

Description

The Pro-Halogen Series of undercabinet lighting is a specification grade modular system that delivers the best color rendering and maximum light output from the whitest light source, halogen lamps. The efficient operation of low voltage lamps, combined with a unique housing/reflector system, reduces mounting surface temperatures to be comparable with xenon fixtures, but with the superior light quality of halogen. Pro-Halogen fixtures are optimized for fast, permanent installation, mounting either flush to the backsplash or to the front lip of cabinetry to suit project conditions and homeowner preference.

Features

- Bright white 12-volt halogen lamp for maximum efficiency and best color rendition
- Extended 6,000 hour 20W bi-pin lamp life
- Slim 1" profile
- Modular system for installation flexibility
- 5-minute direct wire installation through rear access cover with push-in connectors
- Captive external screws for quick mounting
- Multiple, easy-to-remove knockouts and feed-through wiring capability
- Prismatic clear glass hinged lens for even light distribution, maximum light transmission and simplified re-lamping
- Integral 12-volt electronic transformer
- Dimmable using fixture-mounted high/low/off rocker switch or wall-mounted dimmers
- Designed to maintain cabinet contact temperature below 60° C
- Available in Black, Brushed Bronze, Brushed Silver and Designer White finishes
