

Making Quality Roofing Felt Since 1984

**United Roofing Mfg.** PRODUCTS

# Use & Care

**30 Lb. Felt Quality Roof Deck Protection**

**Lowe's Item 10308**

## **Storage/Care:**

**We recommend that the rolls be kept in a dry area out of the weather. If you are applying the felt in cold weather, we recommend storing it in a warm place at least 24 hours before applying to roof.**

## **Application/Use:**

**Organic felt is an underlayment and moisture barrier between the primary roof (for example asphalt shingles) and the roof decking. It is not intended to be a primary roof. We recommend that the primary roof be installed immediately after the application of the felt.**
