WARNING: BE SURE THE ELECTRICITY TO THE WIRES YOU ARE WORKING ON IS SHUT OFF; EITHER THE FUSE REMOVED OR THE CIRCUIT BREAKER SET AT OFF.

GENERAL

You don’t need special tools to install this fixture. Be sure to follow the steps in the order given. Under no circumstances should a fixture be hung on house electrical wires, nor should a swag type fixture be installed on a ceiling which contains a radiant type heating system. Read instructions carefully. If you are unclear as to how to proceed, consult a qualified electrician.

STEP 1:
Carefully remove the fixture from the carton and check that all parts are included, as shown in figure 1 and 2. Be careful not to misplace any of the screws or parts which are needed to install this fixture.

STEP 2:
Place the fixture cup (Z), round nut (Y), and plastic cap (D), in that order onto cord (E) and socket nipple (C). Secure these parts with round nut (Y). Thread on plastic cap (D) finger tight.

NOTE: FIGURE 1 ILLUSTRATES THE INSTALLATION OF YOUR NEW LIGHTING FIXTURE. THIS IS A REPRESENTATIVE DRAWING AND MAY NOT MATCH THE STYLE OF YOUR FIXTURE.

Installation And Safety Instruction

HC-111 092800

Fill In Item Number On Carton And File This Sheet For Fixture Reference. ITEM#__________________
**INSTALLATION HC-111**

**FINAL ASSEMBLY**

**STEP 1:**
Slide plastic cap (F), round nut (Y), canopy (H), hex nut (B), nipple (C) and mounting bar (A), in that order, onto cord (E).

**STEP 2:**
Screw nipple (C) into mounting bar (A), 3 turns, and secure to bar (A) with hex nut (B).

**STEP 3:**
Pull cord (E) through mounting bar (A) to desired length and knot cord (E).

**STEP 4:**
Secure mounting bar (A) to outlet box with outlet box screws (not supplied).

**STEP 5:**
A. Take note of the color of the wire(s) on your fixture. Identify which group your fixture wire(s) falls into and connect the wires according to the directions below:

<table>
<thead>
<tr>
<th>GROUP A: CONNECT TO BLACK HOUSE WIRE</th>
<th>GROUP B: CONNECT TO WHITE HOUSE WIRE</th>
</tr>
</thead>
<tbody>
<tr>
<td>BLACK</td>
<td>WHITE</td>
</tr>
<tr>
<td>*PARALLEL WIRE (ROUND &amp; SMOOTH)</td>
<td>*PARALLEL WIRE (SQUARE &amp; RIGGED)</td>
</tr>
<tr>
<td>WHITE OR GREY WITH TRACER</td>
<td>WHITE OR GREY WITHOUT TRACER</td>
</tr>
<tr>
<td>BROWN, GOLD OR BLACK WITHOUT TRACER</td>
<td>BROWN, GOLD OR BLACK WITH TRACER</td>
</tr>
</tbody>
</table>

*Note: When parallel wire is used, the tracer wire is square shaped or ridged and less tracer wire is round in shape or smooth. (Seen best when viewed from wire end.) To separate wires, grasp the ends of each wire and pull apart.

B. Take your fixture wire(s) from group A and place evenly against the black wire from the outlet box. **DO NOT** twist wires together before using wire connectors.

C. Fit a wire connector (not supplied) over the wires and screw the connector clockwise until you feel a firmness.

D. Try gently to pull the connector off the wires. If you can pull the connector off, carefully re-do steps B and C, as above and check again for a firm connection.

E. Connect the fixture wire from group B to the white wire from the outlet box in the same manner.

**STEP 6:**

**GROUNDING INSTRUCTIONS:** The green grounding screw (R) is to be inserted into the hole with two raised dimples provided on the mounting bar (A). Wrap the ground wire from the fixture (if supplied) and the ground wire from the outlet box (bare metal or green insulated wire) around the green grounding screw (R) on the mounting bar (A) if uninsulated wire is on the mounting bar (A), connect the ground wire from the fixture (if supplied) and the outlet box to it using a small wire connector (not supplied).

**NOTE:** Underwriters Laboratories (U.L.) does not require all fixtures to have ground wires. These fixtures still meet all UL specifications. The listing mark of Underwriters on the product identifies products manufactured under its listing and Follow-Up Service Programs.

**NEVER CONNECT GROUND WIRE TO BLACK OR WHITE POWER SUPPLY WIRES.**

**FINAL ASSEMBLY**

Make sure no bare wires can be seen outside wire connectors.

**STEP 1:**
After wires are connected, tuck them carefully inside outlet box and then raise the canopy (H) against ceiling and secure with round nut (Y), and plastic cap (F).

**STEP 2:**
Install lamp in socket.

**STEP 3:**
Assembly For Fixture With Globe: Unscrew round nut (Y) and plastic cap (D) from fitter (P) to release fixture cup (Z). Place fitter (P) into globe (N). Seat fitter (P) in position, drop fixture cup (Z), and secure with round nut (Y) and plastic cap (D).

**CLEANING**
The white electrical cord on this fixture has printing on it. This information is required to be there by Underwriters Laboratories. If, after you have purchased this product and the presence of this printing is objectionable to you, you may remove it by the following method.

Before wiring your fixture to your power source:

1. Gently wipe the printing with a cloth slightly dampened with either nail polish remover or paint thinner. Do not soak the wire—a slight dampening is enough.

2. After the print is removed, wipe with cloth slightly dampened with fresh water.

3. Proceed to hang fixture as per normal instructions.

To clean, wipe fixture body with a soft cloth. Clean glass with a mild soap. Do not use abrasive materials such as scouring pads or powders, steel wool, or abrasive paper.

**ORDERING PARTS**
Keep this sheet for future reference, and in case you need to order replacement parts. All parts for this fixture can be ordered from place of purchase. Be sure to use exact wording from illustration when ordering parts.
