*Call Customer Care Center to order replacement parts.
**Finish/color code must be specified when ordering.
Retain this document for future servicing.
Record model number from box for reference.
Model Number: _____

CAUTION: Risk of injury. Do not attempt to cut tempered glass.
IMPORTANT! Do not remove the protective vinyl strip from the bottom of the glass panels until instructed.
Walls must be within 3/8" (10 mm) of plumb.
Cover drain with tape to avoid loss of small parts.
Follow the silicone sealant manufacturer's instructions for application and curing time.
Watch this installation online; visit the product page at www.sterlingplumbing.com.

1 IMPORTANT! The wall jamb must rest flat against the shower ledge and the wall. Determine which end of the wall jamb will rest on the shower ledge. Match either the square or contoured end of the wall jamb to the corner radius of the shower ledge.

2 Remove the adhesive backing from both friction pads. Attach a friction pad to the backside of each wall jamb approximately 1" (25 mm) above the shower ledge.

3 Center the wall jambs on the shower ledge. Position both wall jambs the same distance from the front and back edges.

4 Using a level, plumb both wall jambs. Secure with masking tape.

5 Position the bottom track on the shower ledge. Place the bottom track between both wall jambs with the bottom track leg facing the outside of the shower.

6 Using the large hex wrench (provided), turn the expansion mechanism toward the inside of the shower until the bottom track is secure and the wall jambs are flush against the shower walls.

7 Slide both caps toward the center of the top track. Position the top track to rest on top of the wall jambs with the rounded face toward the outside of the shower and the expansion mechanism on the right.

8 NOTE: The clamp tabs must press the wall jambs flush against the wall when the top track is expanded. When positioning the top track, insert the clamp tabs against the wall jambs.

9 Use the large hex wrench (provided) to turn the expansion mechanism. Expand the top track until the top track is secure and the wall jambs are flush against the shower walls. Tighten one or two additional turns to secure the top track. Remove the tape from the wall jambs.

10

Check the bumpers for the correct horizontal alignment with the wall jambs.

18

On the inside of the shower, hold the guide against the bottom track and slide the doors from wall to wall. If the doors bind or do not contact the bumpers, reposition the rollers to raise or to lower the glass panels.

Raise the glass.

Lower the glass.

19

NOTE: When the top track is tightened properly, the expansion mechanism nut will be seated against the stationary portion of the top track. Ensure that the top track pads and the wall jambs are pressed flush against the wall and that the shower door frame is installed securely. Expand the top and bottom tracks if needed.

21

IMPORTANT! Proper application of silicone sealant is critical to the long-term performance of your shower. Apply silicone sealant to your shower door as instructed in the following steps.

Silicone Sealant

22

Outside the shower, lift the center guide slightly and apply a 3/16" (5 mm) bead of silicone sealant under the guide.

23

Outside the shower, apply a 3/16" (5 mm) bead of silicone sealant along the entire length of the wall jambs and the bottom track.

Outside of the Shower

24

Inside the shower, apply a 3/16" (5 mm) bead of silicone sealant along the entire length of the wall jambs and where the wall jambs meet the bottom track.

Troubleshooting	
Symptom: Alignment	Recommended Action
1. The top of the door panel is tilted away from the wall.	A. Remove the door panel from the top track and lower the roller that is closest to the wall. See step 18.
2. The bottom of the door panel is tilted away from the wall.	A. Remove the door panel from the top track and raise the roller that is closest to the wall. See step 18.
3. The door panel does not touch the bumper.	A. Determine whether door panel top or bottom is closer to the wall and then adjust the roller closest to the wall.
4. The wall jamb is not flush against the wall.	A. Check that the top and bottom tracks press the wall jambs flush against the walls. See steps 5, 6, 7, 8, and 9.
Symptom: Water Leaks	Recommended Action
1. Water leaks between panels.	A. When showering, make sure the inside panel is against the showerhead wall.
2. Water leaks between the wall jamb and the door panel.	A. Adjust the door panel to line up with the wall jamb. See step 18.
3. Water leaks under the bottom track.	A. Check for proper silicone sealant application. See steps 22, 23, and 24. Apply more silicone sealant in the leak location.
Symptom: Operation (open/close)	Recommended Action
1. The outside panel is difficult to move.	A. Ensure a gap exists between the bottom track and the door panel. If no gap exists, lower the rollers to the next hole. B. Ensure the rollers are properly installed. See step 13. C. Clean any debris in the top track groove.
2. The inside panel is difficult to move.	A. Ensure a gap exists between the bottom track and the door panel. If no gap exists, lower the rollers to the next hole. B. Ensure the rollers are properly installed. See step 11. C. Clean any debris in the top track groove.

Based on the classification specified above, STERLING bath and shower doors are warranted to be free of manufacturing defects within the time of the specified model's limited warranty from date of sale.

Kohler Co. will, at its election, repair, rectify or replace a fixture when inspection by Kohler Co. discloses any such defects occurring in normal usage within the time period of coverage stated above. Kohler Co. is not responsible for removal or installation costs where replacement is indicated. Damages due to improper handling, installation or maintenance are not considered manufacturing defects and are not covered by this warranty. This warranty is valid for the original, consumer purchaser only.

To obtain warranty service, contact Sterling, either through your plumbing contractor, home center, wholesaler or dealer, or by calling or writing Sterling, Consumer Services, 444 Highland Drive, Kohler, Wisconsin 53044, 1-800-783-7546.

TO THE EXTENT PERMITTED BY LAW, ALL IMPLIED WARRANTIES INCLUDING THOSE OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY DISCLAIMED. KOHLER CO. AND SELLER HEREBY DISCLAIM ANY LIABILITY FOR SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES. Some states/provinces do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of special, incidental or consequential damages, so these limitations and exclusions may not apply to you. This warranty gives you specific legal rights. You may have other rights which vary from state/province to state/province.

This is the exclusive written warranty for Kohler Co.
