

## CABINETS FOR ALL YOUR NEEDS GUIDE TO:

# USE & CARE

### Cabinet Care

#### Need to fight some grime?

- Wipe down outer or interior cabinet using a soft, clean, damp cotton or microfiber cloth.
- For extra grime fighting, a mix of dishwashing liquid (not dishwasher products) and warm water will do the trick. A 5% dishwashing liquid to 95% water is a good ratio.
- Dry up any residual moisture with a dry microfiber cloth.
- In order to avoid scratches or scuffing, only use a microfiber cloth to dry the cabinet

#### What about splatters and spills?

- Wipe up spills and splatters as quickly as possible.
- Grease or oil spills should be cleaned using the mild dishwashing solution mix mentioned above.
- Prolonged exposure to food, water, grease or oil splatters can cause permanent damage or discoloration to your cabinet's finish.
- Don't forget to use a microfiber cloth to dry the cabinet!

#### Glass door care.

- Clean the glass by spraying an ammonia-free glass cleaner on a clean lint free cloth or paper towel and wipe down the glass.
- Don't spray glass cleaner directly on the glass to avoid seepage behind mullions or dividers, which could cause damage to the wood or other materials.

## Nick's and scrapes

- Touch-up kits may be available to help hide surface damage on cabinetry.
- Please contact our customer service for assistance 1(877) 533-7729.

## Other things to be aware of.

- Don't hang or drape damp dishtowels or cloths over your cabinet doors. Moisture can cause permanent damage such as peeling, swelling or discoloration to the cabinet finish.
- Dry wet surfaces immediately.
- Maintaining a consistent temperature and humidity level with your home's environment is key to cabinet health.

## Products to avoid.

- Harsh detergents, strong soaps, multi-purpose and abrasive cleaning products.
- Scouring powders and scouring pads
- Steel wool or self-polishing waxes
- Solvent based or petroleum based products such as mineral spirits, nail-polish removers or paint thinners.
- Ammonia, bleach or cleaning products that contain either ammonia or bleach.
- Silicone based cleaning, waxing or polishing products.
