**Assembly Instructions**

**Fig. 1**

STEP 1 Insert Axle through Axle Slot on Cart Body. Once the Axle is through the hole, slide an one 3/4" x 2" Flat Washer(7) then the Axle Tube Spacer(44), then slide the Axle through to the end of the Axle Tube Spacer. Add another 3/4" x 2" Flat Washer (inside of the Sprayer Cart body) and push the Axle through the other hole on the Cart Body. Once the Axle is through the second hole, slide on a 3/4" ID x 2" Flat Washer(7). (Fig.2). Now slide on a wheel followed by a 3/4" Flat Washer(8) and then secure with a Cotter Pin(9). Repeat this for both Wheels. Use Needle Nose Pliers to bend back ends of the Cotter Pin. (Fig.3). Repeat for other side. Use 5/16" x 3/4" Hex Head Bolts(2), 5/16" Flat Washers(6), 5/16" Lock Washers(5), and 5/16" Hex Head Nuts(6) attach Clevis, (42),on topside of Cart Body) to the Cart Body (Fig.4). Tighten Bolts with 1/2" wrenches. Insert Clevis Pin(5) through Clevis and secure with #14 Hitch Pin Clip(3) underneath Cart Body.

STEP 2 Attach Boom Mount to Cart Body using 5/16" x 3/4" Hex Head Bolts(2), 5/16" Flat Washers(4), 5/16" Lock Washers(5) and 5/16" Hex Head Nuts(6). Attach Boom Arm Assembly to Boom Mount using 5/16" x 3/4" Hex Head Bolts(2), 5/16" Flat Washers(4), 5/16" Lock Washers(5) and 5/16" Hex Head Nuts(6). Tighten all four Bolts with the 1/2" wrenches.

Cleaning & Storage

Most spray materials are highly corrosive. The most important aspect of long dependable service from the sprayer is a thorough cleaning immediately following each use. In addition, the residue of one type of chemical could cause an undesirable effect when a different chemical is used for a different purpose.

The most effective cleaning method is to pump several rinses of clean water through the tank, pump, hoses, boom, spray gun, etc. A neutralizing agent such as a solution of Nutra-Sol, a detergent or household ammonia as recommended by the chemical manufacturer can assist in removal of a persistent chemical. When the system is thoroughly cleaned drain the tank, suction line, pump, hoses, etc. The following steps should be followed for the maintenance and storage of your sprayer.

1. Wash and flush out sprayer after completion of each phase of your program. Flush out sprayer when changing chemicals if there is a possibility of the chemicals being incompatible. Use of a detergent is advisable if the chemical manufacturer does not make specific cleaning recommendations. Flush system completely, including nozzles. Never use metal objects to open clogged nozzles.

2. Clean sprayer thoroughly before storing at the end of the spraying season. Permanent type anti-freeze added to the final rinse will leave a rust inhibiting film in parts of the sprayer.

Sprayer Maintenance

A sprayer is a carefully designed and built machine that should provide many years of reliable service if properly cared for. The main rule in caring for any sprayer is: **KEEP IT CLEAN.** Neglect costs dollars in repairs, wasted spray material and premature replacement of the sprayer.

**IMPORTANT:** Before spraying chemicals, fill the tank full of plain water to allow familiarization with the sprayer and to prevent waste of expensive chemicals.
