Safty Rules

To avoid the risk of electric shock, personal injury or fire, please carefully follow the rules bellowed:

1. 1.Turn off the electricity to the fan at the main fuse box or circuit panel at the beginning.
2. All wiring must be in accordance with the local electrical codes or National Electrical Code.
3. Please use gloves when handling fan parts which have sharp edges.
4. Made sure the site you choose to install have enough space for the blades to rotate, meaning that at least 7 feet (2.13 meters) from the floor to the fan blades, 18 inches(45.72 centimeters) from the end of the blade to wall or other upright structures.
5. Please only mount the fan to an outlet box which marked acceptable for the fan and use mounting screws which compatible with the outlet box.
6. The outlet box and ceiling support structure must be securely mounted and capable of supporting at least 45KGs.
7. Be cautions when working around or cleaning the fan
8. Do not clean the fan or fan blades with water or detergents. A dry cloth or lightly dampened cloth with be recommended
9. After making electrical connections, spliced conductors should be turned upward and pushed carefully up into the outlet box. The wires should be spread apart with the grounded conductor and the equipment-grounding conductor on one side of the outlet box.
10. Electrical diagrams are for reference only.
11. 11.The fan is only for indoor use.

Install Mounting Bracket

To Prevent Personal Injury and Damage, Ensure That the Hanging Location Allows the Blade a Clearance of 7 Feet(2.13Meters) From the FLoor and 18 Inches(45.72 Centimeters)From any Wall or Obstruction.
For the concrete ceiling:

1. Turn Power OFF From the Electrical Fan Light Before Installation.
(Fig.1)

2.Mark the right sign on the ceiling with a Pencil and Mounting Bracket(Fig.1).

(Fig.2)

3.Drill ø6mm holes at the marked places, and Knocked the Expansion Screws in(Fig.2)

(Fig.3)

4.Finally, lock the hanger(Fig.3)
For the Wood Ceiling:

Mark the location for the ceiling fan first, secure the mounting bracket to the building structure with four wood screws provided.
NOTE: Hanger after the installation must be able to withstand the weight of 45kgs or more.

Assemble the Down Rod

1. Remove the DownRod Clip & Down Rod pin from downrod and loosen the set screws in the yoke(Fig.1)

2.Feed the fan wires through the yoke cover, canopy and down-rod(Fig.2)

3.Slide the downrod into the yoke of the motor assembly.Align holes and reinstall the downrod pin and downrod clip and secure with the two set screws.(Fig.3)

## Mount the Fan Module

Install the ball end of the downrod into the
opening of the mounting bracket (Fig.6).

**WARNING: Failure to align the slot in the ball
with the tap on the mounting bracket may ca
-use the fan to fall, which could result in injur
-y or death.**

Troubleshooting Guide

If you have difficulty operating your new ceiling fan, it may be the result of incorrect assemb
-ly, or wiring. In some cases,these installation errors may be regarded as defects of the LED
ceiling fan. If you experience any faults, please check this Trouble Shooting Guide. If problem
cannot be solved, please consult with your authorized electrician and please feel free to
contact us.

Before:
1. This is LED ceiling fan, DO NOT install any dimmer switch for this.
2. Install the Remote OR Wall Switch, DO NOT install both of them.
3. Check ciruit fuses or breakers and make sure the battery is installed correctly.
4. Check line wire connections to the fan and switch wire connections in the switch housing.

CAUTION: Make sure main power is off.

Problem:Fan dosen't work

- Make sure power switch is on.
- Check the circuit breaker to ensure the power is turned on.
- Make sure the blades spin freely.
- Turn off power from the circuit breaker, then loosen the canopy and check all the
  connections according to the wiring diagram.

Problem:Excessive Wobbling

- Make sure the blades are properly installed on the blade iron posts.
- Turn the power off, support the fan carefully, and check that the hanger
  ball is properly seated.
- Use the provided balancing kit and instructions to balance the fan.

Problem:Noisy Operation

- Make sure the blades are properly installed.
- Check to see if any of the blades are cracked. If so, replace all of the blades.

Problem:Remote Control of Fan is Erratic

- Make sure the battery is installed correctly.
- Install a fresh battery.
