NOTE:

- Reviewing the section on troubleshooting Tips will help you solve some common problems by yourself.
- If you cannot solve the problems by yourself, please ask for help from a professional technician.
- The manufacturer, following a policy of constant development and updating of the product, may make modifications without giving prior notice.
- If lost or out-of-date, you can receive a new user manual from the manufacturer or responsible vendor.
SAFETY INFORMATION

⚠️ WARNING

When using your dishwasher, follow the precautions listed below:

- Installation and repair can only be carried out by a qualified technician.
- This appliance is intended to be used in household and similar applications such as:
  - staff kitchen areas in shops, offices and other working environments;
  - farm houses;
  - by clients in hotels, motels and other residential type environments;
  - bed and breakfast type environments.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- Children shall not play with the appliance. Cleaning and user maintenance shall not be done by children without supervision.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Packaging material could be dangerous for children!
- This appliance is for indoor household use only.
- To protect against the risk of electrical shock, do not immerse the unit, cord or plug in water or other liquid.
- Please unplug before cleaning and performing maintenance on the appliance.
- Use a soft cloth moistened with mild soap, and then use a dry cloth to wipe it again.

Earthing Instructions

- This appliance must be earthed. In the event of a malfunction or breakdown, earthing will reduce the risk of an electric shock by providing a path of least resistance of electric current. This appliance is equipped with an earthing conductor plug.
• The plug must be plugged into an appropriate outlet that is installed and earthed in accordance with all local codes and ordinances.
• Improper connection of the equipment-earthing conductor can result in the risk of an electric shock.
• Check with a qualified electrician or service representative if you are in doubt whether the appliance is properly grounded.
• Do not modify the plug provided with the appliance; If it does not fit the outlet. Have a proper outlet installed by a qualified electrician.
• Do not abuse, sit on, or stand on the door or dish rack of the dishwasher.
• Do not operate your dishwasher unless all enclosure panels are properly in place.
• Open the door very carefully if the dishwasher is operating, there is a risk of water squirting out.
• Do not place any heavy objects on or stand on the door when it is open. The appliance could tip forward.
• When loading items to be washed:
  1) Locate sharp items so that they are not likely to damage the door seal;
  2) Warning: Knives and other utensils with sharp points must be loaded in the basket with their points facing down or placed in a horizontal position.
• Some dishwasher detergents are strongly alkaline. They can be extremely dangerous if swallowed. Avoid contact with the skin and eyes and keep children away from the dishwasher when the door is open.
• Check that the detergent powder is empty after completion of the wash cycle.
• Do not wash plastic items unless they are marked “dishwasher safe” or the equivalent.
• For unmarked plastic items not so marked, check the manufacturer’s recommendations.
• Use only detergent and rinse agents recommended for use in an automatic dishwasher.
• Never use soap, laundry detergent, or hand washing detergent in your dishwasher.
• The door should not be left open, since this could increase the risk of tripping.
• If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.
• During installation, the power supply must not be excessively or dangerously bent or flattened.
• Do not tamper with controls.
- The appliance needs to be connected to the main water valve using new hose sets. Old sets should not be reused.
- To save energy, in stand by mode, the appliance will switch off automatically while there is no any operation in 30 minutes.

**Disposal**

- For disposing of package and the appliance please go to a recycling center. Therefore cut off the power supply cable and make the door closing device unusable.
- Cardboard packaging is manufactured from recycled paper and should be disposed in the waste paper collection for recycling.
- By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.
- For more detailed information about recycling of this product, please contact your local city office and your household waste disposal service.
- **DISPOSAL: Do not dispose this product as unsorted municipal waste.** Collection of such waste separately for special treatment is necessary.
PRODUCT OVERVIEW

**IMPORTANT:**
To get the best performance from your dishwasher, read all operating instructions before using it for the first time.

**NOTE:**
Pictures are only for reference, different models may be different.
INSTALLATION INSTRUCTION

⚠️ WARNING

Electrical Shock Hazard
Disconnect electrical power before installing dishwasher.
Failure to do so could result in death or electrical shock.

⚠️ Attention
The installation of the pipes and electrical equipments should be done by professionals.

About Power Connection

⚠️ WARNING

For personal safety:
- Do not use an extension cord or an adapter plug with this appliance.
- Do not, under any circumstances, cut or remove the earthing connection from the power cord.

Electrical requirements

Please look at the rating label to know the rating voltage and connect the dishwasher to the appropriate power supply. Use the required fuse 10A, time delay fuse or circuit breaker recommended and provide separate circuit serving only this appliance.

Electrical connection

Ensure the voltage and frequency of the power socket corresponds to those on the rating plate. Only insert the plug into an electrical socket which is earthed properly. If the electrical socket to which the appliance must be connected is not appropriate for the plug, replace the socket, rather than using a adaptors or the like as they could cause overheating and burns.

⚠️ Ensure that proper earthing exists before use.
Position The Appliance

Position the appliance in the desired location. The back should rest against the wall behind it, and the sides, along the adjacent cabinets or walls. The dishwasher is equipped with water supply and drain hoses that can be positioned either to the right or the left sides to facilitate proper installation.

Water Supply

Connect the unicouple to the faucet

Attach the unicouple to the faucet adapter following the three steps below:
1. Depress the locking collar at the top of the unicouple.
2. Place the unicouple completely over the faucet adapter.
3. Release the locking collar. The unicouple should now be locked onto the faucet adapter.

Remove unicouple from faucet

1. Turn off hot water.
2. Relieve water pressure from the unicouple assembly before disconnecting it from the faucet by depressing the red pressure relief button on the unicouple.
3. Depress the locking collar and remove the unicouple from the faucet.
Connection Of Drain Hoses

Insert the drain hose into a drain pipe with a minimum diameter of 4 cm, or let it run into the sink, making sure to avoid bending or crimping it. The height of drain pipe must be less than 1000mm. The free end of the hose must not be immersed in water to avoid the back flow of it.

⚠️ Please securely fix the drain hose in either position A or position B

How to drain excess water from hoses

If the sink is 1000 higher from the floor, the excess water in hoses cannot be drained directly into the sink. It will be necessary to drain excess water from hoses into a bowl or suitable container that is held outside and lower than the sink.

Water outlet

Connect the water drain hose. The drain hose must be correctly fitted to avoid water leaks. Ensure that the water drain hose is not kinked or squashed.

Extension hose

If you need a drain hose extension, make sure to use a similar drain hose. It must be no longer than 4 meters; otherwise the cleaning effect of the dishwasher could be reduced.

Syphon connection

The waste connection must be at a height less than 100 cm (maximum) from the bottom of the dish. The water drain hose should be fixed.
USING YOUR DISHWASHER

• Control Panel

1. Power
   - Press this button to turn on your dishwasher, the screen lights up.

2. Delay start
   - Press the Delay button to increase the delay start time. Delay a cycle for up to 24 hours in one-hour increments. After setting the delay time, press the Start/Pause button to start.

3. Program
   - Select the appropriate washing program, the selected program indicator will be lit.

4. Start/Cancel
   1. To start the selected washing program.
   2. Press the button for 3 seconds to cancel the program when the dishwasher is working.

</tbody>
</table>
Function Of The Rinse Aid And Detergent

The rinse aid is released during the final rinse to prevent water from forming droplets on your dishes, which can leave spots and streaks. It also improves drying by allowing water to roll off the dishes. Your dishwasher is designed to use liquid rinse aids.

**WARNING**

Only use branded rinse aid for dishwasher. Never fill the rinse aid dispenser with any other substances (e.g. Dishwasher cleaning agent, liquid detergent). This would damage the appliance.

When to refill the rinse aid dispenser

Unless the rinse-aid warning light (💧) on the control panel is on, you can always estimate the amount from the color of the optical level indicator located next to the cap. When the rinse-aid container is full, the indicator will be fully dark. The size of the dark dot decreases as the rinse-aid diminishes. You should never let the rinse aid level be less than 1/4 full.

As the rinse aid diminishes, the size of the black dot on the rinse aid level indicator changes, as illustrated below.

- Full
- 3/4 full
- 1/2 full
- 1/4 full
- Empty

Function of detergent

The chemical ingredients that compose the detergent are necessary to remove, crush and dispense all dirt out of the dishwasher. Most of the commercial quality detergents are suitable for this purpose.

**WARNING**

- Proper Use of Detergent
  Use only detergent specifically made for dishwashers use. Keep your detergent fresh and dry. Don’t put powdered detergent into the dispenser until you are ready to wash dishes.

- Dishwasher detergent is corrosive! Keep dishwasher detergent out of the reach of children.
Filling The Rinse Aid Reservoir

1. Remove the rinse aid reservoir cap by rotating it counterclockwise.

2. Carefully pour in the rinse-aid into its dispenser, whilst avoiding it to overflow.

3. Close the rinse aid reservoir cap by rotating it clockwise.

**NOTE:**
Clean up any spilled rinse aid with an absorbent cloth to avoid excessive foaming during the next wash.

Adjusting the rinse aid reservoir

Turn the rinse aid indicator dial to a number between 1 and 4. The higher the number, the more rinse aid the dishwasher uses. If the dishes are not drying properly or are spotted, adjust the dial to the next higher number until your dishes are spot-free. Reduce it if there are sticky whitish stains on your dishes or a bluish film on glassware or knife blades.
Filling The Detergent Dispenser

1. Press the release catch on the detergent dispenser to open the cover.

2. Add detergent into the larger cavity (A) for the main wash cycle. For more heavily soiled wash loads, also add some detergent into the smaller cavity (B) for the pre-wash cycle.

3. Close the cover and press on it until it locks into place.

NOTE:
- Be aware that depending on the soiling of water, setting may be different.
- Please observe the manufacturer's recommendations on the detergent packaging.
Basket Used Tips

Adjusting the upper basket

The height of the upper basket can be easily adjusted to accommodate taller dishes in either the upper or lower basket.
To adjust the height of the upper rack, follow these steps:

1. Pull out the upper basket.
2. Remove the upper basket.
3. Re-attach the upper basket to upper or lower rollers.

Folding back the cup shelves

To make room for taller items in the upper basket, raise the cup rack upwards. You can then lean the tall glasses against it. You can also remove it when it is not required for use.
Preparing And Loading Dishes

- Consider buying utensils which are identified as dishwasher-proof.
- For particular items, select a program with the lowest possible temperature.
- To prevent damage, do not take glass and cutlery out of the dishwasher immediately after the program has ended.

For washing the following cutlery/dishes

Are not suitable
- Cutlery with wooden, horn china or mother-of-pearl handles
- Plastic items that are not heat resistant
- Older cutlery with glued parts that are not temperature resistant
- Bonded cutlery items or dishes
- Pewter or cooper items
- Crystal glass
- Steel items subject to rusting
- Wooden platters
- Items made from synthetic fibres

Are of limited suitability
- Some types of glasses can become dull after a large number of washes
- Silver and aluminum parts have a tendency to discolor during washing
- Glazed patterns may fade if machine washed frequently

Recommendations for loading the dishwasher

Scrape off any large amounts of leftover food. Soften remnants of burnt food in pans. It is not necessary to rinse the dishes under running water.

For best performance of the dishwasher, follow these loading guidelines.

(Features and appearance of baskets and cutlery baskets may vary from your model.)

Place objects in the dishwasher in following way:
- Items such as cups, glasses, pots, pans, etc. are faced downwards.
- Curved items, or ones with recesses, should be loaded aslant so that water can run off.
- All utensils are stacked securely and can not tip over.
- All utensils are placed in the way that the spray arms can rotate freely during washing.
• Load hollow items such as cups, glasses, pans etc. With the opening facing downwards so that water cannot collect in the container or a deep base.
• Dishes and items of cutlery must not lie inside one another, or cover each other.
• To avoid damage, glasses should not touch one another.
• The upper basket is designed to hold more delicate and lighter dishware such as glasses, coffee and tea cups.
• Long bladed knives stored in an upright position are a potential hazard!
• Long and sharp items of cutlery such as carving knives must be positioned horizontally in the upper basket.
• Please do not overload your dishwasher. This is important for good results and for reasonable consumption of energy.

💡 NOTE:

Very small items should not be washed in the dishwasher as they could easily fall out of the basket.
Loading the upper basket (8 place setting)
The upper basket has been designed for small plates, mugs, glasses, and plastic items marked “dishwasher safe”. Load your plates into the dishwasher in two half rows, so that the front of each plate faces the back of the plate in front of it, and the open sides of the plates at the center of the dishwasher face each other.
When loading dishes, pull the upper basket out sufficiently so you can load it without striking the counter.

Loading the lower basket (8 place setting)
The lower basket has been especially designed for dinner dishes, soup bowls, plates, pots, lids, casserole dishes, and plates.
Load large items such as pans and pots into the dishwasher so their open sides face downwards.
Loading the cutlery basket

The silverware basket can be divided into three separate modules that can be used in both upper and lower racks.

</tr>
</tbody>
</table>

WARNING

Do not let any item extend through the bottom. Always load sharp utensils with the sharp point down! Be sure nothing protrudes through the bottom of the basket or rack to block the lower spray.

Removing the dishes

To prevent water dripping from the upper basket into the lower basket, we recommend that you empty the lower basket first, followed by the upper basket.

WARNING

**Items will be hot!** To prevent damage, do not take glass and cutlery out of the dishwasher for around 15 minutes after the program has ended.
# PROGRAMMING THE DISHWASHER

## Wash Cycle Table

The table below shows which programs are best for the levels of food residue on them and how much detergent is needed. It also show various information about the programs.

( ) Means: need to fill rinse into the Rinse-Aid Dispenser.

---

### Starting A Wash Cycle

1. Pull out the lower and upper basket, load the dishes and push them back. It is recommended to load the lower basket first, then the upper one.
2. Pour in the detergent.
3. Insert the plug into the socket. The power supply refer to last page “Product fiche”. Make sure that the water supply is turned on to full pressure.
4. Open the door, press the power button to switch on the machine.
5. Choose a program, the response light will turn on.
6. Press the Start/Cancel button, then close the door within four seconds, the dishwasher will start its cycle.

---

### Changing The Program Mid-cycle

A wash cycle can only be changed if it has been running for a short time otherwise, the detergent may have already been released and the dishwasher may have already drained the wash water. If this is the case, the dishwasher needs to be reset and the detergent dispenser must be refilled. To reset the dishwasher, follow the instructions below:

1. Open the door a little to stop the dishwasher, after the spray arm stop working, you can open the door completely.
2. Press Start/Cancel button for more than 3 seconds to cancel the program.
3. Press the Program button to select the desired program.
4. Press the Start/Cancel button, then close the door within four seconds, the dishwasher will start after 10 seconds.

---

---
Forget To Add A Dish?

A forgotten dish can be added any time before the detergent dispenser opens. If this is the case, follow the instructions below:

1. Open the door a little to stop the dishwasher, after the spray arm stop working, you can open the door completely.

2. Add the forgotten dishes.

3. Press the Start/Cancel button, then close the door within four seconds, the dishwasher will start after 10 seconds.

WARNING

It is dangerous to open the door mid-cycle, as hot steam may scald you.

NOTE:

If you close the door more than 4 seconds after pressed the Start/Cancel button, the cycle will pause and not run.
MAINTENANCE AND CLEANING

• External Care

The door and the door seal
Clean the door seals regularly with a soft damp cloth to remove food deposits. When the dishwasher is being loaded, food and drink residues may drip onto the sides of the dishwasher door. These surfaces are outside the wash cabinet and are not accessed by water from the spray arms. Any deposits should be wiped off before the door is closed.

The control panel
If cleaning is required, the control panel should be wiped with a soft damp cloth only.

⚠️ WARNING
- To avoid penetration of water into the door lock and electrical components, do not use a spray cleaner of any kind.
- Never use abrasive cleaners or scouring pads on the outer surfaces because they may scratch the finish. Some paper towels may also scratch or leave marks on the surface.

• Internal Care

Filtering system
The filtering system in the base of the wash cabinet retains coarse debris from the washing cycle. The collected coarse debris may cause the filters to clog. Check the condition of the filters regularly and clean them if necessary under running water. Follow the steps below to clean the filters in the wash cabinet.

💡 NOTE:
Pictures are only for reference, different models of the filtering system and spray arms may be different.
1 Hold the coarse filter and rotate it counter-clockwise to unlock the filter. Lift the filter upwards and out of the dishwasher.

2 The fine filter can be pulled off the bottom of the filter assembly. The coarse filter can be detached from the main filter by gently squeezing the tabs at the top and pulling it away.

3 Larger food remnants can be cleaned by rinsing the filter under running water. For a more thorough clean, use a soft cleaning brush.

4 Reassemble the filters in the reverse order of the disassembly, replace the filter insert, and rotate clockwise to the close arrow.

**WARNING**

- Do not over tighten the filters. Put the filters back in sequence securely, otherwise coarse debris could get into the system and cause a blockage.
- Never use the dishwasher without filters in place. Improper replacement of the filter may reduce the performance level of the appliance and damage dishes and utensils.
Spray arms

It is necessary to clean the spray arms regularly for hard water chemicals will clog the spray arm jets and bearings.

To clean the spray arms, follow the instructions below:

1. To remove the upper spray arm, hold the nut in the center still and rotate the spray arm counterclockwise to remove it.

2. To remove the lower spray arm, pull out the spray arm upward.

3. Wash the arms in soapy and warm water and use a soft brush to clean the jets. Replace them after rinsing them thoroughly.
Caring For The Dishwasher

Frost precaution
Please take frost protection measures on the dishwasher in winter. Every time after washing cycles, please operate as follows:
1. Cut off the electrical power to the dishwasher at the supply source.
2. Turn off the water supply and disconnect the water inlet pipe from the water valve.
3. Drain the water from the inlet pipe and water valve. (Use a pan to gather the water)
4. Reconnect the water inlet pipe to the water valve.
5. Remove the filter at the bottom of the tub and use a sponge to soak up water in the sump.

After every wash
After every wash, turn off the water supply to the appliance and leave the door slightly open so that moisture and odors are not trapped inside.

Remove the plug
Before cleaning or performing maintenance, always remove the plug from the socket.

No solvents or abrasive cleaning
To clean the exterior and rubber parts of the dishwasher, do not use solvents or abrasive cleaning products. Only use a cloth with warm soapy water.
To remove spots or stains from the surface of the interior, use a cloth dampened with water and a little vinegar, or a cleaning product made specifically for dishwashers.

When not in use for a longtime
It is recommend that you run a wash cycle with the dishwasher empty and then remove the plug from the socket, turn off the water supply and leave the door of the appliance slightly open. This will help the door seals to last longer and prevent odors from forming within the appliance.

Moving the appliance
If the appliance must be moved, try to keep it in the vertical position. If absolutely necessary, it can be positioned on its back.

Seals
One of the factors that cause odors to form in the dishwasher is food that remains trapped in the seals. Periodic cleaning with a damp sponge will prevent this from occurring.
# TROUBLESHOOTING TIPS

## Before Calling For Service
Reviewing the charts on the following pages may save you from calling for service.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Causes</th>
<th>What To Do</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dishwasher doesn’t start</td>
<td>Fuse blown, or the circuit break tripped.</td>
<td>Replace fuse or reset circuit breaker. Remove any other appliances sharing the same circuit with the dishwasher.</td>
</tr>
<tr>
<td></td>
<td>Power supply is not turned on.</td>
<td>Make sure the dishwasher is turned on and the door is closed securely. Make sure the power cord is properly plugged into the wall socket.</td>

<tr>
<td>The dishes aren't drying</td>
<td>Improper loading</td>
<td>Load the dishwasher as suggested in the directions.</td>
</tr>
<tr>
<td></td>
<td>Too little rinse-aid</td>
<td>Increase the amount of rinse-aid/refill the rinse-aid dispenser.</td>
</tr>
<tr>
<td></td>
<td>Dishes are removed too soon</td>
<td>Do not empty your dishwasher immediately after washing. Open the door slightly so that the steam can come out. Take out the dishes until the inside temperature is safe to touch. Unload the lower basket first to prevent the dropping water from the upper basket.</td>
</tr>
</tbody>
</table>
If there is a malfunction, the dishwasher will display error codes to identify these:

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Causes</th>
<th>What To Do</th>
</tr>
</thead>
<tbody>
<tr>
<td>The dishes aren’t drying</td>
<td>Wrong program has been selected</td>
<td>With a short program, the washing temperature is lower, decreasing cleaning performance. Choose a program with a long washing time.</td>
</tr>
<tr>
<td></td>
<td>Use of cutlery with a low-quality coating.</td>
<td>Water drainage is more difficult with these items. Cutlery or dishes of this type are not suitable for washing in the dishwasher.</td>
</tr>
</tbody>
</table>

## Error Codes

If there is a malfunction, the dishwasher will display error codes to identify these:

<table>
<thead>
<tr>
<th>Codes</th>
<th>Meanings</th>
<th>Possible Causes</th>
</tr>
</thead>
<tbody>
<tr>
<td>E1</td>
<td>Longer inlet time.</td>
<td>Faucets is not opened, or water intake is restricted, or water pressure is too low.</td>
</tr>
<tr>
<td>E3</td>
<td>Not reaching required temperature.</td>
<td>Malfunction of heating element.</td>
</tr>
<tr>
<td>E4</td>
<td>Overflow.</td>
<td>Some element of dishwasher leaks.</td>
</tr>
</tbody>
</table>

### WARNING

- If overflow occurs, turn off the main water supply before calling a service.
- If there is water in the base pan because of an overfill or small leak, the water should be removed before restarting the dishwasher.
