PRODUCT DIMENSIONS

CABINET OPENING DIMENSIONS

To ensure proper ventilation for your wine cellar, allow for a $\frac{1}{4}$ " (6.35 mm) space on each side and at the top. When installing your wine cellar next to a fixed wall, leave $2\frac{1}{2}$ " (6.35 cm) minimum clearance on each side to allow for the door to swing open.

NOTE: It is recommended that you do not install the wine cellar near an oven, radiator, or other heat source. Do not install in a location where the temperature will fall below 55°F (13°C). For best performance, do not install the wine cellar behind a cabinet door or block the base grille.
