WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER BEFORE INSTALLING OR SERVICING THIS FIXTURE.

NOTES: 1. Before installing, consult local electrical codes for wiring and grounding requirements.  
2. Read and save these instructions.

Important to Know
1. Read all instructions carefully before installation and operation.

2. If you are not familiar with state and local electrical codes, it is recommended that you consult with a qualified electrician.

3. Before installation, shut off power at the main fuse or circuit breaker box. Be aware that simply turning off the wall switch is not sufficient to prevent an electrical shock.

4. This fixture requires a 120 VAC, 60 Hz power source.

5. Do not attempt to take the lantern apart; there are no serviceable parts inside.

Maximum Wattage: 60W Incandescent Bulb
Work Temperature: -4°F~104°F

HARDWARE CONTENTS Note: Hardware not shown actual size.

- Cross Bar Unit X1
- Wire Connector X3
- Mounting Screw X2
- Ball Nut X2
SAFETY INFORMATION
Please read and understand this entire manual before attempting to assemble, operate or install the product.

WARNING
● Turn off electricity at main fuse box (or circuit breaker box) before beginning installation by removing fuse (or switching off circuit breaker).

● Be careful not to damage or cut the wire insulation (covering) during fixture installation. Do not permit wires to contact any surface having a sharp edge. To do so may damage or cut the wire insulation, which could cause serious injury or death from electric shock.

CAUTION
● All electrical connections must be in agreement with local codes, ordinances or the national electric code (NEC). Contact your municipal building department to learn about your local codes, permits and/or inspections.

● Risk of fire – most dwellings built before 1985 have supply wire rated for 140°F/60ºC. Consult a qualified electrician before installation.

● Do not connect this fixture to an electrical system that does not provide a means for equipment grounding. Never use a fixture in a two-wire system that is not grounded. If you are not sure your lighting system has a grounding means, do not attempt to install this fixture. Contact a qualified, licensed electrician for information with regards to proper grounding methods as required by the local electrical code in your area.

PREPARATION
Before beginning assembly, installation or operation of product, make sure all parts are present. Compare parts with package contents list and diagram on previous page. If any part is missing or damaged, do not attempt to assemble, install or operate the product. Contact customer service for replacement parts.

ASSEMBLY INSTRUCTIONS
Turn off the power at fuse or circuit box.

1. Attach cross bar unit (AA) to the outlet box using two mounting screws (BB). Adjust the length of the preinstalled fixture headless screws if necessary.
   **Note:** Make sure that the headless screws are lined up horizontally to make the fixture level.

2. Connect fixture black wire to house black wire and fixture white wire to house white wire using wire connectors (CC) provided. Connect the copper wire on the light fixture to the cross bar unit (AA) by securing it with the preinstalled grounding screw, and then connect it to the house grounding wire with the wire connector (CC). Tuck all the wires into outlet box.

3. Attach the back plate to the cross bar (AA): insert the fixture mounting screws (BB) through the two holes, then secure it with two ball nuts (DD).

4. Place the glass shade onto the glass holder, secure it by tightening the socket ring.

- **3:** AA Back Plate, BB Headless Screw, DD Ball Nuts
- **4:** AA Socket Ring, BB Glass Shade, CC Wire Connectors
5. Install 1X60W Max medium base bulb (not included).

Turn on the power at fuse or circuit box.

Note: You can control the light by using Turn Switch / Rotary Switch.

**CARE AND MAINTENANCE**

- To clean, turn off and wipe with a damp, non-abrasive cloth.

**TROUBLESHOOTING**

1) The light does not come on at all:
   a) Make sure the wall switch and circuit breaker are on.
   b) Make sure the wiring is correct.

2) Fuse blows or circuit trips when light is turned on.
   a) Check for crossed wires, ensure wiring is correct.

If unable to fix any of the above issues, please consult a certified electrician.
