapters, cable clips, conduit clamps, and solvent cement make for quick, easy professional installation of Resi-Gard[®] Flexible Raceway.

6.

Dual Voltage Box/Bracket

For applications where a combined high and low voltage closed back box is needed, such as placement in a fire-rated wall, we offer our Carlton SuperBlue® two-, three-, and four-gang wiring boxes with a slip-in-place divider to give you the split box you need for the low voltage outlet. SCDIV

What could be easier than converting one of our Carlton SuperBlue® boxes for both high and low voltage use? Just slip the divider into place, and you're ready to go. Great for situations requiring a dual voltage fire-rated box.

Recessed Dual Voltage 3-Gang Old Work Plate

7.

The New Carlton RDV 3-Gang Old Work Plate has been developed to simplify today's in-home entertainment/networking needs. The box is designed to accommodate the wires, cables and cords used with flat panel display installations. It features a two-gang low voltage opening and a one-gang opening for an outlet/switch box (boxes, devices, and plates not included). SC300PRB and SC300PRR

The hi-gloss, recessed design eliminates unsightly wires, cables, and cords, and blends with any décor. The RDV Old Work Plate makes installing flat panel displays faster and easier!

8.

Drop-in Floor Box

The Carlton Drop-In Floor Box with Brass Cover combines many of the same features in our existing Floor Box line with the strength, durability

and style necessary to accommodate today's residential electrical/telecommunication needs. The Carlton Drop-In Floor Box is the fastest easiest way for contractors to put a floor socket anywhere they need it! It's designed to accommodate line voltage and low voltage applications E971FBDI-2 and E971FBDIB-2

Drill hole in floor using hole saw. Pull romex through floor. Connect receptacle wires to romex. Brass cover snaps into place. Use a small screwdriver to pry open brass cover to plug in appliance.

For more information about this floor box refer to www.tnb.com or the Thomas & Betts Residential catalog.

Adjust-A-Box™ Floor Box

9.

Carlton Adjust-A-Box™ Floor Boxes make installing floor outlets faster and easy by providing maximum installation flexibility. The box features a patented adjustment screw designed to adjust the box from 0" to 1-3/4" by simply turning the screw clockwise or counterclockwise, providing a flush mount every time.

B234BFBB (brass cover) and B234BFSS (stainless steel)

Install clip over subfloor. Screw in to adjust to height of flooring or carpet. Beautiful flush fit every time!

For more information about this floor box refer to www.tnb.com or the Thomas & Betts Residential catalog.

10.

Old Work Bracket

Carlton Low Voltage Old Work Brackets are specifically designed for the installation of low voltage devices such as cable television, data communications or telephone

jacks in an existing wall. The backless feature provides the space need for the bend radius requirements of coaxial or data/communication cables. It also eliminates the need for metal plates, lags or screws. SC100RR (shown) and SC200RR

Back View

1. Use the holes in the corners to mark the opening.
2. Cut out the drywall.

3. Place box in wall.
4. Secure box to wall.

New Work and Old Work Boxes

Dual Voltage Box/Bracket

- Dual Voltage Capability
- Accepts a two-gang face plate.
- 3/4" Resi-Rings
- Backless Design accommodates large/deep low voltage devices.
- Eliminates cutting the backs off Electrical Boxes.
- Accommodates bend radius requirements for low voltage cabling.
- Provides ample space for installation.

CAT. NO.	SIZE CU. IN.	MOUNTING MEANS	DESCRIPTION	DIMENSIONS (IN.)	STD. CTN. QTY.
• E-18-4-DV	18.0	#4 Swing Brackets	V-clamps, additional tabs for cable mounts	3¾ L x 4 W x 3 D	50
• SB-21-DV	20.5	Molded bracket for wood/steel studs	Additional tabs for cable mounts	3⅝ L x 4 W x 3⅞ D	50
• SC200DV	20.5	Angled side nails	¾" dia. Resi-Ring for Resi-Gard fitting	3.69 L x 4.04 W x 3.67 D	16
• SN-21-DV	20.5	Angled side nails	Additional tabs for cable mounts	3⅝ L x 4 W x 3⅞ D	50

• UL Listed E11461 80°C heat-rated material
Permissible for use with 90°C insulated conductors

Low Voltage Brackets

- Backless Design accommodates large/deep low voltage devices
- Eliminates cutting the backs off Electrical Boxes.
- Accommodates bend radius requirements for low voltage cabling
- Provides ample space for installation
- Mount Flange for steel stud application

One-and two-gang versions only

- Resi-Rings with Concentric Knockouts
- Accepts 3/4", 1", and 1-1/4" Resi-Gard.
- Horizontal Mounting Bracket (one-gang only)
- Breakaway Drywall Support Flange provides easy alignment for 1/2" drywall
- Screw mount option
- Breakaway Vertical Mounting Flange
- Breakaway feature allows the use of the Low Voltage Add-On Bracket

Carlton® LV

New Work and Old Work Boxes

Low Voltage Add-On Bracket

- Dual Voltage Capability accommodates high and low voltage devices in the same box.
- Attaches to virtually any non-metallic electrical box as long as there's a side for the tape to stick to.
- Accepts a two-gang face plate.
- 3/4" Resi-Rings
- Allows for the installation of most rectangular yoke plates

CAT. NO.	SIZE CU. IN.	MOUNTING MEANS	DESCRIPTION	DIMENSIONS (IN.)	STD. CTN. QTY.
• SC100SC	N/A	Tape	1-gang	3.68 L x 2.36 W x 3.10 D	24

• UL Listed E216492 *Not classified for two-hour firewall/fireceiling rating*

Low Voltage Adjustable Brackets

- Accommodates varying finished wall thicknesses – ideal for wood paneling, tile or stucco walls.
- With the turn of a screw, adjust to any wall thickness.
- Steel Mounting Bracket provides a secure mount.
- Backless Design accommodates large/deep low voltage devices.
- Eliminates cutting the backs off Electrical Boxes.
- Accommodates bend radius requirements for low voltage cabling.
- Provides ample space for installation.
- Removable Bracket and Interchangeable Mounting Bracket – upgrade from a one-gang to a two-gang anytime.

CARLON EXCLUSIVE

CAT. NO.	SIZE CU. IN.	MOUNTING MEANS	DESCRIPTION	DIMENSIONS (IN.)	STD. CTN. QTY.

Carlton[®] LV Old Work Box

Recessed Dual Voltage 3-Gang Old Work Plate

Carlton[®] Orange Low Voltage Boxes/Brackets

SC300PRB

The New Carlton RDV 3-Gang Old Work Plate has been developed to simplify today's in-home entertainment/networking needs. The box is designed to accommodate the wires, cables and cords used with flat panel display installations. It features a two-gang low voltage opening and a one-gang opening for an outlet/switch box (boxes, devices, and plates not included). The hi-gloss, recessed design eliminates unsightly wires, cables, and cords, and blends with any décor. The RDV Old Work Plate makes installing flat panel displays faster and easier!

Carlton[®] LV Old Work Box

Features:

- 3-Gang dual service capability: Accommodates (1) line voltage and (2) low voltage services using one plate (boxes, devices, and plates not included)
- Recessed low profile design: Eliminates unsightly wires and plug heads
- Universal 1-gang outlet / switch opening: Select the size box you need
- Pre-assembled box and frame: Reduces labor time and saves money
- Shallow design: Provides ample room behind the dry wall and between the studs, and accommodates cable bend requirements
- 4 Swing out clamps: Locks the plate securely to the wall – horizontal or vertical mount
- Superior hi-gloss, paintable finish: Professional appearance, and blends with any décor
- Non-metallic, ABS material: Lightweight and easy to handle

Installation

Please read these instructions completely before attempting installation.

IMPORTANT! Before attempting installation be sure power is off by removing the fuse or switching the circuit breaker to "off". Make sure the Recessed Dual Voltage plate is installed in accordance with the National Electrical Code (NEC) and local codes.

1. Locate studs and determine if they are 16" or 24" apart. If 16" apart, measure a maximum of 3" from edge of stud to determine plate location. If 24" apart, center plate between studs. Note: High voltage side must be 3" from stud.
2. Place SC300PRB or SC300PRR face down against the wall. Using a hammer, tap around the edge of the plate to mark area to be cut out (Fig. 1). Remove plate from wall, a line should be visible on the dry-wall. Cutout should be 6.25" x 9.25" approximately.
3. Carefully cut out area of drywall with a utility knife or drywall saw.
4. Place SC300PRB or SC300PRR in wall and secure by tightening down all four Zip-Mount retainers (Fig. 2).
5. Select device and outlet/switch box, cat. number B114R (14 cu. in.) or B120R (20 cu. in.), based on wire fill needs (Fig. 3).
6. Insert wires through boxes (B114R or B120R, and SC300PRB or SC300PRR). Make sure high and low voltage wires do not come in contact with one another.
7. Install Carlton Old Work Zip Box[®], model B114R or B120R (Fig. 4).
8. Install receptacle and faceplate per manufacturer's instructions (Fig. 5).
9. Install low voltage devices and faceplate per manufacturer's instructions (Fig. 6 and Fig. 7).

Note: When preparing for later installation of low voltage devices, use a 2 gang blank plate to cover wall opening for a clean finished look.

Resi-Gard[®] Flexible Raceway

Ideal for providing a main chase from the main distribution panel to a secondary hub in the attic or basement, Resi-Gard[®] non-metallic flexible raceway is available in 3/4" to 2" diameter sizes with factory installed pull tape in sizes 1" to 2". The raceway is hand bendable, lightweight and easily cut to length to reduce scrap. Bright orange color clearly signifies a low voltage installation.
