PROFESSIONAL DESIGN, PROFESSIONAL COOKING

The microwave was one of the greatest inventions of all time; providing a faster way to cook a meal, or heat up a side dish. But what if you just need to keep a dish warm without overcooking it? This LG microwave comes with a warming lamp so you can keep food warm and ready to serve for up to 90 minutes. And with an Extenda™ Vent, your kitchen air will stay fresh for the moment you're ready to enjoy it.

Extenda™ Vent

Over-the-Range microwaves have always been great at capturing the smoke from the back burners of your stove top, but not the front burners. LG introduces the Extenda Vent, which covers the entire cooking surface allowing for even greater ventilation.

QuietPower™ Ventilation System

With an Over-the-Range Microwave Oven, strong ventilation is key. That's why LG has created the QuietPower vent, which does the job quietly, without interrupting your life.

Warming Lamp Feature

Keep your food warm and ready to serve for up to 90 minutes. The warming lamp uses a radiant heating lamp to keep food warm.
