SAFETY INFORMATION

Please read and understand this entire manual before attempting to assemble, operate, or install the product.

- Before you begin installing the fan, disconnect the power by removing fuses or turning off the circuit breakers.
- Make sure that all electrical connections comply with local codes, ordinances, the National Electrical Code, and ANSI/NFPA 70-199. Hire a qualified electrician or consult a do-it-yourself wiring handbook if you are unfamiliar with installing electrical wiring.
- Make sure the installation site you choose allows a minimum clearance of 7 ft. from the blades to the floor and at least 30 in. from the end of the blades to any obstruction.
- The net weight of this fan is: 14.01 lbs.

DANGER: When using an existing outlet box, make sure the outlet box is securely attached to the building structure and can support the full weight of the fan. Failure to do this can result in serious injury or death. The stability of the outlet box is essential in minimizing wobble and noise in the fan after installation is complete.

WARNING: To avoid personal injury, the use of gloves may be necessary while handling fan parts with sharp edges.

WARNING: Using a full-range dimmer switch to control fan speed will cause a loud humming noise from the fan. To reduce the risk of fire or electric shock, do NOT use a full-range dimmer switch to control the fan speed.

WARNING: To reduce the risk of fire or electric shock, do NOT use this fan with any solid-state speed control device.

WARNING: To reduce the risk of fire, electric shock, or personal injury, mount the fan to an outlet box marked “ACCEPTABLE FOR FAN SUPPORT” and use the mounting screws provided with the outlet box. Most outlet boxes commonly used for the support of lighting fixtures are not acceptable for fan support and may need to be replaced. Consult a qualified electrician if in doubt. Secure the outlet box directly to the building structure. The outlet box and its support must be able to support the moving weight of the fan (at least 35 lbs.).

WARNING: To reduce the risk of fire, electrical shock, or personal injury, wire connectors provided with this fan are designed to accept only one 12-gauge house wire and two lead wires from the fan. If your house wire is larger than 12-gauge or there is more than one house wire to connect to the two fan lead wires, consult an electrician for the proper size wire connectors to use.

WARNING: To reduce the risk of fire, electric shock, or personal injury, do not bend the blade arms when installing them, balancing the blades, or cleaning the fan. Do not insert objects between the rotating fan blades.

WARNING: To reduce the risk of personal injury, use only parts provided with this fan. The use of parts OTHER than those provided with this fan will void the warranty.

SAFETY INFORMATION

CAUTION: Read all instructions and safety information before installing your new fan. Review the accompanying assembly diagrams.

CAUTION: Be sure the outlet box is properly grounded or that a ground (green or bare) wire is present.

CAUTION: Carefully check all screws, bolts and nuts on the fan motor assembly to ensure they are secured.

PREPARATION

Before beginning the assembly of this product, ensure that all parts are present. Compare all parts with the package contents list and hardware contents list. If any part is missing or damaged, do not attempt to assemble the product.

Estimated Assembly Time: 90 minutes

Tools Required for Assembly (not included): Electrical Tape, Phillips Screwdriver, Pliers, Safety Glasses, Step Ladder and Wire Strippers

Helpful Tools (not included): AC Tester Light, Tape Measure, Wiring Handbook and Wire Cutters

INITIAL INSTALLATION

1. Turn off the circuit breakers and the wall switch to the fan supply line leads.

⚠ DANGER: Failure to disconnect the power supply prior to installation may result in serious injury or death.

2. Determine the mounting method to use.

Standard Mounting is best suited for ceilings 8 ft. or higher. For taller ceilings you may want to use a longer downrod (sold separately).

Angle mounting is best suited for angled or vaulted ceilings. A longer downrod is sometimes necessary to ensure proper blade clearance. **Important:** If using the angle mount, check to ensure the ceiling angle is not steeper than 16°.

Flushmount installation is not available for this item.

Closemount installation is more suitable for ceilings lower than 8 ft. high.

3. Ensure that the blades (M) will be at least 30 in. from any obstructions. Also check the downrod (A) length to ensure the blades (M) will be at least 7 ft. above the floor.

INITIAL INSTALLATION

- Loosen all four mounting bracket screws (R), then completely remove the two mounting bracket screws (R) from the round holes of canopy (E). Set aside for later use.

Detach mounting bracket (D) from canopy (E).

- Attach mounting bracket (D) to outlet box (not included) using screws and washers provided with the outlet box.

CAUTION: It is very important you use the proper hardware when installing the mounting bracket (D) as it will support the fan.

- Remove the 10 preassembled motor screws (O) and five preassembled motor blocks from the underside of the motor assembly (I). Discard the motor blocks but save the motor screws (O) for later.

For **Standard or Angle Mounting Instructions**, continue to page 9. For **Closemount Instructions**, proceed to page 11.

STANDARD OR ANGLED MOUNTING INSTRUCTIONS

1. Remove the downrod clip (C) and downrod pin (B) from the downrod (A). Then partially loosen the set screws (P) in the yoke at the top of the motor assembly (I).

2. Insert the downrod (A) through the canopy (E) and yoke cover (K). Feed the wires from the motor assembly (I) through the downrod (A).

3. Slide the downrod (A) into the yoke of the motor assembly (I), align the holes, then re-install the downrod pin (B) and downrod clip (C). Secure with set screws (P) and slide the yoke cover (K) down until it rests on top of the motor assembly (I).

STANDARD OR ANGLED MOUNTING INSTRUCTIONS

4. Depending on the length of downrod you use, you may need to cut the lead wires back to simplify the wiring. If you decide to cut back the lead wires, it is suggested that you do so in the following manner: Take the lead wires and make sure that you have pulled them all the way through the top of the downrod and measure 8 in. of lead wire, and then cut the excess wire off with wire cutters (not included).

5. If you decided to cut back the lead wire in Step 4, strip 1/2 in. of insulation from the end of the white wire. Twist the stripped ends of each strand of wire within the insulation with pliers (not included). Repeat this step for black and blue wires.

Important: If you did not cut back the lead wires in Step 4, Step 5 is not necessary and you may proceed to Step 6.

6. Install the ball end of the downrod (A) into the opening of mounting bracket (D). Align one of the four slots in the downrod with the tab in the mounting bracket (D).

Note: The downrod (A) should not rotate if installed correctly.

! DANGER: Failure to align the slot in the downrod (A) with the tab of the mounting bracket (D) could cause the fan to fall, resulting in serious injury or death. Proceed to the **Wiring** on page 12.

CLOSEMOUNT INSTRUCTIONS

Helpful Hint: The downrod (A), canopy cover (F) and yoke cover (K) are not used in this type of installation.

1. Remove the canopy cover (F) from the bottom of the canopy (E).

2. Remove three Phillips-head closemount screws (Q) from the top of the motor assembly (I). Align the canopy (E) with the holes in the top of the motor assembly (I), then re-install the Phillips-head closemount screws (Q) to secure the canopy (E) to the top of the motor assembly (I).

3. Raise the fan and place the canopy (E) on the hook on the mounting bracket (D), temporarily leaving hands free for the wiring process.

WIRING

⚠ WARNING: To reduce the risk of fire, electrical shock or personal injury, wire connectors provided with this fan are designed to accept only one 12-gauge house wire and two lead wires from the fan. If your house wire is larger than 12-gauge and there is more than one house wire to connect to the two fan lead wires, consult an electrician for the proper size wire connectors to use.

CAUTION: Be sure the outlet box is properly grounded or that a ground (green or bare) wire is present.

1. Connect supply and fan wires according to the diagram and these steps:

- Connect the Green wires from the downrod (A) and the mounting bracket (D) to the Bare/Green (ground) supply wire. **Note:** Closemount installation does not use downrod (A), so there will only be two Green wires to connect.
- Connect the White wire from the fan to the White (neutral) supply wire.
- Connect the Black and Blue wires from the fan to the Black (hot) supply wire.

Secure all wiring connections together with wire connectors (AA).

Note: If a second hot power wire is available from outlet box, connect it to the blue (light power) wire from the fan for separate light and fan control.

Note: The Blue wire is power for light. The Black wire is power for the fan. The White wire is neutral/common. The Green wire is the ground wire. If household supply wires are different colors than referred to above, it is recommended a professional electrician determines the proper wiring.

Hardware Used

AA Wire Connector x 3

2. Wrap electrical tape (not included) around each individual wire connector (AA) down to the wire.
3. Turn the spliced/taped wires upward and gently push the wires and wire connectors into the outlet box.

⚠ WARNING: Ensure no bare wire strands are visible after making connections. Place Green and White wire connections on opposite sides of outlet box from the Black and Blue wire connections.

FINAL INSTALLATION

Note: Closemount installation will not have the downrod (A), yoke cover (K) or canopy cover (F).

1. Align the canopy (E) over the loosened mounting bracket screws (R) preassembled on mounting bracket (D). Place the keyholes of the canopy (E) onto the mounting bracket screws (R) and rotate the canopy (E) clockwise.

2. Secure the canopy (E) with the mounting bracket screws (R) previously removed (Step 4, page 8). Tighten all mounting bracket screws (R) securely.

FINAL INSTALLATION

- Partially insert three blade screws (BB) along with three blade washers (CC) through one blade (M) and into one blade arm (L). Tighten each blade screw (BB) with a Phillips screwdriver (not included), starting with the one in the middle. Repeat this step for the remaining blades (M) and blade arms (L).

Hardware Used

| | | | |
|-----------|--------------|---|------|
| BB | Blade Screw |  | x 15 |
| CC | Blade Washer |  | x 15 |

- Install the blade arm (L) to the underside of the motor assembly (I) with motor screws (O) previously removed (Step 6, page 8). Tighten with Phillips screwdriver (not included).

Repeat for each blade arm (L).

- Remove the fitter plate screws (S) preassembled to the fitter plate (J). Then, connect the 9-pin connectors from the fitter plate (J) and the light kit (G).

FINAL INSTALLATION

6. Assemble the light kit (G) to the fitter plate (J) using the previously removed fitter plate screws (S).

7. Screw the twist-on glass shades (H) onto the sockets of the light kit (G).

8. Install bulbs (N) into the sockets of the light kit (G).
Important: Make sure to allow the bulbs (N) and light kit (G) to cool before you replace the bulbs.

FINAL INSTALLATION

9. Attach the pull chain extensions (DD) or custom pull chain extensions (not included) to the fan and light pull chains.

Hardware Used

DD Pull Chain Extensions

x 2

10. Turn on power supply to the fan.

Assembly is complete.

OPERATING INSTRUCTIONS

1. The fan pull chain has four positions to control the fan speed. One pull is HIGH, two is MEDIUM, three is LOW, and four turns the fan OFF. The pull chain in the center of the light kit (G) turns the lights ON and OFF.

2. Using a ceiling fan will allow you to raise your thermostat setting in summer and lower your thermostat setting in winter without feeling a difference in your comfort. **Note:** Wait for the fan to stop before moving the reverse switch located on the light kit (G).

In warmer weather, push the reverse switch left to display a sun icon, which will result in downward airflow creating a wind chill effect (Fig. 2a).

In cooler weather, push the reverse switch right to display a snowflake icon, which will result in upward airflow that can help move hot air off the ceiling area (Fig. 2b).

Important: The reverse switch must be set either completely left or right in order for the fan to function correctly. If the reverse switch is set in the middle position, the fan will not operate (Fig. 2c).

CARE AND MAINTENANCE

At least twice each year, lower the canopy to check the downrod assembly, and then tighten all screws on the fan. Clean the motor housing with only a soft brush or lint-free cloth to avoid scratching the finish. Clean the blades with a lint-free cloth.

Bulb Replacement: Use 60-watt max. candelabra-base bulbs, LED or CFL equivalent.

Important: Shut off the main power supply before you begin any maintenance task. Do not use water or a damp cloth to clean the fan.

TROUBLESHOOTING

| PROBLEM | POSSIBLE CAUSE | CORRECTIVE ACTION |
|------------------------------|---|--|
| The fan does not move. | <ol style="list-style-type: none">1. The reverse switch is not engaged.2. The wall switch is turned off.3. The power is off or the fuse (breaker) is blown.4. There is a faulty wire connection. | <ol style="list-style-type: none">1. Firmly push the reverse switch to either the left or right.2. Make sure the wall switch is turned on.3. Turn the power on or check the fuse (breaker).4. Turn the power off and check all connections at the ceiling outlet box. |
| The fan is noisy. | <ol style="list-style-type: none">1. The blades are loose.2. There is a cracked blade.3. The wall control is not compatible with the fan.4. The outlet box is not secure.5. The mounting bracket is not secure. | <ol style="list-style-type: none">1. Check and tighten all screws that hold the fan blades to the blade arms and the motor.2. Replace the cracked blade.3. Do not use a full range dimmer switch to control the fan speed.4. Ensure the outlet box is secured to the building structure.5. Ensure the mounting bracket is secured to the outlet box and that the screws are tight. |
| There is excessive wobbling. | <ol style="list-style-type: none">1. The blades and/or blade are loose.2. The blades are unbalanced.3. The fan mounting is not secure.4. The fan is too close to the vaulted ceiling.5. The set screw on the motor housing yoke is loose. | <ol style="list-style-type: none">1. Check and tighten all screws that hold the fan blades to the blade arms and the blade arms to the motor.2. Switch one blade with a blade from the opposite side. Or balance the fan using a blade balancing kit (sold separately).3. Turn off the power. Loosen the canopy and verify that the mounting bracket is secure to the electrical outlet box. The bracket must be flush without movement against the outlet box.4. Use a longer downrod or move the fan to another location.5. Lift up the yoke cover and tighten the set screw to the yoke until secure. |

TROUBLESHOOTING

| PROBLEM | POSSIBLE CAUSE | CORRECTIVE ACTION |
|---|---|--|
| The fan operates correctly, but the lights are not working (if applicable). | <ol style="list-style-type: none">1. The bulb(s) not installed correctly.2. The light kit wire plugs are not connected properly.3. There is a faulty wire connection.4. The total power of the light is exceeding 190 W. | <ol style="list-style-type: none">1. Re-install the bulb(s).2. Ensure that the male and female plugs in the light kit fitter are connected properly.3. Turn the power off and check all connections at the ceiling outlet box.4. The fan comes with a 190 W limiter. When the total watts of the lights is over 190 W, the lights do not work. Please replace the bulbs with lower-wattage bulbs. |

LIMITED LIFETIME WARRANTY

The manufacturer warrants this fan to be free from defects in workmanship and materials present at time of shipment from the factory for a lifetime from the date of purchase by the original purchaser. The retailer also warrants that all other fan parts, excluding any glass or plexiglass blades, to be free from defects in workmanship and material at the time of shipment from the factory for a period of one year after the date of purchase by the original purchaser. The manufacturer agrees to correct such defects without charge or at its option replace the ceiling fan with a comparable or superior model.

To obtain warranty service, present a copy of the receipt as proof of purchase. All costs of removing and reinstalling the product are your responsibility. Any damage to any part such as by accident or misuse or improper installation or by affixing any accessories, is not covered by this warranty. The manufacturer assumes no responsibility whatsoever for fan installation during the limited lifetime warranty. Any service performed by an unauthorized person will render the warranty invalid.

Due to varying climate conditions, this warranty does not cover any changes in brass finish, including rusting, pitting, corroding, tarnishing or peeling. Brass finishes of this type give their longest useful life when protected from varying weather conditions. Any glass provided with this fan is not covered by the warranty.

Any replacement of defective parts for the ceiling fan must be reported within the first year from the date of purchase. For the balance of the warranty, call our customer service department for return authorization and shipping instructions so that we may repair or replace the ceiling fan. Any fan or parts returned improperly is the sole responsibility of the purchaser. There is no other expressed warranty. The manufacturer disclaims any and all warranties. The duration of any implied warranty which cannot be disclaimed is limited to the time period as specified in the expressed warranty. The manufacturer shall not be liable for incidental, consequential, or special damages arising out of or in connection with product use or performance except as may otherwise be accorded by law. This warranty gives specific legal rights, and you may also have other rights which vary from state to state.

This warranty supersedes all prior warranties.

Note: A small amount of “wobble” is normal and should not be considered a defect.

REPLACEMENT PARTS LIST

For replacement parts, call the customer service department at 1-800-643-0067, 8 a.m. - 6 p.m., EST, Monday - Thursday, 8 a.m. - 5 p.m., EST, Friday.
