

5. Replace the oil plug and tighten securely.
6. Dispose of oil according to local, state and federal laws and regulations.

### **Brushes (Fig. 19)**

Inspect carbon brushes regularly by unplugging the saw, removing the end cap (W) located above the depth adjustment lever (B) and withdrawing the brush assembly. Keep brushes clean and sliding freely in their guides. Always replace a used brush in the same orientation in the holder as it was prior to removal.

Carbon brushes have varying symbols stamped into their sides, and if either brush is worn down to the line closest to the spring, the brushes must be replaced. Use only identical DEWALT brushes. New brush assemblies are available at your local service center. Always replace the end cap after inspecting or servicing brushes. The tool should be allowed to “run in” (run at no load without a blade) for 5 minutes before use to seat new brushes. While “running in” **DO NOT TIE, TAPE, OR OTHERWISE LOCK THE TRIGGER SWITCH ON. HOLD BY HAND ONLY.**
