

Hands-free lighting for your auto or truck lift!

Optilumen LED Lift Kit:

Easy to Install

Magnetic backed components and quick connectors make installation so simple. Simply place the long strip on each column and the short strip on each arm, connect the wiring harnesses, install covers, and power the drivers.

See Everything Better

Our kit enables you to place an LED strip to the column and arm of each side to your lift, providing an abundant amount of light for your tasks.

Kit includes:

Two LED drivers, Two 42" LED strips with lens covers, Two 21" LED strips with lens covers, Two 6ft Quick-Connect Leads to strips
