Preparation

1. After opening all boxes and packages, read this introduction carefully. Check that all of the needed parts are included in the package by marking all the components on the "Detailed Diagram of Shower Door Components". Examine boxes and packages for shipping damage. If the unit has been damaged, has a finishing defect, or has missing parts, please contact our customer support department within 5 business days of the delivery date. Please note that **DreamLine™ will not replace any damaged products or missing parts free of charge after 5 business days or if the product has been installed.** Feel free to contact DreamLine™ if you have any questions.
2. **Please note that you should consult your local building codes with questions on installation compliance standards. Building and plumbing codes may vary by location, and DreamLine is not responsible for code compliance standards for your project and will not accept any returns.**
3. Please ensure that prior to the installation the installation surface is leveled and solid and will be able to support the total weight of the unit. Also make sure the walls are at right angles. Irregular installation surface level or improper angle of side walls will result in serious problems for your installation. Please, note that some adjustments and drilling might be necessary during the installation process.
4. This unit has to be installed against a finished floor and walls.
5. **Please, NOTE! This door has 3/8" out-of-plumb adjustment on each side. Make sure your walls are at right angles.**

See Fig. 1 for details.

Enclosure assembly measurements:

Model No.	W1	W2
SHEN-GL1101-343410	33 5/8"	33 5/8"
SHEN-GL1101-324610	31 5/8"	45 5/8"

2. Mark the drilling holes on the wall through the predrilled holes in the **Wall profile (01)** and drill the holes in the wall using $\text{Ø } 5/16''$ drill bit and insert the **Wall anchor (15)**.
Run a silicone bead along the holes and around the holes on the wall.
Attach the **Wall profile** to the wall using **Big head screw ST4.2×40 (12)**.

NOTE: The small holes on the **Return glass panel** should be away from the wall.

NOTE: If you have difficulty sliding the Glass profile over the Stationary glass, you can slightly tap on the Glass profile with a rubber mallet and a piece of wood. Please do not strike directly on the profile or on the edge of the glass panel.

See Fig. 3 & 4 for details.

Place the **Decorative washer** between the **Hex socket bolts M8×25** and the **Glass panels**.

See Fig. 6 for details.

Fig. 6

6. After final adjustments of both **Glass panels**, drill six holes, three on each side, through the predrilled holes in the **Wall profiles (01)** into the first layer of the **Glass profiles (02)** using $\varnothing 1/8''$ drill bit.

Maintenance

To insure long lasting life for your acrylic back walls, wipe them off after each use with a soft cloth. To clean the acrylic back walls use non-abrasive sprays or cream based cleaners. Never use abrasive cleansers, metal brushes or scrapers that could scratch or dull the surface.

To insure long lasting life for your glass shower products, wipe them off after each use with a soft cloth. Rinse and wipe of the glass using either soft cloth or squeegee to prevent soap buildup. Never use abrasive cleaners and cleaning products that contain scoring agent because this may scratch the surface. Never use bristle brushes or abrasive sponges.

To assure a long lasting finish wipe off the metal parts after each use with a soft cloth. Do not use abrasive cleaners or cleaning products containing ammonia, bleach or acid. If accidentally used, rinse the surface as soon as possible to prevent finish peeling or corrosion. After cleaning the shiny finishes, rinse thoroughly and wipe dry with soft cloth. Clean stainless steel surfaces at least once a week. When applying stainless steel cleaner or polish, work with (not across) the grain. Never use abrasive sponge or cloth, steel wool or wired brushes.
