

1. Determine where the center of the top edge of the mirror will be located and mark on the wall.

2. Measure down 6.3" from the top marking and have a second marking on the wall, where draw a 6" horizontal line with the help of a level. (if hanging horizontally, measure down 3.5" from the top)

3. Place the mounting clip on the line and mark the location for the screw holes.

4. Pre-drill at the markings of two screw holes and tap anchors in place with hammer.

5. Install the 6" clip with the gap facing up and secure with screws.

6. Carefully place the mirror by attaching the mounting plate onto the installed wall clip.
