INSTALLING WITHOUT MOULDINGS:

1. Pre-drill oversized holes through lattice (drill the largest hole that screw head will allow without fitting through) (Fig. 1). Center each screw in oversized holes and do not overtighten to allow for expansion and contraction of lattice (Fig. 2).

2. Hang the lattice with a screw every 24". Attach sides and bottom loosely. **DO NOT** tighten all the way (Fig. 3).

3. If using more than one panel, do not butt panels together (Fig. 4).

   Leave ¼" gap to allow for expansion and contraction.
INSTALLING WITH CAP & DIVIDER MOULDINGS:

1. Pre-drill oversized holes through lattice and moulding (drill the largest hole that screw head will allow without fitting though) (Fig. 1). Center each screw in oversized holes and do not overtighten to allow for expansion and contraction of lattice (Fig. 2).

2. Along the top, drill and fasten every 24". Drill holes and hang through both moulding and panel (Fig. 3).

3. Along the sides and bottom, drill holes and put screws through moulding only (Fig. 4).

4. Allow a 1/4" gap on all sides for expansion with cap and divider mouldings (Fig. 5).
IMPORTANT THINGS TO REMEMBER:

- If the lattice bows, loosen attaching screws, make sure you have allowed enough gap for expansion and contraction.

- Place screws 24” apart.

- **DO NOT** use for horizontal installation.
