GROHE
ENJOY WATER®

GROHE MINTA TOUCH SIMPLE SENSUAL MOVING

Fall in love with the GROHE Minta Touch. With its innovative EasyTouch technology, it intuitively reacts to your touch.

Dirty hands don't mean kitchen fittings should be too. One touch with the back of your hand or wrist is all it takes to turn the faucet ON or OFF. The GROHE Minta Touch stays clean, hygienic and radiant in StarLight® Chrome or elegant in SuperSteel InfinityFinish®.

Use the lever to precisely adjust water flow and temperature. The GROHE Minta Touch is simple, sensual, moving – a faucet that intelligently helps keep your kitchen looking beautiful.

Just touch the faucet anywhere on the spout or body to turn water ON or OFF. EasyTouch function works even when the lever is manually in the OFF position.

Use the lever to adjust temperature and water flow.

GROHE MINTA TOUCH CLEAN KITCHEN SURFACES AROUND THE CLOCK

Fight dirt and germs. Our innovative EasyTouch technology is a clean solution. Thanks to GROHE Minta Touch, you can take everyday situations in stride. From cutting up chicken and meat to washing up fresh fruits and vegetables, regardless of how many helping hands there are – your kitchen stays clean around the clock.

Scan here with your smart device to see how it works.

CLEAN AND HYGIENIC

Your faucet stays clean when your hands are not. Start the faucet with a wrist or back of the hand.

EASY-TO-USE

Just touch the spout or body to turn the faucet ON or OFF.

FUSION OF DESIGN AND TECHNOLOGY

Outstanding design, technology and function are perfectly aligned.

SAFE FOR CHILDREN

No risk of scalding. The EasyTouch function provides cold water. Adjust water flow and temperature by using the lever.

GROHE MINTA TOUCH FREQUENTLY ASKED QUESTIONS

Is the Minta Touch technology battery-operated or hard-wired?	The Minta Touch is battery-operated.
How often must the battery be changed?	This depends on how often you use the GROHE Minta Touch. The battery is very durable and can last from 2-4 years.
How can I tell when the battery needs replacing?	Approx. 6 weeks before, the water flow will pulsate three times. When the battery is completely empty or depleted, the EasyTouch feature will no longer function. However, the faucet is still functional. Just use the manual lever.
Can I still use the faucet if the battery is completely empty?	Use the mechanical lever to turn the faucet ON or OFF as well as to adjust water flow and temperature.
How can I regulate the temperature and the water flow?	This can be done by using the mechanical lever function.
What temperature and water flow intensity can I expect with the EasyTouch function?	The EasyTouch function activates cold water flow at 1.75 gpm. Waterflow and temperature can be changed by operating the lever.
Can I also activate the EasyTouch function with clothing for example?	No. Minta Touch reacts only to skin contact. However, moist dishcloths which are held near the base or spout activate the EasyTouch function.
How do I clean the faucet?	Quite simply – with a dry cloth. Rubber gloves will not activate the EasyTouch function.
Does the faucet also work under extreme climatic conditions?	Certainly. Even at temperatures up to 104°F and air humidity of up to 80% the GROHE Minta Touch remains perfectly and technically functional.
