NOTES: 1. Before installing, consult local electrical codes for wiring and grounding requirements.  
   2. Read and save these instructions.

Important to Know
1. Read all instructions carefully before installation and operation.
2. If you are not familiar with state and local electrical codes, it is recommended that you consult with a qualified electrician.
3. Before installation, shut off power at the main fuse or circuit breaker box. Be aware that simply turning off the wall switch is not sufficient to prevent an electrical shock.
4. This fixture requires a 120 VAC, 60 Hz power source.
5. Do not attempt to take the lantern apart; there are no serviceable parts inside.

Maximum Wattage: 60W Incandescent Bulb
Work Temperature: - 4°F~104°F

HARDWARE CONTENTS  Note: Hardware not shown actual size.

A  Cross Bar  X1
B  Mounting Screw  X2
C  Headless Screw  X2
D  Wire Connector  X3
E  Lock Nut  X4
F  Ball Nut  X2
G  Rubber Pad  X2
H  Green Grounding Screw  X1
SAFETY INFORMATION

Please read and understand this entire manual before attempting to assemble, operate or install the product.

WARNING

● Turn off electricity at main fuse box (or circuit breaker box) before beginning installation by removing fuse (or switching off circuit breaker).

● Be careful not to damage or cut the wire insulation (covering) during fixture installation. Do not permit wires to contact any surface having a sharp edge. To do so may damage or cut the wire insulation, which could cause serious injury or death from electric shock.

CAUTION

● All electrical connections must be in agreement with local codes, ordinances or the national electric code (NEC). Contact your municipal building department to learn about your local codes, permits and/or inspections.

● Risk of fire – most dwellings built before 1985 have supply wire rated for 140°F/60ºC. Consult a qualified electrician before installation.

● Do not connect this fixture to an electrical system that does not provide a means for equipment grounding. Never use a fixture in a two-wire system that is not grounded. If you are not sure your lighting system has a grounding means, do not attempt to install this fixture. Contact a qualified, licensed electrician for information with regards to proper grounding methods as required by the local electrical code in your area.

PREPARATION

Before beginning assembly, installation or operation of product, make sure all parts are present. Compare parts with package contents list and diagram on previous page. If any part is missing or damaged, do not attempt to assemble, install or operate the product.

ASSEMBLY INSTRUCTIONS

Turn off the power at fuse or circuit box.

1. Thread two headless screws (CC) through the cross bar (AA), and then secure them with four lock nuts (EE) (two on each side of the cross bar (AA). Adjust the length of the headless screws (CC) if necessary.

   Note: Make sure that the Headless screws are lined up horizontally to make the fixture level.

2. Attach cross bar (AA) to outlet box using two mounting screws (BB).

3. Pull out the source wires from the outlet box. Make wire connections using wire connectors (DD) as follows:

   ▪ Connect the hot wire (usually black insulation) from the fixture to the black wire from the power source.
   ▪ Connect the neutral wire (usually white insulation) from the fixture to the white wire from the power source.
   ▪ Attach the fixture grounding wire (usually green insulation or bare wire) to the cross bar (AA) with the green grounding screw (HH), and then connect it to the house grounding wire with the wire connector (DD).

   Carefully put all of the wires back into the outlet box.

4. Screw one end of the threaded pipe into the coupling, secure it with the washer and hex nut. Adjust the length of the threaded pipe by using the hex nut if necessary. Attach the tail and pipe cap through the threaded pipe, then secure them with the finial.
5. Attach the back plate to the cross bar by inserting the headless screws (CC), then secure it with rubber pads (GG) and ball nuts (FF). **CAUTION:** With silicone caulking compound, caulk completely around where the back plate meets with the wall surface to prevent water from seeping into the outlet box.

6. Install a bulb (not included). See relamping label at socket area or packaging for maximum allowed wattage.

7. Unscrew the set screws and rubber pads form fixture. Attach the cover to the main fixture by aligning holes, secure it with two rubber pads and two set screws.

The following parts are available for re-order if damaged or missing. Call our toll free at 800-482-9235.

### CARE AND MAINTENANCE

- To clean, turn off and wipe with a damp, non-abrasive cloth.

### TROUBLESHOOTING

1) **The light does not come on at all:**
   a) Make sure the wall switch and circuit breaker are on.
   b) Make sure the wiring is correct.

2) **Fuse blows or circuit trips when light is turned on.**
   a) Check for crossed wires, ensure wiring is correct.

If unable to fix any of the above issues, please consult a certified electrician.
