

KNOBS

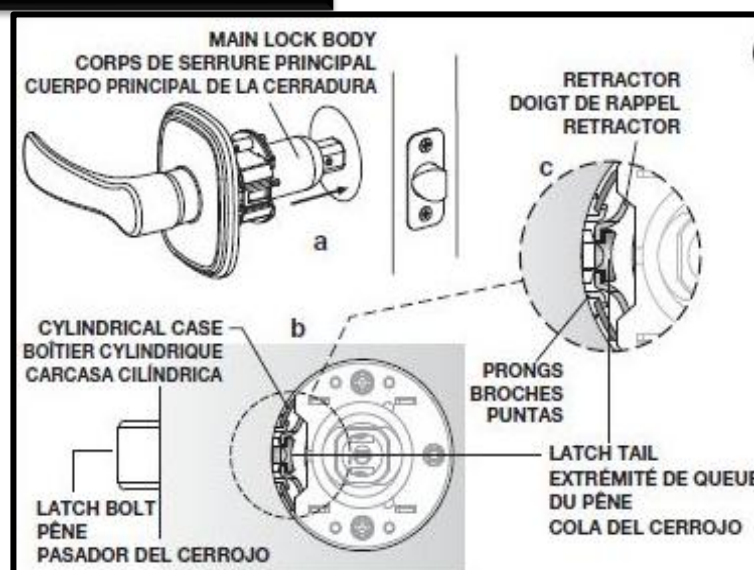

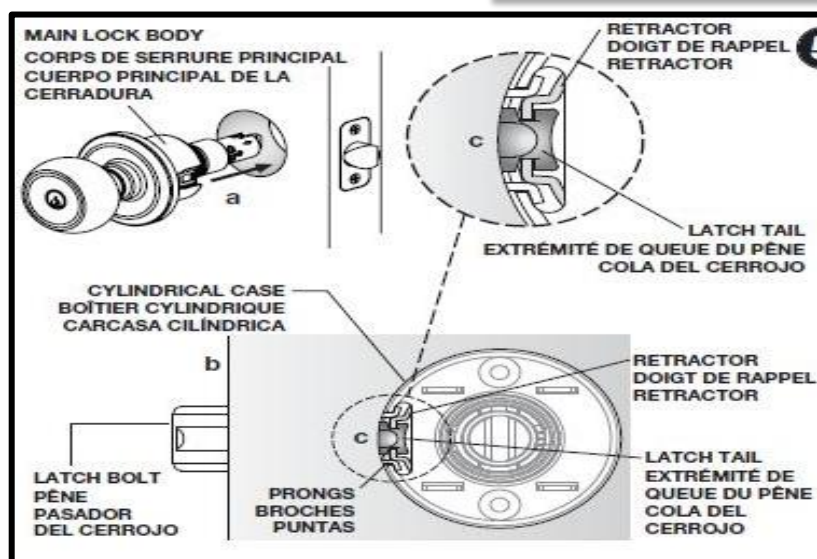

- * Entry knobs are preset for THICK doors (1 3/4")
- * Privacy and Passage knobs are preset for THIN doors (1 3/8")
- * To adjust knobs for door thickness simply turn (threaded) outside rose

LEVERS

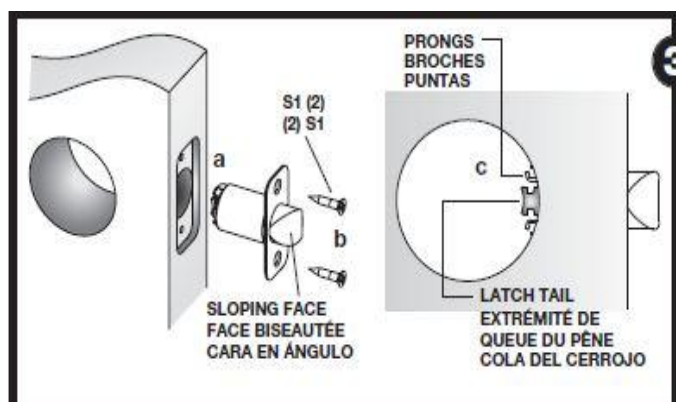

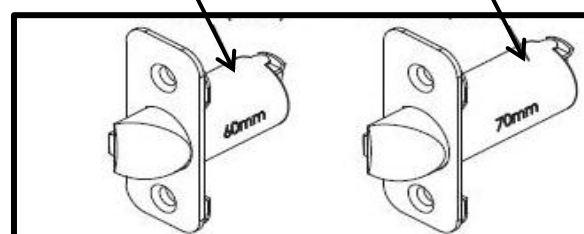

- * Passage levers in the COMBO PACKS are preset for thick doors (1 3/4")
- * Privacy and Passage levers are preset for THIN doors (1 3/8")
- * To adjust levers for door thickness rotate outside screw posts to desired thickness

LATCH INSTALLATION

1) Determine if you need a 2 3/8" or 2 3/4" backset for your latch

2 3/8" Backset (60mm) 2 3/4" Backset (70mm)

- 2) install latch so that the bevel (sloping face) on the latch bolt faces the strike lip
- 3) When installing screws in latch don't tighten screws completely YET
- 4) Adjust the outside rose so that the chassis is centered in the door.
- 5) install the chassis from the outside of the door
- 6) install the inside rose, rose ring, knob and strike plate
- 7) Now tighten down screws on the latch
