## **Installation Notes**

Install this product according to the installation guide.

Floor support under whirlpool must provide for a minimum of 48 lbs/square foot (231 kg/square meter) loading.

Hot water supply should be 70% of capacity or greater. Installations will vary.

If installing a rim-mount faucet, make sure there is no interference with drain overflow and circulating system before drilling any holes. Consult local and national codes for minimum air gap requirements if installing a spout on the faucet deck.

Pump must be relocated to custom position at the time of installation. Provide adequate clearance.

Fixtures conforms to CSA B45.5/IAPMO Z124. All dimensions are nominal.
