To Our Valued Customer:

Congratulations on your purchase of the very latest in Dacor® products! Our unique combination of features, style and performance make us The Life of the Kitchen™, and a great addition to your home.

In order to familiarize yourself with the controls, functions and full potential of your new Distinctive Appliance, read this use and care manual thoroughly, beginning with the Important Safety Instructions section.

All Dacor appliances are designed and manufactured with quality and pride, while working within the framework of our company value. Should you ever experience a problem with your product, please first check the Before You Call for Service section of this manual for guidance. It provides useful suggestions and remedies prior to calling for service.

Valuable customer input helps us to continuously improve our products and services, so please feel free to contact our Customer Service Team for assistance with any of your product support needs.

Dacor Customer Service Team
600 Anton Blvd. Suite 1000
Costa Mesa, CA 92626

Telephone: (800) 793-0093
Fax: (626) 403-3130
Hours of Operation: Monday through Friday
6:00 A.M. to 5:00 P.M. Pacific Time

Web Site: www.dacor.com

Thank you for choosing Dacor for your home. We are a company built by families for families and we are dedicated to serving yours. We are confident that your new Dacor product will deliver a high level of performance and enjoyment for many years to come.

Sincerely,

The Dacor Customer Service Team
Important Safety Instructions

Installer: Leave these instructions with the appliance.

Consumer: Read this use and care manual completely before using this appliance. Save it for future reference. It contains important use and care information. Keep your sales receipt or canceled check. Proof of original purchase date is required for warranty service.

For warranty and service information, see page 20.

If you have any questions (other than warranty questions), call:

Dacor Customer Service
(800) 793-0093 (U.S.A. and Canada)
Monday - Friday 6:00 AM to 5:00 PM Pacific Time

Have the complete model and serial number identification of your appliance ready. The model and serial number are on the product data label. See page 3 for location. Record these numbers below for easy access.

Model number _______________________________

Serial number _______________________________

Date of purchase ____________________________

Since we continuously improve the quality and performance of our products, we may make changes to the appliance without updating this manual. Visit www.dacor.com to download the latest version of this manual.

READ AND SAVE THESE INSTRUCTIONS
### Important Safety Instructions

#### General Safety Precautions

**WARNING** - To reduce the risk of fire, electric shock, serious injury or death when using your appliance, follow basic safety precautions, including the following:

<table>
<thead>
<tr>
<th>WARNING</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Read all instructions before using the dishwasher. Use the dishwasher only for its intended purpose (to wash dishes, flatware, pots and pans). This appliance is not intended for commercial use.</td>
</tr>
<tr>
<td>• If you receive a damaged product, immediately contact your dealer or builder. Do not install or use a damaged appliance.</td>
</tr>
<tr>
<td>• The dishwasher must be mounted in a completely enclosed cabinet.</td>
</tr>
<tr>
<td>• Repairs should be performed only by a qualified technician. Disconnect the power before servicing.</td>
</tr>
<tr>
<td>• Make sure individuals who use the dishwasher are able to operate it properly.</td>
</tr>
<tr>
<td>• Do not leave children alone or unattended in the area around the dishwasher, even when it is not in use. Do not allow children to play with the controls or other parts of the dishwasher.</td>
</tr>
<tr>
<td>• Never allow anyone, including children, to sit, stand or climb on any part of the dishwasher. Stepping or sitting on any part of it may result in tipping, damage, serious injury or death.</td>
</tr>
<tr>
<td>• Many surfaces within the dishwasher achieve high temperatures. Do not touch the interior surfaces or items inside the dishwasher during or immediately after use. Exercise caution when opening the door. Let hot air and steam escape before looking or reaching inside.</td>
</tr>
<tr>
<td>• Clean the dishwasher only as instructed in this manual.</td>
</tr>
<tr>
<td>• Do not operate the dishwasher unless all enclosure panels (guard plate, access panel, toe kick etc.) are in place.</td>
</tr>
<tr>
<td>• Do not store or use combustible materials, liquids or gases near this or any other appliance.</td>
</tr>
<tr>
<td>• Store all detergents and rinse agents out of the reach of children.</td>
</tr>
<tr>
<td>• Use only detergents and rinse agents designed for use with a residential dishwasher.</td>
</tr>
<tr>
<td>• Do not tamper with the controls.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>WARNING</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Do not run the dishwasher when you are out of the building.</td>
</tr>
<tr>
<td>• Under certain conditions hydrogen gas may be produced in a hot water system that has not been used for two weeks or more. Hydrogen gas is explosive. If the hot water system has not been used for a period of time, turn on all hot water faucets and let the water flow for several minutes to release any accumulated hydrogen gas. Do not smoke or use an open flame during this process.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Use the dishwasher to wash flatware and cookware ONLY. Washing other items may damage or discolor the dishwasher. Wash only the types of dishes and cooking utensils indicated in this manual. Take care with certain materials. Read the <strong>Loading Your Dishwasher</strong> section before use.</td>
</tr>
<tr>
<td>• To prevent household mold and mildew damage, periodically check the inlet and drain hoses for leaks.</td>
</tr>
<tr>
<td>• Turn off the water supply valve if the appliance will not be used for an extended period of time.</td>
</tr>
<tr>
<td>• When loading items to be washed:</td>
</tr>
<tr>
<td>◊ Locate sharp items so that they are not likely to damage the door seal.</td>
</tr>
<tr>
<td>◊ Load sharp knives with the handles up to reduce the risk of cut-type injuries.</td>
</tr>
<tr>
<td>• Store the dishwasher where the temperature remains above freezing. Avoid long transport distances in very cold weather.</td>
</tr>
<tr>
<td>• Transport the dishwasher only in the upright position or laying on its back.</td>
</tr>
</tbody>
</table>
About the Control Panel

- The control panel touch keys only react when the door is open. It takes a moment for the keys to reactivate after opening the door.
- If no keys are touched for two minutes, the control panel goes into energy saving mode. Close and reopen the door, or hold your finger the main power key to reactivate the panel.

Child Safety Lock

- This dishwasher is equipped with an electronic child safety lock. When the child lock is engaged, the control panel keys do not work normally, making it more difficult to program and start.

If you touch any of the control panel touch keys, except the main power key when the lock is activated, “LOC” will appear on the display, with no other effect on the control panel. See page 12 for child lock activation instructions.

To start the dishwasher while the lock is activated: Touch the Temperature and Dry keys at the same time. The child safety lock will deactivate for two minutes, allowing you to set and start the dishwasher normally. The lock will re-engage automatically after two minutes.
### WARNING

- Place sharp objects in the silverware basket or knives in the knife stand (see page 6). If it is not possible to load sharp objects in the silverware basket, load them with the sharp end toward the back of the dishwasher. Locate these items where they will not damage the door seal or cause personal injury.
- When loading the silverware basket, insert all sharp or pointed objects with the handles up.

### CAUTION

Do not wash plastic items unless they are marked “dishwasher safe.” Always check the manufacturer’s recommendation before washing plastic items that are not marked.

### IMPORTANT

If the load will sit for a while before washing, run the **Rinse and Hold** cycle to reduce the chance of food hardening. Doing so will also reduce the risk of acidic foods damaging metal surfaces.

---

### What Can Be Washed

Some cookware is not dishwasher safe. Other materials (especially glassware) cannot withstand high temperatures, others can be damaged by dishwasher detergent. Items that you can safely wash in your dishwasher are:

- China (except delicate china)
- Cookware with non-stick coatings
- Crystal (except antique crystal)
- Glass
- Plastic (dishwasher safe only)
- Silver and silver plate
- Stainless steel
- Stoneware
- Wood (dishwasher safe only)

### What Should Not Be Washed

For safety reasons and to prevent damage, do not wash the following items in your dishwasher:

- Aluminum
- Antique crystal
- Any item with fragile or unglazed decorations
- Brass
- Bronze
- Cast iron
- Cutlery and flatware with bonded handles
- Delicate china
- Disposable plastic items
- Gold
- Pewter
- Tin
- Wood that is not dishwasher safe
Loading Your Dishwasher

Loading the Silverware Basket

**IMPORTANT**

- To prevent damage, do not load utensils and silverware made of different materials (for example silver and stainless steel) in the same compartment of the silverware basket.
- For best results:
  - Do not nest utensils in the silverware basket.
  - Load silverware with the handles down.
  - Spread knives and large utensils out as much as possible.

Covered Compartment

To prevent small, light items from falling out of the rack when sprayed with water, put them in the covered compartment. To cover the compartment:

1. Put small items into one of the middle compartments of the silverware basket.
2. Lift up on the tab in the center of the basket to expose the cover.
3. Snap the cover shut over the compartment.

**NOTE:** For convenience, you may also insert silverware or small utensils into the slots on top of the covered compartment. Insert them with the handles down.

Silverware Basket Placement

Put the silverware basket in the bottom rack in the front, in the direction shown. It fits over the two front sets of tines.
**Loading the Racks**

**CAUTION**
- Always place large or heavy items (such as pots, pans and large dishware) in the bottom rack.
- To avoid damage to the racks, do not let sharp edges come into contact with them.
- To minimize breakage and chipping, do not allow fragile items to touch each other.

**IMPORTANT**
- The spray arms must spin freely. Do not allow items sticking out of the racks to block them.
- Do not load cookie sheets and large platters in the front of the bottom rack. Doing so will prevent water from dissolving the detergent in the detergent dispenser. See diagram below.

Do not block spray arms

Do not put cookie sheets or large platters in the front of bottom rack

Fold down wine glass/cup shelf

Cup rack

Knife stand

Top Rack Features
Loading Your Dishwasher

- Place glasses, cups, bowls, small plates and saucers in the top rack. Put wine glasses on the wine glass shelf or lean them against it. Place long knives in the knife stand.
- Scrape off leftover food items and non-food items, like toothpicks and napkins, before loading. It is not necessary to rinse items under running water before loading them.
- Do not stack dishes, glasses or pots and pans. Stacking will prevent water from getting to soiled surfaces.
- Load all items so that the open ends face down as much as possible. Load items that are not completely face down so that the open end is toward the center of the rack. Good drainage provides the best drying.
- Place dinner plates, side plates, serving dishes, pots and pans on the bottom rack.
- Load crystal and glass so that it does not knock together during the wash cycle. Use the lowest wash temperature and shortest wash and dry cycles possible.
- To minimize noise, do not allow pots and pans to touch. Also keep large items from touching the sides of your dishwasher.
Operating Your Dishwasher

Filling the Detergent Dispenser

**CAUTION**

- Do not use hand dishwashing detergents. They will create excessive foaming that interferes with proper operation.
- Using too much dishwashing detergent can cause a permanent film called etching.

**IMPORTANT**

- Do not use detergent that is clumped or has been wet. Store dry detergent in a cool dry place to prevent caking.
- Fill the detergent dispenser just prior to starting your dishwasher. Detergent will harden if it sits too long. Also check the package for detergent that is expired.
- Dacor recommends granular (powdered), unscented automatic dish washing detergent. “All-in-one”, “multi-purpose” or “complete” dish washing detergents are not recommended.

- If the detergent dispenser lid is closed, press the (left) release button to open it.

- The detergent dispenser has two compartments; the smaller pre-wash compartment, and the main wash compartment (see diagram at right). The pre-wash compartment empties into the dishwasher when the door is closed. The main wash compartment releases detergent automatically during the main wash cycle. **NOTE:** When running the Quick Wash cycle, Dacor recommends that you do not add detergent to the pre-wash compartment.

- See the **Detergent Usage Table** for the amount of detergent recommended. The recommended amounts shown are intended to provide properly cleaned dishes, free of film and spotting for the water hardness in your area. You may need to adjust the detergent by small amounts until you get the best results. Harder water requires more detergent.

- Water hardness is measured in grains per gallon (gpg). Contact your water company for the water hardness in your area. 12 gpg and higher is extremely hard water and detergent alone may not be enough. You may need to use a water softener to maximize dishwasher performance at a water hardness above 12 gpg. Also, in areas with 9 gpg and higher water hardness, you may need to wash at a lower temperature to prevent hard water deposits from forming in the dishwasher.

- Different brands of dishwasher detergent have different amounts of phosphorous for softening water. In some areas with hard water, you may need to use more detergent if it has less than an 8.7% phosphorous content or change to a granular (powdered) detergent with more phosphorus.

- After loading both compartments according to the table below, close the detergent dispenser lid.

<table>
<thead>
<tr>
<th>Water Hardness (gpg)</th>
<th>Amount of Detergent</th>
</tr>
</thead>
<tbody>
<tr>
<td>Soft (0-3)</td>
<td>Pre-wash: 1 teaspoon</td>
</tr>
<tr>
<td></td>
<td>Main wash: 1 - 1½ tablespoons</td>
</tr>
<tr>
<td>Medium (4-8)</td>
<td>Pre-wash: 1 teaspoon</td>
</tr>
<tr>
<td></td>
<td>Main wash: 1 - 2 tablespoons</td>
</tr>
<tr>
<td>Hard (9 and over)</td>
<td>Pre-wash: 1 teaspoon</td>
</tr>
<tr>
<td></td>
<td>Main wash: 2 - 3 tablespoons</td>
</tr>
</tbody>
</table>

Release button

Pre-wash compartment

Main wash compartment

Detergent Dispenser lid
Filling the Rinse Agent Dispenser

**IMPORTANT**

- Rinse agent is important to the drying process of the dishware. It also reduces spotting. Dacor recommends that you keep the rinse agent dispenser full at all times. However, some customers with soft water may not need rinse agent. If you have soft water, your dishes may dry better without rinse agent.
- If you use a dishwashing detergent containing a rinse agent additive, do not fill the rinse agent dispenser to avoid a film on the dishes.
- When the rinse aid dispenser needs to be refilled, this symbol appears on the display.
- The rinse agent dispenser must be properly adjusted. Too little rinse agent will allow spotting and drying problems. Too much rinse agent will cause foaming and streaking.
- When the water hardness exceeds 3 gpg, you should use rinse agent with citric acid (acid rinse agent).

**To refill the rinse agent dispenser:**

1. Press the (right) release button to open the rinse agent compartment lid.

2. Carefully pour the rinse agent into the filler hole until the rinse agent level is even with the end of the **MAX** arrow inside. Do not overfill.

3. Wipe up any spillage.

4. Close the rinse agent compartment lid firmly.

**NOTE:** After filling the rinse agent dispenser, it may take a few washes before the rinse agent indicator on the display goes off.

Changing the Amount of Rinse Agent Dispensed

See page 12 for instructions to change the amount of rinse agent dispensed.

**When to increase the amount dispensed:**
- When the dishes have water marks.

**When to decrease the amount dispensed:**
- When the dishes have a sticky white/blue film.
- When the dishes are streaked.
- If heavy foaming occurs.

**NOTE:** If you have very soft water and still experience streaking when the dispenser is set to 1, you can dilute the rinse agent with water up to a 50:50 mix before pouring it into the dispenser to get acceptable results.
Starting Your Dishwasher

**IMPORTANT**
If the dishwasher drain line is connected to a garbage disposal, run the disposal before operating the dishwasher for proper drainage.

1. Open the door and hold your finger on the main power touch key until the control panel lights.

2. Touch the **PROGRAM** key repeatedly until the symbol for the desired wash cycle appears on the display. See the facing page for a description of the wash cycles. **NOTE:** The estimated wash time will also appear.

3. If you want to change the wash temperature setting, touch the **Wash Temperature** key repeatedly to toggle between the “normal” setting and the “high” setting. The light below the **Wash Temperature** key is lit when the temperature is set to “high.” See the facing page for a description of the temperature settings.

4. If you want to change the dish drying time, touch **Dry** repeatedly to toggle between the “normal” and “high” setting. The light below the **Dry** cycle key is lit when the dry time is set to “high.” **NOTE:** When set to “normal”, the rinse water temperature is lower, causing the dishes to take longer to dry. Change the setting to “high” if the dishes do not dry properly. **NOTE:** This option is not available for the **Rinse and Dry** and **Rinse and Hold** cycles.

5. If you want to delay the start of the dishwasher, touch **Delay Start** repeatedly to set the delay time on the display (in hours). You can select a delay of up to 24 hours. **NOTE:** Odd numbered hours above 10 are not programmable.

6. To start, hold your finger on the **START/STOP** key. The display will flash three times, then the door open symbol will appear on the display, indicating that the dishwasher is ready to start. Touching **START/STOP** for more than three seconds a second time will cancel the delay start option (if it was selected), but the selected cycle will still run.

7. Close the door and push in gently on the top until it clicks shut. If the door is not closed within two minutes, the display will return to the cycle setting that was run previously.

During Operation

- During the cycle, the dishwasher’s computer monitors the amount of soil left on the dishes (by monitoring amount of soil in the water). The amount of time required for the cycle to complete varies based on the amount of soil left on the dishes and the water temperature.

- If power to the dishwasher is turned off at the main power switch or if there is a power outage before the wash cycle completes, the selected cycle will continue when the power is restored. However, if power is interrupted or the door is open more than two minutes during drying, the cycle will end.

Standby Mode

Once the cycle is finished, the dishwasher will beep and **End** will appear on the display. When the cycle completes the dishwasher draws a very small amount of power. Open the door and hold your finger on the main power key to turn power off completely.

Saving on Water and Energy Costs

- To save energy, wait to run the wash cycle until the dishwasher is full.

- Use the **Rinse and Hold** cycle to rinse the dishes if there are any unpleasant odors while you wait for the dishwasher to become fully loaded.

- If the dishes are only lightly soiled, use the normal temperature and/or dry setting. For best results after the normal dry cycle, leave the door open slightly after the end of the cycle.

- Do not rinse dishes under running water. Simply scrape off large food particles before loading.

Adding a Dish After You Start

You can add a dish, if needed, after starting your dishwasher. Dacor recommends that you only add items during the first five minutes of operation to make sure they get clean.

To add a dish:

1. Slowly open the door. The dishwasher will stop operating. Wait a moment for the steam to clear.

2. Without touching any of the hot surfaces or racks, insert the item into one of the racks, following the normal loading instructions.

3. Close the door. Push on the door handle to make sure that the door is completely shut. Operation will resume.
Operating Your Dishwasher

Changing the Wash Cycle After You Start
You can change the cycle, or any of the other settings after you start your dishwasher.

1. Open the door, then hold your finger on the START/STOP touch key for three seconds. The dishwasher will stop operating.
2. If the detergent dispenser door has opened, add more detergent.
3. Touch PROGRAM repeatedly until the symbol for the desired wash cycle appears on the display.
4. If you want to change the wash temperature or dry setting or select the delay option, touch the key for that function repeatedly to toggle between settings.
5. Hold your finger on START/STOP until the display flashes, then close the door.

Stopping Your Dishwasher During Operation
Open the door and touch the START/STOP key for three seconds. The dishwasher will stop operating.

* Higher if water supply temperature is above 85°F.

Wash Cycles

- **Heavy Wash**: Use for heavily soiled dishes like pots, pans, casserole dishes, etc. Additional smaller items may be added after the larger items if there is still space to conserve water and energy.
- **Normal Wash**: Use for normally soiled plates, glasses, bowls, serving dishes and lightly soiled pans. This cycle is best for normally soiled mixed loads.
- **Daily Wash**: Use for dishes that are washed on a daily basis. This cycle can also deal with dried food, though the short pre-washes are not designed for dishes with burned on food.
- **Quick Wash**: Use for very lightly soiled loads that are washed immediately after use. This cycle can also be used for lightly soiled glass, coffee cups, china or other delicate items.
- **Super Quick Wash**: A short cycle lasting about 15 minutes. Use for very lightly soiled loads that are washed immediately after use. This cycle can also be used for very lightly soiled glass, coffee cups, china or other delicate items.
- **Delicate Wash**: Use for glasses and porcelain that have just been used and as such do not require such a powerful wash cycle. This cycle is also good for fragile dishes. Select normal dry with this cycle if you want to be especially cautious.
- **Eco Wash**: Use when you want to save energy when washing normally soiled loads.
- **Rinse and Dry**: This cycle consists of a rinse with heating and drying. It is suitable for rinsing and heat cleaning glass jars immediately before jam making and similar uses.
- **Rinse and Hold**: Use to rinse dishes that you plan to wash later that day or for rinsing the dishes while waiting for the machine to be filled. The wash temperature setting cannot be changed for this cycle.
Operating Your Dishwasher

Control Panel Settings

Various functions and settings on your dishwasher can be configured by the user. To change one of the settings:

1. Open the door slightly. If the display is lit, hold your finger on the main power key until the display turns off. After the control panel lights go out, wait about five seconds.
2. Hold your finger on the main power key until the display lights up again.
3. Within five seconds of the display lighting, touch the PROGRAM and Dry keys at the same time. Keep your fingers on both keys until the SET symbol (shown above) appears on the display.
4. Touch START/STOP repeatedly until the menu number for the desired function appears on the display (see above).
5. Touch PROGRAM repeatedly until the desired setting for the function being set appears on the display (see above).
6. Touch START/STOP repeatedly to save the setting and exit the menu. Repeat the above steps to change the settings for a different function.

<table>

5. Touch PROGRAM repeatedly until the desired setting for the function being set appears on the display (see above).
6. Touch START/STOP repeatedly to save the setting and exit the menu. Repeat the above steps to change the settings for a different function.
Care and Cleaning

Cleaning the Interior

- The dishwashing compartment of your Dacor dishwasher is constructed of high quality stainless steel. It remains clean during normal use. However, if you have hard water, a white or gray film may form inside over time. To remove these hard water deposits, run a normal wash cycle with two tablespoons of citric acid or dishwasher cleaner in the dishwasher detergent compartment (with no dishes loaded).
- The control panel and the racks may be wiped clean, if necessary, with a soft damp rag.
- Food particles on the silverware basket can be rinsed clean under a faucet with warm water.

Strainer Basket and Filter System

- Do not operate the dishwasher without the strainer, the drain outlet cover and the filter system completely in place. The strainer, the drain outlet cover and filter system are designed to keep large food particles out of the mechanical parts.
- The strainer basket portion of the filter system should be cleaned whenever food particles begin to build up. Food that builds up in the other parts of the filter system is rinsed away during each wash cycle so that the entire filter system only needs to be cleaned twice a year.

Cleaning the Strainer Basket

1. Open the door and remove the bottom rack.
2. Lift the strainer basket straight up by the handle.
3. Rinse it out under running water in the sink. Replace it by pressing it firmly into the hole in the center of the filter system. The handle goes toward the door. Replace the rack.
**Care and Cleaning**

**Cleaning the Entire Filter System**

**WARNING**

To avoid an electric shock hazard, disconnect power to the dishwasher when cleaning the entire filter system.

1. Disconnect the dishwasher power plug from the electrical outlet or turn off power at the circuit breaker panel.
2. Open the door and remove the bottom rack.
3. Turn the handle on the strainer basket once counter-clockwise.
4. Pull the strainer basket and the attached tubular filter up and out.
5. Pull the strainer basket free from the tubular filter.
6. Lift the fine particle filter out of the dishwasher.
7. Clean the filters in the kitchen sink with a soft sponge and mild kitchen detergent under warm water. Rinse any food particles out of the strainer basket.
8. Remove the drain outlet cover located to the left of the drain bottom (see diagram below). To remove it, grasp it and pull it to the right, out of the hole.
9. Insert your finger into the drain outlet hole. Turn the pump blade inside the hole with your finger to loosen anything clogging it. Pull out any large bits of food that are loosened.
Care and Cleaning

10. Reinstall the drain outlet cover.
11. Center the fine particle filter over the hole in the bottom of the dishwasher.

12. Re-attach the strainer basket to the tubular filter.

13. Insert the tubular filter assembly into the hole with the handle pointing toward the front of the dishwasher. Turn the handle once clockwise until it stops to secure it in place.

14. Replace the bottom rack.
15. Reconnect power to the dishwasher.

Cleaning the Spray Arms

The holes and bearings on the spray arms can sometimes become blocked. Clean them as follows to restore proper operation.

1. Open the door and remove the bottom rack.
2. Pull the bottom spray arm straight up to release.

3. Remove any deposits using a needle or something similar. The washer arms also have holes underneath.
4. To reinstall, center the base of the spray arm in the hole and push straight down until it clicks into place.
5. Replace the bottom rack.
6. To release the top spray arm, first remove the top rack. Pull the top rack out until it stops. Turn both rack stops outwards on the rack mounting rails (see diagram). Pull the rack toward you to remove it.

7. Remove the top spray arm in the same way as the bottom arm and clean it. Reinstall the top spray arm the same way as the bottom one.
8. Reinstall the top rack by inserting the rollers on the base of the rack into the slots on the rack mounting rails. Turn both rack stops inward to lock the rack into place.

### Before You Call for Service

<table>
<thead>
<tr>
<th>Problem</th>
<th>May Be Caused By</th>
<th>What to Do</th>
</tr>
</thead>
<tbody>
<tr>
<td>Water left in bottom of dishwasher near filters, dishwasher will not drain</td>
<td>Dishwashing cycle not complete</td>
<td>Allow dishwasher to complete cycle.</td>
</tr>
<tr>
<td>Obstruction in the drain hose or air gap is plugged</td>
<td>Check for kinked drain hose. Disconnect end of drain hose. Check for debris in hose or any other part of drain/plumbing system. <strong>NOTE:</strong> Cone-shaped part of hose must be at least 1/2&quot; (1.3 cm).</td>
<td></td>
</tr>
<tr>
<td>Filter system clogged</td>
<td>Clean entire filter system. See page 14.</td>
<td></td>
</tr>
<tr>
<td>Debris in the drain pump</td>
<td>Clean the drain pump/filter system. See page 14.</td>
<td></td>
</tr>
<tr>
<td>Door will not close</td>
<td>Racks not slid in all the way</td>
<td>Check to make sure there is nothing blocking the rack(s) from rolling all the way into the dishwasher.</td>
</tr>
<tr>
<td>1 minute appears on the display</td>
<td>The program is taking longer than estimated.</td>
<td>None. Next time the program is run, the corrected time will be displayed.</td>
</tr>
<tr>
<td>Unusual noise</td>
<td>Improper loading</td>
<td>Utensils may not be secure or something small may have dropped from the rack. Water may cause utensils to rattle. Make sure dishware is secure.</td>
</tr>
<tr>
<td></td>
<td>Spray arms not rotating properly</td>
<td>Make sure that both spray arms rotate freely. Make sure that items do not obstruct movement of spray arms. If necessary, clear any obstructions.</td>
</tr>
<tr>
<td></td>
<td>Drain pump makes droning sound that can be heard from outside dishwasher and does not stop when main power switch is turned off</td>
<td>Overflow protection has engaged and is pumping water out of the dishwasher. Turn off water valve, disconnect power and call for service.</td>
</tr>
<tr>
<td>Bad odor in washing compartment</td>
<td>Door seal and surrounding area (corners) dirty</td>
<td>See instructions for cleaning door on page 13.</td>
</tr>
<tr>
<td></td>
<td>Low temperature cycles have been selected for a prolonged period</td>
<td>Run a cycle with a higher temperature about once a month.</td>
</tr>
<tr>
<td>Detergent left in detergent compartment (detergent compartment will not open)</td>
<td>Dispenser lid blocked</td>
<td>Detergent lid may not be opening. Check for items blocking it.</td>
</tr>
<tr>
<td></td>
<td>Old detergent</td>
<td>Do not use detergent that is hard or caked inside box. Use only fresh detergent. Add detergent to dishwasher just before starting it.</td>
</tr>
<tr>
<td></td>
<td>Spray arms do not rotate properly</td>
<td>Make sure that both spray arms rotate freely. Make sure that items do not obstruct movement of spray arms. If necessary, clear any obstructions.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Make sure holes in spray arms are not blocked. If necessary, clean spray arms. See page 15.</td>
</tr>
<tr>
<td>Dishes not dry</td>
<td><strong>Drying</strong> option needed</td>
<td>Select the <strong>Drying</strong> option for higher temperature rinse and better drying.</td>
</tr>
<tr>
<td></td>
<td>No rinse agent or rinse agent dispenser not set properly</td>
<td>Fill rinse agent dispenser. Rinse agent helps dishes to dry faster. Check rinse agent dispenser setting.</td>
</tr>
<tr>
<td></td>
<td>Plastic items</td>
<td>Certain plastic materials are difficult to dry. Plastics may need to be towel dried. Also try opening door after cycle is complete.</td>
</tr>
</tbody>
</table>

**continued....**
<table>
<thead>
<tr>
<th>Problem</th>
<th>May Be Caused By</th>
<th>What to Do</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dishes not dry (cont.)</td>
<td>Improper loading or unloading</td>
<td>Do not overload, under-load or nest items. Make sure dishwasher is loaded according to instructions starting on page 6.</td>
</tr>
<tr>
<td></td>
<td>Dry cycle interrupted</td>
<td>Door opened too soon. Make sure dry portion of cycle is complete before opening door.</td>
</tr>
<tr>
<td>Chipping or breaking of glassware</td>
<td>Improper loading</td>
<td>Do not overload. Load between rack prongs, not over them. Glasses loaded over prongs will not be supported and may chip or break. Make sure glassware is secure and can’t come loose. Always use the top rack for delicate items.</td>
</tr>
<tr>
<td>Dishes are not clean</td>
<td>Spray arms do not rotate properly</td>
<td>Make sure that both spray arms rotate freely. Make sure that items do not obstruct movement of spray arms. If necessary, clear any obstructions.</td>
</tr>
<tr>
<td></td>
<td>Incorrect detergent use</td>
<td>Use only correct amount of dishwasher detergent according to water hardness. See page 8. Fill dispenser only when ready to start the dishwasher. Do not use old or caked detergent. Store dishwasher detergent in dry place and in a closed container. Change the dishwasher detergent if results are still poor.</td>
</tr>
<tr>
<td></td>
<td>Cycle selected is too short</td>
<td>Select normal or heavy wash cycle.</td>
</tr>
<tr>
<td></td>
<td>Incorrect loading</td>
<td>Make sure dishes and flatware are loaded properly. See Loading Your Dishwasher section. Make sure all items are loaded securely and do not tip over. Avoid placing very tall glasses in the corners of the rack.</td>
</tr>
<tr>
<td></td>
<td>Filter system clogged or not installed properly</td>
<td>Make sure filter system is clean and properly installed. See page 14.</td>
</tr>
<tr>
<td></td>
<td>Detergent build-up in dishwashing compartment</td>
<td>Pour a teaspoon to tablespoon of citric acid crystals or white vinegar into the pre-wash compartment in the detergent dispenser. Run a normal cycle with no dishes.</td>
</tr>
<tr>
<td></td>
<td>Chucks of food left on dishes or in dishwasher compartment due to drain outlet cover being removed</td>
<td>Check to make sure drain outlet cover is in place. See page 14.</td>
</tr>
<tr>
<td>Whitish-blue sticky film on dishes</td>
<td>To much rinse agent</td>
<td>See page 12 to change rinse agent dispenser setting. If water is very soft, you may need to dilute the rinse agent, see page 9.</td>
</tr>
<tr>
<td></td>
<td>Using liquid rinse agent with a detergent that already contains rinse agent</td>
<td>Do not use rinse agent with detergent that contains rinse agent or change detergent type.</td>
</tr>
<tr>
<td>Distortion of plastics</td>
<td>Plastic item not dishwasher safe</td>
<td>Do not wash plastic items in dishwasher that are not “dishwasher safe.”</td>
</tr>
<tr>
<td>Marks on melamine and plastics</td>
<td>Porous material</td>
<td>Use a special cleaner for plastic.</td>
</tr>
<tr>
<td>Problem</td>
<td>May Be Caused By</td>
<td>What to Do</td>
</tr>
<tr>
<td>-------------------------------</td>
<td>--------------------------------------------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Spotting and filming</td>
<td>Hard water/incorrect use of dishwasher detergent</td>
<td>Use correct amount of dishwasher detergent or change detergent type. See page 8. <strong>NOTE:</strong> phosphate free detergents do not work well with hard water. You may need a home water softener.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>No rinse agent</td>
<td>Make sure rinse agent dispenser is full.</td>
</tr>
<tr>
<td></td>
<td>Rinse agent dispenser not set correctly</td>
<td>See pages 9 and 12.</td>
</tr>
<tr>
<td></td>
<td>Too little water</td>
<td>Make sure water valve is fully open. Make sure that water pressure is between 4.2 and 140 psi and flow rate is a minimum of 3.0 gpm.</td>
</tr>
<tr>
<td></td>
<td>Spray arms do not rotate properly</td>
<td>Make sure that both spray arms rotate freely. Make sure that items do not obstruct movement of spray arms. If necessary, clear any obstructions.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Make sure holes in spray arms are not blocked. If necessary, clear holes with a pointed object and rinse under water.</td>
</tr>
<tr>
<td></td>
<td>Strainer blocked</td>
<td>Check strainer. Clean if necessary.</td>
</tr>
<tr>
<td>Etching</td>
<td></td>
<td>Washing at too high a temperature and/or using too much detergent can cause etching on (crystal) glass (a permanent condition). To prevent damage, wash (crystal) glass at <em>normal</em> temperature and dispense dishwasher detergent according to page 8.</td>
</tr>
<tr>
<td>Marks, discoloration or other stains</td>
<td>Aluminum utensils rubbing against items during wash cycle</td>
<td>Be sure aluminum utensils, especially light weight, foil-type pans, do not touch dishes.</td>
</tr>
<tr>
<td></td>
<td>Lipstick and tea can be difficult to remove</td>
<td>Change to a dishwashing detergent with bleach.</td>
</tr>
<tr>
<td>Yellow or brown marks</td>
<td>Iron or manganese in water</td>
<td>To remove spots, use a non-abrasive cleaner.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Temporary solution: Pour a teaspoon to tablespoon of citric acid crystals in place of the pre-wash detergent in the detergent dispenser. Follow this pre-wash with a full detergent wash. Use the <strong>Heavy Wash</strong> cycle.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Permanent solution: Install an iron removal system in the water supply.</td>
</tr>
<tr>
<td></td>
<td>Washing copper with sterling silver</td>
<td>Yellow film on sterling silver results when you wash copper utensils in the same load. Silver polish will usually remove this type of stain.</td>
</tr>
<tr>
<td></td>
<td>Tea or coffee (tannic acid) stains</td>
<td>Remove tea or coffee stains by hand using a solution of ½ cup bleach and three cups warm water. Do not use on sterling silver or silver plate.</td>
</tr>
<tr>
<td>Discoloration of stainless steel, silver plate</td>
<td>Allowing salty or acidic foods to remain on flatware</td>
<td>Rinse flatware that is to stand several hours before washing or run <strong>Rinse and Hold</strong> cycle.</td>
</tr>
<tr>
<td></td>
<td>Silver contacting stainless steel or aluminum</td>
<td>Do not put flatware made of different materials in the same silverware basket compartment. Direct contact to stainless steel can cause permanent damage to silver.</td>
</tr>

Getting Help

Before you request service, please review the Problem Solution Guide starting on page 16. If you have performed the checks in the Problem Solution Guide and the problem has not been remedied, please contact us at one of the numbers below. Prior to requesting service, it is helpful to be familiar with the warranty terms and conditions listed in the Warranty section on this page.

For warranty repairs, call:
Dacor Distinctive Service:
Phone: (877) 337-3226 (U.S.A. and Canada)
Business Hours: 6:00 AM - 4:00 PM Pacific Time

For a list of Dacor service agents for non-warranty repairs:
Dacor Customer Service:
Phone: (800) 793-0093 (U.S.A. and Canada)
Business Hours: 6:00 AM - 5:00 PM Pacific Time

Contact us through our web site at:
www.dacor.com

At Dacor, we believe that our quality of service equals that of our product. Should your experience with our service network or product be different, please contact our Customer Service Team and share your encounter with us. We will do our utmost to resolve the situation for you and deliver on our Dacor promise. If you need anything clarified, just let us know.

Warranty

What is Covered:
CERTIFICATE OF WARRANTIES: DACOR DISHWASHERS

If your DACOR product fails to function within one year of the original date of purchase, due to a defect in material or workmanship, DACOR will remedy the defect without charge to you or subsequent users. The owner must provide proof of purchase upon request and have the appliance accessible for service.

TWENTY-FIVE YEAR WARRANTY

On rust-through of stainless steel tank and door.

Warranty is null and void if non-CUL approved product is transported from the U.S.
Please visit www.dacor.com to activate your warranty online.

WARRANTY INFORMATION

IMPORTANT:
Your warranty will not be activated until you activate it online or return this form to Dacor. If you have purchased more than one Dacor product, please return all forms in one envelope or activate the warranty for each product online.

Please rest assured that under no conditions will Dacor sell your name or any of the information on this form for mailing list purposes. We are very grateful that you have chosen Dacor products for your home and do not consider the sale of such information to be a proper way of expressing our gratitude!

Your willingness to take a few seconds to fill in the section below will be sincerely appreciated. Thank you.

1. How were you first exposed to Dacor products? (Please check one only.)

   A. T.V. Cooking Show
   B. Magazine
   C. Appliance Dealer Showroom
   D. Kitchen Dealer Showroom
   E. Home Show
   F. Builder
   G. Architect/Designer
   H. Another Dacor Owner
   I. Model Home
   J. Other

2. Where did you buy your Dacor appliances?

   A. Appliance Dealer
   B. Kitchen Dealer
   C. Builder Supplier
   D. Builder
   E. Other

3. For what purpose was the product purchased?

   A. Replacement only
   B. Part of a Remodel
   C. New Home
   D. Other

4. What is your household income?

   A. Under $75,000
   B. $75,000 – $100,000
   C. $100,000 – $150,000
   D. $150,000 – $200,000
   E. $200,000 – $250,000
   F. Over $250,000

5. What other brands of appliances do you have in your kitchen?

   A. Cooktop
   B. Oven
   C. Dishwasher
   D. Refrigerator

6. Would you buy or recommend another Dacor product?

   A. Yes
   B. No
