

# TEXAS NATIVE®

100% Organic  
Premium Compost

## Uses and application rates of Texas Native® Organic Compost for Soil improvement

USE	COMPOST	INSTRUCTIONS
	<i>Inches to apply</i>	
<b><u>Landscaping and Turf Management:</u></b>		
Establishment	2" – 3"	Mix with top 5" – 7" of soil. Use lower rate on fertile soils; higher rate on infertile soils.
Maintenance	1/4" – 1/2"	Spread evenly on turf surface. For cool season grasses, apply in the fall; for warm season grasses apply in the spring.
<b><u>Nursery Crop &amp; Ornamentals</u></b>		
Establishment	2/3" – 3"	Mix with top 6" – 8" of existing soil. Do not use where acidic soil plants such as azalea, rhododendron, hydrangea, etc. are to be grown.
Maintenance	1/4" – 1"	Spread evenly on existing soil surface. Can be mixed into soil or used as a topdressing.
Potting Soil Mixes	20% to 50% by volume.	Blend with peat, sand, perlite, vermiculite, bark and/or other materials. Do not use more than 50% by volume.

### **HOW TO CALCULATE THE NUMBER OF CUBIC YARDS NEEDED:**

Area length (ft.) x width (ft.) x depth (in.) ÷ 324 = cubic yards needed
