

15" Marvel Clear™ Ice Machine

Model # 30iM****

- Produces up to 34 lbs of clear ice in 24 hours and stores up to 30 lbs
- Ice cutter ensures consistent cube size and shape
- Sound-buffering ice deflector greatly reduces cube impact noise
- High efficiency, low maintenance condenser design for built-in zero clearance installations
- Equipped with cleaning mode
- Ice scoop included
- Available with or without factory-installed drain pump
- Close Door Assist System™ gently and automatically closes door
- Height adjustment up to 1" with leveling legs
- Filler kit available for 18" wide opening
- 4" black adjustable toe kick
- 1-year warranty

Storage Capacity

Up to 30 lbs of clear ice

Product Dimensions

14 $\frac{7}{8}$ " W x 33 $\frac{3}{4}$ " minimum H x 25 $\frac{5}{8}$ " D (including handle)

Accessories

16-oz Ice Machine Sanitizer (see page 58)

4-oz Ice Machine Cleaner (see page 58)

Finish/Door Options

Stainless Steel

White

Black

Wood Overlay
(Panel Ready)

Overlay Panels

Figure 11

Model	W	H
30iMT	14 ⁵ / ₈ " (37.1cm)	30 ³ / ₁₆ " (77.0cm)

Table A

Set the overlay panel on the door front, align the edges, and clamp together. Clamp the panel firmly but be careful not to damage the door or the panel. Mark center of hinge adapter hole on wood panel, top and bottom. (See Figure 12.) Remove wood panel from door and drill 5/16" (8mm) diameter clearance holes into the overlay panels 3/4" (20mm) deep. These will be clearance holes for the top and bottom hinge pins.

This is also a convenient time to locate and drill the holes for your handle. Most often the handle is to match that of the surrounding cabinetry. If your handle attaches from the back-side of the custom panel, locate the mounting holes while the panel is attached to the door and cabinet. After the panel is removed from the door, drill the mounting holes from the front, to the recommended diameter of the handle manufacturer. Counter bore the back-side of the panel so the screw heads do not interfere with the surface of the door.

Re-clamp the panel to the door per step 5 and drill the screw pilot holes for attaching the overlay panel to the door. Select the size of the hole from Table B. Be careful not to drill the pilot holes through the overlay panel, (1/2" (12.7mm) deep for 3/4" (19mm) and 5/8" (15.7mm) panels).

Material Type	#8 Wood Screw
Hardwood	1/8" (3.2mm) Diameter. Pilot Hole
Softwood	7/64" (2.8mm) Diameter. Pilot Hole
