Chicago Floating Shelf 10"

Parts List

Please check packaging for all parts and hardware before discarding. Unpack and lay parts on clean, padded surface like carpet or blanket. Check that you have all parts indicated. Call customer service if hardware is missing. Before beginning assembly, carefully study the diagrams below and sort your hardware according to the pictures. Using the incorrect hardware will cause damage.

<p>A Quantity Of 1</p>  <p>Shelf</p>	<p>B Quantity Of 1</p>  <p>Bracket</p>	<p>C Quantity Of 5</p>  <p>Blastic anchor</p>

 <p>Bit $\phi 3/16''$</p>	 <p>Tape measure</p>	 <p>MAX 20lbs capacity</p>

Chicago Floating Shelf 10" Assembly Instructions

Figure 1

Place mounting bracket (**B**) against the wall at the desired location with the arrow pointing up on the.

Use a level on top of bracket to insure bracket is level, then, mark each hole with a pencil.

Remove the bracket.

Tip: If mounting to sheet rock (cavity wall) it is advisable to mount at least one screw (without anchor) directly to a wall stud.

Figure 2

Using a power drill and 1/4" drill bit, drill a hole through the wall at each marked hole location where screw (D) will not hit a stud in the wall. Then insert plastic anchors (C) into each hole and lightly tap anchors (C) with a hammer until they are securely flush with the face of the wall. After the plastic anchors (C) are securely in place, position bracket (B) to be mounted to the wall. Using a philips screwdriver, drive in the screws (D) into plastic anchors (C) until the bracket (B) is securely placed on the wall.

Slide shelf (A) onto the mounting bracket (B) by aligning the two holes on shelf (A) to the poles on bracket (B), making sure the two small holes are pointing down on the bottom of shelf (A).

Figure 3

Insert the two long screws (E) with a screwdriver to secure shelf (A) to bracket (B).

Place level on top to insure product is level.

Now you shelf is ready to use.

Coppell, Texas 75019

CAUTION

Max shelf load capacity is achieved by mounting screw into studs or cement walls.

If mounting to sheet rock (cavity wall) it is advisable to mount at least 1 screw (without anchor) directly to a wall stud. However do not leave either end of mounting bracket unsupported by at least one anchor. For hollow wall mounting you can use any of the holes in the back plate to suit where you require the mounting screws positioned.

Note: Pipe bracket has a built in safety design feature. Pipes have a slight upward angle to prevent floating shelf from sagging when shelf is loaded. Weight ratings are E.D.L. (evenly distributed load)
