Anti-tipping Hardware

Tip: At least one screw must be directly mounted into a wall stud. Wall anchor is not needed when mounting into a wall stud.

Find ideal location on wall and mark location of each mounting hole.

Using a power drill and a 3/16" drill bit, drill one 3/16" hole on wall.

Note: Make sure not to drill into electrical wiring or plumbing pipes.

Insert Wall Anchor (J) into 3/16" hole. Make sure that wall anchors are flush with wall.

Tip: It may be necessary to use a hammer to gently tap anchors into place.

Attach L Metal Chips (E) in pre-drilled holes on back of Left Rear Support (4) and Right Rear Support (5) using Screws (G).

Attach L Metal Chip (E) to Wall Anchor (J) using Screws (K) and Phillips Screwdriver.

Attach Plastic Straps (F) to L Metal Chips (E) on wall and Tower.

Now your Metal/Glass Sliding-Door Display Cabinet is ready to use!
