Let's Build Something Together®

1 Choose your style

There are four carpet styles to choose from within our Simple Select Program. These are considered to be the most popular and also the most durable. Whether your home is traditional, contemporary, formal or casual, we have a carpet style that will work with your lifestyle.

Fashion Forward

These carpet yarns are cut and looped providing more stylized surface pattern options while still providing excellent durability. These patterns range from swirls to geometric shapes that work with many different décor styles throughout the home.

- High style with tailored patterns
- Excellent durability
- Cut and looped yarns

Textured

This carpet is well known for its yarn twist giving it the distinct “bounce back” feature in high traffic areas. This carpet’s ability to withstand high traffic and maintain its luxurious look makes it an excellent “whole house” carpet.

- Timeless and versatile
- Elegant look
- Textured resiliency

Frieze

These carpet yarns are highly twisted and form a curly textured surface which makes this perfect for rooms that see a lot of activity and demand durability.

- Thick, casual and comfortable
- Perfect for active areas
- Highly twisted yarns

Multi

This looped yarn carpet offers an excellent alternative to solids by providing coordinating colored flecks giving a unique character to any room. It has a reputation for its durability in high-traffic areas.

- High-traffic durability
- Complementary colored flecks
- Designed for carefree living

② Choose your color

When people think about getting new carpet, they usually think about color first. It's a perfect place to start. Bring in your paint chips, upholstery samples, fabric swatches or even your favorite throw pillow and we'll help you coordinate them with our Simple Select Program. We have a carpet color for every room in the house.

Basic Color Guidelines

Different colors affect our moods in different ways. You've decided chocolate brown, your favorite color, is going to be the main focus in your room. Before you buy a room full of brown flooring, consider the effect it will have on the overall appearance and mood of your room. Use the following descriptions as guides to create "color harmony" for every room in your house.

Neutrals

- Even though today's home furnishing trends are sparkling with more and more color, using neutrals is still your most practical, long-term, budget-friendly choice. Colors come and colors go, but neutrals always work with what's in style. The neutral color family includes a surprisingly broad range of hues, from white to black and a variety of browns and grays. Overall, lighter colors make a room seem larger while darker colors provide a cozy and close feel. Using these shades in your home can help you feel more centered and better able to prioritize your thoughts and actions.

Warm Colors

- Red is the color of expression, and will instantly "wake up" a room. Red is a color that can evoke lively conversation in a living room or stimulate appetite in a dining room.
- Orange is heating up home design, usually as an accent color. Orange can be subtle and sultry or fresh and vibrant, depending on the brightness and intensity.
- Yellow should be treated like sunlight. You want it around for happiness, but you don't want it to be overpowering. By using lighter shades and less vivid yellows, you can create sunny ambiance in your home.

Cool Colors

- Green is said to be the most restful color for the human eye. From emerald to sage, green in your home provides solace and peace.
- Blue is the “feel good” color of home decorating and is the most popular year after year. Blue is a color people connect with because we are surrounded by it – think sky and sea.
- Purple has long been associated with richness and mystery. Recently purple is getting more interest in home decorating. The purple family of colors makes your décor more imaginative and romantic.

Our carpet styles and colors have been coordinated to help you find the perfect solution for every room, every time.

③ Choose your price and warranty

We warranty every carpet we sell for abrasive wear and stain resistance. A texture retention warranty is offered on the 15 and 20 year products (complete details in store). Plus, we guarantee your total satisfaction during the initial ownership period up to 90 days (see associates for warranty exclusions).

Best

This carpet is well suited for heavy traffic areas.

Better

This carpet is well suited for normal traffic areas.

The length of Lowe's warranty coverage depends on the particular carpet. For your convenience, our entire carpet selection is organized and identified in store according to warranty length so you can more easily compare all the options available to you.

Note: If a carpet carries a warranty by a fiber and/or carpet manufacturer, the manufacturer's warranty takes precedence over the Lowe's warranty. For more details about Lowe's carpet warranties, please refer to the in-store Warranty Brochure.

Good

The carpet is well suited for light traffic areas.

Flooring Calculator

Once you have selected your product and identified the areas of your home you would like to carpet, you can estimate the cost of your project. The process is simple with these easy to follow steps:

1. Sketch the areas that need to be carpeted.
2. Measure the length and width of the areas you want to cover. Make sure the measurements are made at the longest points for both length and width.
3. After you have the measurements for each area, simply drop the numbers into the formula below.
4. Add the carpet cost and the cushion cost for each area to get an estimated project cost.

Cost Estimator

Width_____ x Length_____ = Sqft._____

Sqft._____ x 1.1 (overage) = Sqft. Needed____

Sqft. Needed_____ x Sqft. Carpet Cost_____

Sqft. Needed_____ x Sqft. Cushion Cost_____

Carpet Cost+Cushion Cost=Total Cost_____

Note: These are only estimates. In order to get an actual cost, a measurement will need to be scheduled so a trained installation specialist can calculate actual project cost. Additional footage may be needed for rooms larger than 12 ft. to accommodate seaming.

Cushion

Carpet and carpet padding go together in your home to make your flooring more comfortable underfoot, make your carpet last longer, reduce noise and help provide insulation. While the cushiony comfort of your carpet may feel like the most important reason for choosing particular padding, keep in mind that specific pads are designed to help extend the life of certain types of carpet. The right pad absorbs the impact burden, relieving stress on carpet backing and fibers.

Lowe's carries superior pads that help the carpet resist matting and crushing. It also provides **added comfort** reduces noise and adds longer wear life for the carpet. Carpets installed over cushion typically last much longer and are easier to maintain than carpet directly glued to the hard surface.

Most carpet manufacturers specify the types of padding that perform best with their products. Your Lowe's Flooring Specialist can also help with your padding selection.

Carpet Installation

We make installing carpet easy at Lowe's. Once you have selected your carpet, a Lowe's representative will visit your home, measure your space and check for any issues that need special attention.

Following that, an installation date will be established and Lowe's certified installers will deliver and install your new carpet. If you choose, Lowe's will take away your old carpet and pad. We will clean up thoroughly after the job and even vacuum your new floor before leaving your home.

Day of Installation check list

1. Move all breakables, such as lamps, vases, mirrors, wall hangings, antiques or valuables, from areas affected by installation.
2. Disconnect and remove all electronic equipment, including televisions, stereos and computers.
3. Remove all electrical wires running under carpets or along baseboards and door casings.
4. Move furniture out of the room that will receive the new floor.
5. Create a clear path through your home for easy access to the installation area and removal of debris.
6. New flooring that is thicker than the original may require doors to be trimmed to allow them to swing freely.
