Matters Needing Attention

1. Do not install it near the inlet and outlet of cold and hot air in a humid environment, strong light exposure, so as not to affect the sensitivity and cause wrong action.
2. If the light is not on for the first time, please charge it before use.
3. When the light is dim and the battery is exhausted, please charge the product in time.
4. The sensing area of the product surface cannot be covered by other objects. When cleaning the product surface, it is necessary to wipe it with a soft dry cotton cloth.
5. Do not place the product on an unstable surface to prevent damage to the lamp body and sensor due to collision.
6. In case of failure during the warranty period, please do not disassemble this product without permission, otherwise it will not be guaranteed.
