Measurement in inches

**A:** Installation area for the power connection.

**B:** Area for running the water line. It is recommended that the water-box is placed adjacent to the installation niche, so that it can be accessed for service without uninstalling the appliance. If this is not possible, place the recessed water-box adjacent to the water supply socket elevated at **the heights indicated in areas A and B.**

**D:** Niche depth depends on kitchen design. For a flush installation, the depth needs to be at least 24 inches plus the thickness of the door panel. Panel dimensions based on a standard 1/8 inch reveal and 4 inch toe kick. Custom panel dimensions may vary depending on kitchen reveals and toe kick. Stainless steel models contain a panel-ready base unit, ready-to-install stainless steel door(s) with a right or left door swing and handle(s).
