kWh/year(kilowatt-hours per year) is a measure of energy(electricity) use.
Your utility company uses it to computer your bill. Only Compact size clothes washers
are used in this scale.

Clothes washers using more energy cost more to operate.
This model's estimated yearly operating cost is:

\$ 30

when used with an electric water heater

\$ 14

when used with a natural water heater

Based on eight loads of clothes a week and a 2004 U.S. Government national average cost of
8.60¢ per kWh for electricity and 91.0¢ per therm for natural gas. Your actual operating cost will
vary depending on your local utility rates and your use of the product.
