6 Align Glide-Frame
Use alignment guide found in parts bag to align glide-frame inside of cabinet.

• Drill 4 starter holes using a 1/8” diameter drill bit.
• The use of a power screwdriver.

7 Check Clearance
Set the assembled under-sink drawer onto glide-frame with mounting holes aligned.
Check for adequate clearance around cabinet, doors and plumbing fixtures.
Adjust glide frame position as needed.

8 Install
Remove assembled drawers from glide-frame.
Move glide rails slightly forward as shown and install glide-frame into cabinet using wood screws found in parts bag.

9 Mount
Set assembled drawers back onto glide-frame, in the desired position (left or right), with the mounting holes in the lower drawer and the glide-frame aligned.

Attach drawers to glide frame using mounting screws.

Only gently tighten.
