About A19

The Art of Lighting

Since 1998, A19 has been fueled by inspiration – inspiration that is reflected in every aspect of our work. When you purchase an A19 product, we invite you to share in the passion and inspiration of our artists – and the company – that create superior one-of-a-kind pieces of art.

We go to great lengths to ensure that each ceramic and glass lighting fixture carries our distinct signature of quality. A19 successfully blends innovative vision with the traditions of gifted artisans.

Customized Just for You

Whether your tastes run from traditional to rustic to modern, each piece is customized to your exact needs. It's all up to you: you can choose to keep the fixtures in their natural ceramic state or specify a range of custom finishes, glazes and decorations.

The name "A19" is a bit of a tongue-in-cheek reference to your standard household light bulb. But, as you'll discover, we're a company that is anything but ordinary.

All our products – from beginning to end – are made by hand in Southern California. Our wall sconces and pendants are designed, molded, fired, sanded, finished, assembled and shipped directly from our factory.

Just as important, we work hard to ensure consistent quality and guarantee your 100% satisfaction.

The A19 Story

Like many creative and successful businesses, the idea for A19 began on the back of a cocktail napkin. Owner Cinnamon Alvarez and a friend sat down at a local watering hole and dreamily hatched their plans to run their own shows. They'd do what they really loved and inspired them. They'd treat their employees like family. They'd make their own hours. They'd never work weekends and they'd take long vacations. They'd change the world! (Okay, maybe they'd just make a difference.)

At the start of the next workweek, Cinnamon sat down with her boss, looked him square in the eye and launched into her jaw-dropping proposal: She either wanted to purchase the company or start one of her own. To her surprise, he thought it was a great idea and encouraged her to explore purchasing the business.

Flash forward to a couple of months later. Reality soon set in; crunching numbers and creating a business plan made it clear there was much more to this entrepreneur thing than vision and determination. Cinnamon needed support – and lots of it. So her ex-boss became her mentor; she then approached key co-workers – each an exceptionally talented craftsman – to see if they were passionate enough to make a go at starting a new company. And A19 was born.

That was 1998, and the drive to create the highest quality handmade lighting fixtures, to provide attention and service unparalleled in any business, is a continuing success.

Committed to the Community – and the Environment

A19 is much more than a lighting company. Woman-owned and operated in a close family-style environment, we respect the impact our business has on the social and physical environment. We recycle the clay we use to create the lighting fixtures, filter the water we use before it leaves our factory, and use recycled boxes, bubble wrap and office materials.

We developed new ways to make our manufacturing energy efficient without compromising product quality. The clay bodies and glazes that we use require less energy to create our durable, long-lasting fixtures. And, the kilns we use are specifically calibrated for energy efficiency.

Additionally, we believe in sourcing our materials as locally as possible to help build employment in the region and keep money in the area, as much as in reducing fuel usage and the carbon footprint.

All of Our Products are Green

Sustainability is at the heart of everything that we do. For example, our ceramic and glass – two of the world's oldest materials – are made from natural clay (earth) and silica (sand). Following is how we continue to create products that support the environment and our clients' health:

- **Reduce, reuse, recycle.** A19 has both recycling and reclaiming programs in place. Besides reclaiming nearly every speck of clay, every shard of glass, and every drop of water involved in manufacturing, we sort recyclables and "trash," which is recycled locally. Additionally, A19's packaging is made from recycled content and is fully recyclable.
- **Storm water.** A19 participates in a city storm water management program in compliance with the provisions of the Federal Clean Water Act to protect water quality by preventing the introduction of pollutants.
- **Safety.** The clays that we use in our fixtures have been evaluated by a nationally certified toxicologist using the American Society for Testing and Materials standards. Our clays do not contain any material in sufficient quantity to be toxic or to constitute a chronic health hazard.
- **No off-gassing.** A19's ceramic wall sconces and pendants are inert and odorless, and outlast comparable metal lighting fixtures.
- **Energy Star compatible.** A19 fixtures are available to accommodate Energy Star compact fluorescent light bulbs.
- **Dark-Sky compliant.** Many of our wall sconces help reduce light pollution based on the International Dark-Sky Association's requirements. Artificial light at night has been shown to affect the mating, migration, and predation behaviors of many different species, and consequently, the ecological community as a whole. Whether outdoor light is directly adjacent to a species habitat or located at some distance, as through sky glow, the combined effects of artificial lighting on vast numbers of nocturnal species have the potential to disrupt the functioning of entire ecosystems by disrupting balances in competition and predation.

The reFusion Collection

Elegant, sustainable, affordable art glass

"You must be the change you wish to see in the world," said Mahatma Gandhi. A19's reFusion Collection seeks to make a difference in people's lives – as well as the environment – by incorporating recycled window glass from local sources into stunning new pieces of art glass.

The special, one-of-a-kind pieces can add a unique touch to any room – whether it's a luxurious bathroom, a dream master bedroom suite, inviting dining room or gourmet kitchen.

Rethinking the standard light fixture

Recycled fused glass takes lighting to the next level by creating an amazing array of textures, colors and patterns that have an organic, natural feel – including bubbles, speckles and crackles. It's something you won't find anywhere else but from A19.

But beautiful doesn't mean these fused-glass pieces aren't as sturdy and functional as our other fixtures. Each piece in the reFusion Collection is hand-made to A19's exacting standards. Their ceramic bases ensure that use in a damp location, such as a bathroom, won't harm the fixture. Additionally, we also offer incandescent and Energy Star fluorescent options to meet any needs, and many of our sconces also meet American with Disabilities Act (ADA) requirements by having a depth of four inches or less.

Where hand-crafted design meets "green"

Our reFusion Collection turns recycled glass into long-lasting, stunning, functional pieces of art that will be admired and appreciated for generations to come.

We invite you to take a look at the range of unique styles we have to offer.

How to order

To order any wall sconce from the reFusion Collection, simply choose the item number for the style you prefer.

For energy efficiency, choose our compact fluorescent and add the code CFL13 to the item number.

Damp or Wet

A19's standard light fixtures are UL listed for damp locations. Any location, indoors or out, is considered to be a "damp" location—as long as the fixture is not in direct contact with water. Outdoors under an eave, for instance, would be "damp."

Wet locations are unsheltered outdoor areas that are exposed to direct contact with rain and require fixtures to be ordered with an "outdoor/wet location" option.

ADA Compliance

Fixtures with a depth of 4 inches or less meet the handicap projection requirements set forth by the American Disabilities Act (ADA).

Options legend (add code for desired option to fixture item #)

LAMPING OPTIONS	CODE	DESCRIPTION
Standard		60W Candelabra base (Bulb not included).
Compact Fluorescent	CFL13	13W GU24 base, Energy Star rated (Bulb included).
Outdoor / Wet Location	WET	Single outdoor sheltered socket for wet locations (this is an open-top fixture suitable for rainy locations; use bulb coated for shatter resistance) (Bulb not included).
	WETST	Sealed Top for Wet Location (Available with CFL options only; <i>add CFL codes to the order number</i>).
	WETL	Wet Location Label (For Downlights, where the socket is sheltered by the fixture).

The Studio Collection

Stylish and dramatic

This fresh, modern collection can add an unexpected spark to a traditional setting or create visual punch to a contemporary interior. These low-voltage mini-pendants offer bountiful light, as well as a wide variety of hand-applied glazes that make any public or private space seem magical.

Specialized design

From the hippest sushi bars to chic kitchen islands, the sky's the limit with Studio Collection's ever-evolving collection of pendants. Spotlight a cozy, romantic nook or dramatically transform an entire space with these bold, contemporary pendants.

Ready to hang

Because we all enjoy a bit of instant gratification, A19's Studio Collection pendants include everything that you need to install them immediately. Just grab an electrician and go!

Each pendant includes a mono-point dome canopy with an integrated 12V electronic transformer; 6-foot adjustable cable with Quick Connector; hang-straight sleeve; breathtaking, hand-made ceramic shade with fired-on glaze finish; and a 35W MR16 bulb with protective lens.

Easy to integrate into your space

The Studio Collection's pendants are flexible as well as beautiful. If you have an existing low-voltage system, any Studio Collection pendant can be easily integrated using our Quick-Jack connectors. These are the same as those used by other lighting manufacturers such as ALFA, LBL, WAC and TECH Lighting for a seamless integration into your environment.

Pendants that enhance the beauty of any room

Any one of our lead-free colored glazes can greatly enhance the beauty of our mini-pendants. Choose a glaze that blends seamlessly with your décor or an eye-catching one that really makes your space pop. Take a look at the variety of colors that we have.

How to order

To order any pendant from the Studio Collection, simply choose the item number for the style you prefer.

Changing the glaze of a particular style can create a completely different look. Simply change the last two digits of the item number to the color code for the glaze of your choice.

Please remember to add “-X” on your order if you want the fixture without the standard mono-point canopy.

Options legend (add code for desired option to fixture item#)

LAMPING OPTIONS	CODE	DESCRIPTION
Standard		35W 12V MR16 Halogen (Bulb included).
LED	LED-MR16	12V MR16 LED (Bulb included).
Quick Jack Connector		Included with each pendant. The same connector used by popular lighting manufacturers allows for easy connection to an existing low-voltage system.
Cable		6 foot adjustable 250° coaxial cable.
Mono-Point Canopy		Mono-Point Canopy, brushed-nickel finish (The mono-point canopy included with pendant has an integrated 60W 12V electronic transformer).
No Canopy	-X	For use with existing hardware.
3 Point Canopy	LVC3R-BN	Create a chandelier-style cluster with 3 fixtures.

Stunning glazes turn ceramic shades into handcrafted works of art

The Studio Collection offers a choice of glazes – from glossy and matte to the organic looks found in nature. Each glaze is carefully applied by hand and fired in a kiln, which gives every pendant a unique look that is the hallmark of a handcrafted product. No two shades are ever alike!

Please note that the actual patterns and colors may vary a bit from the samples shown. It's what truly makes each shade a piece of art.

BG - Black Gloss

MB - Matte Black

CB - Cobalt Blue

BT - Butternut

PJ - Plum Jam

FC - Firecracker

MR - Matador Red

GM - Gunmetal

PS - Pistachio

RF - Rainforest

RR - Red Rock

SG - Sagebrush

SP - Spice

SY - Sunflower Yellow

TC - Teal Crackle

TN - Tan

SS - Sandstorm

WC - White Crackle

WG - White Gloss

MW - Matte White

Mono-Point Canopy

To make installation quick and easy, A19 includes one mono-point canopy and QDF Quick-Jack connector with each pendant. All you need to do is simply plug in the Quick-Jack connector and turn it to lock it in place. It's that simple. The brushed nickel mono-point canopy features an integrated 12V electronic transformer and operates with a standard incandescent dimmer.

Size: 4.5 inches wide x 1.75 inches high

3-Point Round Canopy

With our 3-point round canopy, we make clustering or creating a chandelier-style fixture a piece of cake. This gorgeous brushed nickel canopy allows you to mount any three pendants to a single junction box. The kit includes an integrated 12V electronic transformer and operates with a standard incandescent dimmer.

Size: 7.5 inches wide x 2.25 inches high

The Nature Collection

Peaceful, beautiful, harmonious with nature

"One touch of nature makes the whole world kin." Those words of William Shakespeare bring us together hundreds of years later, and A19's Nature Collection serves to bring the 21st century and the natural world together in one dynamic collection.

Handcrafted, of course

Made of high-quality ceramics and decorated with stunning faux finishes, these hand-molded pendants and wall sconces were created to resemble all the colors, textures and designs you find in nature. The advantages of ceramic over the real natural material is that while the fixture may look like bamboo, it is substantially more durable.

Remarkably weather-resistant

A19's ceramic fixtures have an advantage over other natural products. Ceramic is incredibly weather-resistant and won't rust, corrode, or decay over time.

Options galore

A19's Nature Collection offers incandescent options for both damp and wet environments, as well as Energy Star fluorescent and ADA-compliant fixtures. Additionally, all of our pendants come with your choice of black or white canopy and six feet of matching cord that can be cut to your preferred length.

If you're looking for an alternate color combination or have an idea you don't see, simply give us a call at (800) 664-4204. We'll work with you to create just the right fixture.

Options legend (add code for desired option to fixture item #)

LAMPING OPTIONS	CODE	DESCRIPTION
Standard		100W A19 Medium base (Bulb not included).
Compact Fluorescent	CFL13 or CFL26	13W or 26W GU24 base, Energy Star rated (Bulb included).
Halogen	HAL	100W Medium base, double envelope halogen bulb (Bulb included).
Outdoor / Wet Location	WET	Single outdoor sheltered socket for wet locations (this is an open-top fixture suitable for rainy locations; use bulb coated for shatter resistance) (Bulb not included).
	WETST	Sealed Top for Wet Location (Available with CFL options only; <i>add CFL codes to the order number</i>).
	WETL	Wet Location Label (For Downlights, where the socket is sheltered by the fixture).
Pendant Cord & Canopy	WCC	White Cord & Canopy (6 ft cord).
	BCC	Black Cord & Canopy (6 ft cord).

How to Order

To order any wall sconce or pendant from the Nature Collection, simply choose the item number for the style you prefer and add the code for any desired option(s).

Damp or Wet

A19's standard light fixtures are UL listed for damp locations. Any location, indoors or out, is considered to be a "damp" location—as long as the fixture is not in direct contact with water. Outdoors under an eave, for instance, would be "damp."

Wet locations are unsheltered outdoor areas that are exposed to direct contact with rain and require fixtures to be ordered with an "outdoor/wet location" option.

ADA Compliance

Fixtures with a depth of 4 inches or less meet the handicap projection requirements set forth by the American Disabilities Act (ADA).

Dark-Sky & Light Pollution Reduction Efforts

Fully shielded downlights are available by request to meet IDA's Dark-Sky standards and other growing outdoor lighting regulations. They direct all light downward, where it is needed, rather than outward and upward where it contributes to sky glow, light trespass and other forms of light pollution. Artificial light at night has also been shown to affect the mating, migration, and predation behaviors of many different species (including turtles), and consequently, the ecological community as a whole.

The Silhouette Collection

**Dramatic, sophisticated, uniquely modern
or warmly nostalgic**

Since ancient times, the art of the silhouette has focused on a person, object or scene in a backlit setting. It's an intriguing technique when you apply it to lighting fixtures, and the ambience that it creates can transform an ordinary room into a designer showcase.

A19's distinctive Silhouette Collection features intriguing images painted by hand onto the reverse side of a translucent lens. When combined with one of our hand-crafted ceramic wall sconces, the resulting silhouette is breathtaking.

Suitable for almost every environment

One of the great advantages A19 offers is that all of our ceramic fixtures are resistant to harsh weather conditions. We have ADA-compliant fixtures, ones with closed tops for wet locations, and all of our products are engineered to be rust and corrosion free.

Additionally, our Silhouette Collection fixtures use Energy Star-compliant compact fluorescent lamps. These bulbs use up to 76% less energy while lasting up to 13 times longer than traditional light bulbs.

Unique hand-made fixtures made in America

Unlike other fixtures you may find, A19's are 100% made in America, and each piece is a one-of-a-kind piece of functional art.

The Silhouette Collection

34

Customized to your unique needs

We offer flexibility in our Silhouette Collection. Keep the ceramic frame in the standard white finish or choose from more than 50 paint colors, faux finishes or glazes.

Light up your own design or logo. Simply give us a call at (800) 664-4204. We'll work with you to create just the right fixture.

How to Order

To order a wall sconce from the Silhouette Collection, simply choose the item number for the style you prefer and add the code for any desired option or finish.

ADA Compliance

Fixtures with a depth of 4 inches or less meet the handicap projection requirements set forth by the American Disabilities Act (ADA).

Damp or Wet

A19's standard light fixtures are UL listed for damp locations. Any location, indoors or out, is considered to be a "damp" location—as long as the fixture is not in direct contact with water. Outdoors under an eave, for instance, would be "damp."

"Wet" means the fixture could be in direct contact with water. For instance, on a patio where rain could fall directly on the fixture, add our sealed top for wet location option (WETST).

Options legend (add code for desired option to fixture item#)

LAMPING OPTIONS	CODE	DESCRIPTION
