

Use and Care Guide

Dura-Trel, Inc. products are made of a vinyl plastic and are virtually maintenance free. However, our product can become dirty from being exposed to atmospheric conditions. A heavy rain or a garden hose should clean the product well. If neither rain or a hose does a satisfactory job, just follow the easy instructions below.

- 1. Get a bucket of warm, soapy water. We recommend 2 tablespoons of liquid dish soap per 1 gallon of warm water.*
- 2. Use a soft, white cloth and scrub down the stubborn dirt or stains.*
- 3. We do not recommend using any abrasive cleaners or brushes. It may damage the vinyl plastic.*
