**Uses Least
Energy**

621

kWh/year (kilowatt-hours per year) is a measure of energy (electricity). Your utility company uses it to compute your bill. Only models with a capacity of 14 cubic feet and the above figures are used in this section.

Freezers using more energy cost more to operate.
This model's estimated yearly operating cost is

\$51

Based on a 2001 U.S. Government national average cost of \$0.10 per kWh for electricity.

Your actual operating cost will vary depending on your local utility rates and

Important: Removal of this label before consumer purchase violates the Federal Trade Commission's Appliance Labeling Rule (16 C.F.R. Part 305).
