Uses Least Energy 194 Uses Most Energy 531

kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use. Your utility company uses it to compute your bill. Only standard size dishwashers are used in this scale.

Dishwashers using more energy cost more to operate. This model's estimated yearly operating cost is:

**\$21** 

when used with an electric water heater

when used with a natural gas water heater

Based on four washloads a week using the normal cycle and a 2004 U.S. Government national average cost of 8.60 cents per Kwh for electricity and 91.0 cents per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and your use of the product.
