- A)** Position the first **EasyIvy**[®] tile at the corner/edge of chain link fence; secure to fence top and side edges with UV Plastic Zip Ties.
- B)** Place the next **EasyIvy**[®] tile snugly against first one, leaving no space between them; secure it with the zip ties.
- C)** Continue to align to top and/or side edges of fence or to newly attached **EasyIvy**[®] tiles, as needed to cover entire fence, and secure with zip ties as you go.

#1: Installation On Chain Link Fence

- A)** Clearly mark the project area with chalk lines or strings.
- B)** Position the first **EasyIvy**[®] tile starting at a corner of the wall, carefully aligning the top and side edges. Make sure that the tile lies flat and evenly against the wall; then secure with Concrete Screws using the Power Drill/ Screwdriver.
- C)** Place next **EasyIvy**[®] tile snugly against first one, leaving no space between them; secure it with the concrete screws.
- D)** Continue aligning and securing the **EasyIvy**[®] tiles as you go until all the desired area is covered.

#2: Installation On Concrete Wall

- A)** Measure and mark the project area; trim the trellis/lattice accordingly.
- B)** Position the green vinyl trellis/lattice panels with minimum 2-inch concrete screws at 2-foot intervals; cover the desired area, making sure lattice panels fit snugly against each other and lay flat against the wall.
- C)** Position the first **EasyIvy**[®] tile starting at a corner of the trellis/lattice, carefully aligning the top and side edges. Make sure that the tile lies flat and evenly on the lattice; then secure with T50 Heavy Duty Staples using the Stapling Gun, at 6-inch intervals.
- D)** Continue aligning and securing the **EasyIvy**[®] tiles with staples every 6 inches as you go.

#3: Installation On Trellis & On Wall

- A)** Position the first **EasyIvy**[®] tile starting at a corner/edge of the fence, carefully aligning the top and side edges; then secure with T50 Heavy Duty Staples every 6 inches using the Stapling Gun.
- B)** Place the next **EasyIvy**[®] tile snugly against first one, leaving no space between them; secure it with the heavy duty staples.
- C)** Continue to align to top and/or side edges of fence or to newly attached **EasyIvy**[®] tiles, as needed to cover entire fence, and secure with staples every 6 inches as you go.

#4: Installation On Wooden Fence

5: Installation On Indoor Wall

Installation on an interior wall (on drywall) can be done in two ways:

- A) By attaching the EasyIvy® files DIRECTLY ONTO THE WALL, as in Option #2; use T50 Heavy Duty Staples with the Stapling Gun, at 6-inch intervals; **or**
- B) By first securing a lattice/trellis onto the desired area on the indoor wall and then attaching the next EasyIvy® files onto the lattice, as in Option #3.

EASYIVY® can be installed anywhere... and everywhere!

1. Exterior façade/entrance, private residence
2. Poolside bar, The Gale Hotel
3. Interior wall, La Veinte Brickell
4. Carport and garage wall, private residence
5. Artificial "living" ivy wall, Perricone's
6. Gate and hedge, private residence
